The Perfect Thing Steven Levy, 2006-10-23 On October 23, 2001, Apple Computer, a company known for its chic, cutting-edge technology -- if not necessarily for its dominant market share -- launched a product with an enticing promise: You can carry an entire music collection in your pocket. It was called the iPod. What happened next exceeded the company's wildest dreams. Over 50 million people have inserted the device's distinctive white buds into their ears, and the iPod has become a global obsession. The Perfect Thing is the definitive account, from design and marketing to startling impact, of Apple's iPod, the signature device of our young century. Besides being one of the most successful consumer products in decades, the iPod has changed our behavior and even our society. It has transformed Apple from a computer company into a consumer electronics giant. It has remolded the music business, altering not only the means of distribution but even the ways in which people enjoy and think about music. Its ubiquity and its universally acknowledged coolness have made it a symbol for the digital age itself, with commentators remarking on the iPod generation. Now the iPod is beginning to transform the broadcast industry, too, as podcasting becomes a way to access radio and television programming. Meanwhile millions of Podheads obsess about their gizmo, reveling in the personal soundtrack it offers them, basking in the social cachet it lends them, even wondering whether the device itself has its own musical preferences. Steven Levy, the chief technology correspondent for Newsweek magazine and a longtime Apple watcher, is the ideal writer to tell the iPod's tale. He has had access to all the key players in the iPod story, including Steve Jobs, Apple's charismatic cofounder and CEO, whom Levy has known for over twenty years. Detailing for the first time the complete story of the creation of the iPod, Levy explains why Apple succeeded brilliantly with its version of the MP3 player when other companies didn't get it right, and how Jobs was able to convince the bosses at the big record labels to license their music for Apple's groundbreaking iTunes Store. (We even learn why the iPod is white.) Besides his inside view of Apple, Levy draws on his experiences covering Napster and attending Supreme Court arguments on copyright (as well as his own travels on the iPod's click wheel) to address all of the fascinating issues -- technical, legal, social, and musical -- that the iPod raises. Borrowing one of the definitive qualities of the iPod itself, The Perfect Thing shuffles the book format. Each chapter of this book was written to stand on its own, a deeply researched, wittily observed take on a different aspect of the iPod. The sequence of the chapters in the book has been shuffled in different copies, with only the opening and concluding sections excepted. Shuffle is a hallmark of the digital age -- and The Perfect Thing, via sharp, insightful reporting, is the perfect guide to the deceptively diminutive gadget embodying our era.

Twelve Years a Slave Solomon Northup, 2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Information Ecologies Bonnie A. Nardi, Vicki O'Day, 2000-02-28 A call for informed, responsible engagement with information technology at the local level. The common rhetoric about technology falls into two extreme categories: uncritical acceptance or blanket rejection. Claiming a middle ground, Bonnie Nardi and Vicki O'Day call for responsible, informed engagement with technology in local settings, which they call information ecologies. An information ecology is a system of people, practices, technologies, and values in a local environment. Nardi and O'Day encourage the reader to become more aware of the ways people and technology are interrelated. They draw on their empirical research in offices, libraries, schools, and hospitals to show how people can engage their own values and commitments while using technology.
