**Loose Wire** Jeremy Wagstaff,2006-09 EVER GET THE FEELING that technology is taking over your life and not asking you first? When you've mislaid that important file or can't connect your new camera, do you just want to hurl your computer out of the window? When your kids/friends/grandparents start talking about blogging, podcasting and RSS feeds do you nod as wisely as you can while wrestling with the urge to throw them out of the window too? The bad news

is that technology isn't going away. The good news is that, by picking up this book, you're halfway to making it work for you - not against you. Loose Wire is a compilation of Jeremy Wagstaff's most popular weekly columns on personal technology from The Wall Street Journal Asia and the Far Eastern Economic Review. An ordinary person's primer on technology, Loose Wire explains - in jargon-free language and real sentences - what has happened over the past few years, from the rise of the mobile phone to phishing, to where we are heading, as well as hands-on, practical advice about how to enjoy the ride. ABOUT THE AUTHOR Jeremy Wagstaff has worked as a journalist since 1986 - for the BBC, Reuters, The Wall Street Journal and the Far Eastern Economic Review. Most of that time has been spent in Asia, covering uprisings, wars, colonial retreats and the odd (sometimes very odd) press conference. No techie, his interest in technology grew out of a realization that it was changing the way journalists - and the world - work, and that following it would probably be a better idea than fighting it. Since 2000 he has been writing a technology column and has since 2004 appeared regularly on the BBC World Service. He also keeps a blog at [www.loosewireblog.com](http://www.loosewireblog.com).

Integrated E-learning Wim Jochems, Jeroen J. G. van Merriënboer, Rob Koper, 2004 This book forms a serious, in-depth study of the subject and proposes that e-learning is not simply a matter of 'digitizing' traditional materials, but involves a new approach, which must take into account pedagogical, technological and organizational features to form a well-designed education system.

**Twelve Years a Slave** Solomon Northup, 2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

*Information Ecologies* Bonnie A. Nardi, Vicki O'Day, 2000-02-28 A call for informed, responsible engagement with information technology at the local level. The common rhetoric about technology falls into two extreme categories: uncritical acceptance or blanket rejection. Claiming a middle ground, Bonnie Nardi and Vicki O'Day call for responsible, informed engagement with technology in local settings, which they call information ecologies. An information ecology is a system of people, practices, technologies, and values in a local environment. Nardi and O'Day encourage the reader to become more aware of the ways people and technology are interrelated. They draw on their empirical research in offices, libraries, schools, and hospitals to show how people can engage their own values and commitments while using technology.

**How to Pass OSCP Series: Windows Privilege Escalation Step-By-Step Guide** Alan Wang, 2020-11-13 This book is the first of a series of How To Pass OSCP books and focus on techniques used in Windows Privilege Escalation. This is a step-by-step guide that walks you through the whole process of how to escalate privilege in Windows environment using many common techniques.
