Integrated E-learning Wim Jochems, Jeroen J. G. van Merriënboer, Rob Koper, 2004 This book forms a serious, in-depth study of the subject and proposes that e-learning is not simply a matter of 'digitizing' traditional materials, but involves a new approach, which must take into account pedagogical, technological and organizational features to form a well-designed education system.

Handbook of Science Communication Anthony Wilson, 1998-01-01 Addressing the lack of a specific book on core communication/presentation skills, the Handbook of Science Communication is written as a guide for students to speak and write effectively and as a reference for scientists who need to communicate their work effectively to each other and to the wider public. The book considers how the public understanding of science has changed with time and clearly explains how important the art of communication is for the effective communication of ideas. It continues with guidance on literature searches and the use of information sources, from the library to the live interviewee. The book also deals with how to write and speak effectively, working in a group, and working with the media.

The Withers Awaken Mark Cheverton, 2018-07-03 Krael, the Wither King, has been trapped deep underground, ending his reign of terror, and all the NPCs of the Far Lands have all put away their swords in peace except Watcher; the young archer still suspects Krael has bigger plans. He’s right. In the darkness of the Cave of Slumber, Krael awakens the imprisoned wither horde, and with the help of creepers and endermen, the wither army is released from their rocky jail. They spread across the Far Lands, searching for the ancient Vault of Weapons which will make the army of withers indestructible. But one man alone holds the secret to the Vault’s whereabouts: the Far Land’s last living NPC wizard. Watcher and his friends must race to find the wizard before Krael and his army of monsters. But if they fail, a wave of destruction, led by the King of the Withers, will sweep across the landscape, destroying everything—and everyone—they know.

Information Ecologies Bonnie A. Nardi, Vicki O'Day, 2000-02-28 A call for informed, responsible engagement with information technology at the local level. The common rhetoric about technology falls into two extreme categories: uncritical acceptance or blanket rejection. Claiming a middle ground, Bonnie Nardi and Vicki O'Day call for responsible, informed engagement with technology in local settings, which they call information ecologies. An information ecology is a system of people, practices, technologies, and values in a local environment. Nardi and O'Day encourage the reader to become more aware of the ways people and technology are interrelated. They draw on their empirical research in offices, libraries, schools, and hospitals to show how people can engage their own values and commitments while

using technology.
