The Improvement of the Estate Alistair M. Duckworth,2020-03-24 Originally published in 1994. In *The Improvement of the Estate*, Alistair Duckworth contends that understanding Mansfield Park is fundamental to appreciating Jane Austen's body of work. Professor Duckworth understands Mansfield Park as underscoring the central uniting theme in Austen's work—her concept of the estate and its improvement. The author illustrates Austen's connection to the values of Christian humanism, which she conveys through the uniting theme of estate improvement. According to Duckworth, the estate represents moral and social heritage, so the manner in which individuals seek to improve their estates in Jane Austen's novels represents the direction in which she saw the state and society moving. Finally, Duckworth underscores Austen's awareness of the importance of a society of individuals whose behavior is socially informed.

Improving Genetic Disease Resistance in Farm Animals Akke Jitske Akkermans,W. Sybesma,2012-12-06 This publication contains the proceedings of a seminar held in Brussels on November 8-9, 1988. The title of the seminar was Reducing the costs of disease by improving resistance through genetics. The seminar was held as an activity of the Community Programme for the Coordination of Agricultural Research, 1984-1988. Costs of disease depend on losses caused by morbidity, mortality and production decreases and on the costs of preventive measures including vaccination and medication. Production losses often contribute a major portion to the total costs. To reduce costs of disease preventive measures like vaccination, preventive medication and hygienic procedures are applied. Genetic resistance is an attractive preventive measure because of its consistent nature in the next generations, because it precludes veterinary services and because there are no side-effects. Constraints are the long term investment, relatively slow progress per generation (in combination with production traits) and the considerable lack of knowledge about inheritance of resistance mechanisms in farm animals.
