The Indexing Companion Glenda Browne, Jon
 Jerney, 2007-04-23 The Indexing Companion, first published in
 2007, gives an overview of indexing for professional indexers,
 editors, authors, librarians and others who may be called upon to
 write, contribute to, edit or commission an index. It covers basic
 principles as well as examining controversial areas. It is based on
 publishing standards, textbooks, and the consensus of the
 indexing community, gained from participation in various mailing
 lists. It discusses a wide range of document formats and subjects
 that require indexing, as well as dipping into new topics on the
 edge of indexing such as folksonomies and the semantic web.
 Some people consider indexing to be a dry topic - at the end of
 this book people should be thinking of indexing as a challenging
 and rewarding profession.

Companion Animal Economics Sophie Hall, Luke Dolling, Katie
 Bristow, Ted Fuller, Daniel S Mills, 2016-12-05 Succinct, highly

readable and thought provoking, this important new text is designed to raise awareness of the potential economic impact of companion animals in the UK. It discusses the potential benefits and costs of companion animals to the economy and highlights the need for this matter to be thoroughly researched, given the potential scale of impact and the potential costs of ignoring this matter. Inspired by the seminal Council for Science and Society (CSS) Report, *Companion Animals in Society* (1988), this work updates and extends its evaluation of the economic impact of companion animals on society and lays a benchmark for future development. This pivotal new book is important for policy makers at national and international levels and all those involved in animal welfare.
