International Law and Corporate Actors in Deep Seabed

Mining Joanna Dingwall, 2021-07-08 The deep seabed beyond national jurisdiction (known as the Area) comprises almost three-quarters of the entire surface area of the oceans, and is home to an array of prized commodities including valuable metals and rare earth elements. In recent years, there has been a marked growth in deep seabed investment by private corporate actors, and an increasing impetus towards exploitation. This book addresses the unresolved legal challenges which this increasing corporate activity will raise over the coming years, including in relation to matters of common management, benefit-sharing, marine environmental protection, and investment protection. Acting under the United Nations Convention on the Law of the Sea (UNCLOS), the International Seabed Authority is responsible for regulating the Area for the benefit of humanity and granting mining contracts. A product of its history, the UNCLOS deep seabed regime is an unlikely hybrid of capitalist and communist values, embracing the role of private actors while enshrining principles of resource distribution. As technological advances begin to outstrip legal developments, this book assesses the tension between corporate

commercial activity in the Area and the achievement of the common heritage.

Structural Fabric in Deep Sea Drilling Project Cores from Forearcs J. Casey Moore, 1986 Chapter 2 provides a comprehensive macroscopic and microscopic description of the cores. Chapter 1 includes tectonic overviews of the forearcs sampled by the cores and chapters 3 through 6 provide indepth studies of especially significant structural features: faults, scaly fabrics, veins and cataclastic fabrics. Chapters 7 and 8 present detailed analysis of core mineralogy and physical properties, respectively, which lead to fundamental insights into the incipient alteration of sediment in accretionary wedges. Experiments relevant

to the interpretation of structural fabrics of DSDP cores constitute the subject of chapter 9. The final chapter provides a theoretical overview of deformation mechanisms operative during deformation of materials from DSDP cores, and the transition to deformation mechanisms that appear to be dominant in equivalent, more buried rocks.

Advances in Deep Learning, Artificial Intelligence and Robotics

Luigi Troiano, Alfredo Vaccaro, Roberto Tagliaferri, Nishtha

Kesswani, Irene Díaz Rodriguez, Imene Brigui, Domenico

Parente, 2022-01-03 This book of Advances in Deep Learning,

Artificial Intelligence and Robotics (proceedings of ICDLAIR 2020)

is intended to be used as a reference by students and researchers

who collect scientific and technical contributions with respect to

models, tools, technologies and applications in the field of modern

artificial intelligence and robotics. Deep Learning, AI and robotics

represent key ingredients for the 4th Industrial Revolution. Their

extensive application is dramatically changing products and

services, with a large impact on labour, economy and society at all.

The research and reports of new technologies and applications in

DL, AI and robotics like biometric recognition systems, medical

diagnosis, industries, telecommunications, AI petri nets model-

based diagnosis, gaming, stock trading, intelligent aerospace systems, robot control and web intelligence aim to bridge the gap between these non-coherent disciplines of knowledge and fosters unified development in next-generation computational models for machine intelligence.

Flavius Josephus: Translation and Commentary, Volume 1B: Judean War 2 Steve Mason, 2008-10-16 Volume 1b in Brill's Josephus Project contains Book 2 of Josephus' Judean War (translation and commentary). This book deals with a period of enormous consequence: from King Herod's death (4 BCE) to the first phase of the war against Rome (66 CE). The commentary aims at a balance between historical and literary issues.

Flavius Josephus Flavius Josèphe, 2008 This book deals with a period of enormous consequence: from King Herod's death (4 BCE) to the first phase of the war against Rome (66 CE). It covers: the succession struggle, the governments of Herod's sons, Judea's incorporation as a Roman province, some notable governors (including Pilate), Kings Agrippa I and II, the Judean philosophical schools (featuring the Essenes), various rebel movements and the Sicarii, tensions between Judeans and their neighbors, events leading up to the revolt, the failed intervention of the Syrian legate

Cestius Gallus, and preparations for war in Judea and Galilee. The commentary aims at a balance between historical and literary

Origins Ariel Adrean Roth, 1998 Are the worlds of science and religion irreconcilable? Has modern science with its theory of evolution disproved the biblical account of the origin of life? If one accepts the biblical account of origins, does one then have to reject science? Scientist and Christian believer Ariel A. Roth argues that taken together, science and religion give us a more complete and sensible understanding of the world around us, our place in it, and our ultimate meaning and fate. Roth examines such topics as the

evidence for evolution and creation, the Flood, the strengths and limitations of the scientific method, and the reliability of Scripture. He concludes that the biblical model of a recent creation by God leaves fewer unanswered questions than either science's evolutionary model or any view between the two positions, such as progressive creation or theistic evolution. - Back cover.

Words in Deep Blue Cath Crowley, 2017-06-06 “One of the loveliest, most exquisitely beautiful books I’ve read in a very long time. . . . I didn’t just read the pages, I lived in them.” —Jennifer Niven, New York Times bestselling author of *All the Bright Places*
A beautiful love story for fans of Jandy Nelson and Nicola Yoon:

two teens find their way back to each other in a bookstore full of secrets and crushes, grief and hope—and letters hidden between the pages. Years ago, Rachel had a crush on Henry Jones. The day before she moved away, she tucked a love letter into his favorite book in his family’s bookshop. She waited. But Henry never came. Now Rachel has returned to the city—and to the bookshop—to work alongside the boy she’d rather not see, if at all possible, for the rest of her life. But Rachel needs the distraction. Her brother drowned months ago, and she can’t feel anything anymore. As Henry and Rachel work side by side—surrounded by books, watching love stories unfold, exchanging letters between the pages—they find hope in each other. Because life may be uncontrollable, even unbearable sometimes. But it’s possible that words, and love, and second chances are enough.
