Clinical Virology Douglas D. Richman, Richard J. Whitley, Frederick G. Hayden, 2020-07-10 The essential reference of clinical virology Virology is one of the most dynamic and rapidly changing fields of clinical medicine. For example, sequencing techniques from human specimens have identified numerous new members of several virus families, including new polyomaviruses, orthomyxoviruses, and bunyaviruses. Clinical Virology, Fourth Edition, has been extensively revised and updated to incorporate the latest developments and relevant research. Chapters written by internationally recognized experts cover novel viruses, pathogenesis, epidemiology, diagnosis, treatment, and prevention, organized into two major sections: Section 1 provides information regarding broad topics in virology, including immune responses, vaccinology, laboratory diagnosis, principles of antiviral therapy, and detailed considerations of important organ system manifestations and syndromes caused by viral infections. Section 2 provides overviews of specific etiologic agents and discusses their biology, epidemiology, pathogenesis of disease causation, clinical manifestations, laboratory diagnosis, and management. Clinical Virology provides the critical information scientists and health care professionals require about all aspects of this rapidly evolving field.

E-learning in Medical Education Rachel Ellaway, Ken Masters, 2008

Long-term oxygen therapy Roberto Walter Dal Negro, Richard V. Hodder, 2013-01-12 Long-term oxygen therapy (LTOT) usually represents the final step in the management of severe chronic respiratory diseases: a large proportion of patients suffering from these conditions is involved and the corresponding impact for the Health Institutions and the Society is dramatically increasing. Although LTOT is well known and widely used since long ago in most modern countries, it still represents a challenging topic due to the huge amount of variables which can affect both its efficacy and effectiveness. Unfortunately, patients, doctors, care-givers, together with health institutions and political decision makers frequently have different visions on LTOT, thus highly contributing to obtain uneven results and changing outcomes. The focus of this volume is on new insights and novel perspectives of LTOT. Starting

from consolidated experiences, its aim is also to emphasize the strategic value of developing technologies and innovative organizational models uniquely to find out even more opportunities and advantages for the management of chronic respiratory patients needing long-term oxygen treatment.

The Business of Words Crispin Thurlow, 2019-07-30
The Business of Words examines the practices of 'high-end' language workers or wordsmiths where we find words being professionally designed, institutionally managed, and, inevitably, objectified for status and profit. Aligned with existing work on language and political economy in critical sociolinguistics and discourse studies, the volume offers a novel, complementary insight into the relatively elite practices of language workers such as advertisers, dialect coaches, publishers, judges, translators, public relations officers, fine artists, journalists, and linguists themselves. In fact, the book considers what academics might learn about language from other wordsmiths, opening a space for 'dialogue' between those researching language and those who also stake a claim to linguistic expertise and a way with words. Bringing together an array of leading international scholars from the cognate fields of discourse studies, sociolinguistics, and linguistic anthropology, this book is an essential resource for researchers, advanced undergraduate, and postgraduate students of English language, linguistics and applied linguistics, communication and media studies, and anthropology.

Networks in Water Governance Manuel

Fischer, Karin Ingold, 2020-08-19 With the consequences of climate change and biodiversity loss becoming more and more apparent, both the protection of water resources and water-related ecosystems as well as protection from water, that is flood protection policies, have become increasingly important. This book explores the latest applications of network analysis concepts and measures to the study and practice of water governance. Given the holistic complexity of water governance, it covers individual water governance aspects such as flood protection and fisheries, as well as overarching concepts like integrated water management and social-ecological interactions. The book provides an overview of current water governance issues, network analytic concepts as well as implications for practice. The main body of the text is made up of eight case studies by world-leading environmental governance scholars, each of which addresses one water-related challenge by applying a variety of network approaches. The first part of the book highlights network dispersion and fragmentation, the second focuses on how such fragmentation in networks can be overcome and the third deals with specific roles of actors in networks. This collection is a key resource for scholars and practitioners interested in water governance all over the world. It provides readers with an overview of the potential of network analytic concepts for research on complex governance problems.

Handbook of Anglophone World Literatures Stefan

Helgesson, Birgit Neumann, Gabriele Rippl, 2020-09-07
The Handbook of Anglophone World Literatures is the first globally comprehensive attempt to chart the rich field of world literatures in English. Part I navigates different usages of the term 'world literature' from an historical point of view. Part II discusses a range of theoretical and methodological approaches to world literature. This is also where the handbook's conceptualisation of 'Anglophone world literatures' – in the plural – is developed and interrogated in juxtaposition with proximate fields of inquiry such as postcolonialism, translation studies, memory studies and environmental humanities. Part III charts sociological approaches to Anglophone world literatures, considering their commodification, distribution, translation and canonisation on the international book market. Part IV, finally, is dedicated to the geographies of Anglophone world literatures and provides sample interpretations of literary texts written in English.

The Bureaucratic Production of Difference Julia M. Eckert, 2020-05-31 In the context of the ever-increasing political problematization of migration in Europe, agencies charged with migrant administration create diverse categories of difference to distinguish between the »deserving migrant« and the illegal one: They assess the detainability or the credibility of asylum seekers, the danger posed by Islamic organizations, and make situational decisions that determine whether migration or labour law applies to individual agricultural workers. In this book,

each chapter analyses how organizational interpretations of the common good shape bureaucratic practices. Together, these ethnographic analyses reveal how migration policies in different European countries take shape in administrative practice.

Visualizing Digital Discourse Crispin

Thurlow, Christa Dürscheid, Federica

Diémoz, 2020-02-10 The first dedicated volume of its kind, *Visualizing Digital Discourse* brings together sociolinguists and discourse analysts examining the role of visual communication in digital media. The volume showcases work from leading, established and emerging scholars from across Europe, covering a diverse range of digital media platforms such as messaging, video-chat, gaming and wikis; visual modalities such as emojis, video and layout; methodologies like discourse analysis, ethnography and conversation analysis; as well as data from different languages. With an opening chapter by Rodney Jones, the volume is organized into three parts: *Besides Words and Writing*, *The Social Life of Images*, and *Designing Multimodal Texts*. From the perspective of these broad domains, chapters tackle some of the major ideological, interactional and institutional implications of visibility for digital discourse studies. The first part, beginning with a co-authored chapter by Crispin Thurlow, focuses on micro-level visual practices and their macro-level framing – all with particular regard for emojis. The second part, beginning with a chapter from Sirpa Leppänen, examines the ways visual resources are used for

managing personal relations, and the wider cultural politics of visual representation in these practices. The third part, beginning with a chapter by Hartmut Stöckl, considers organizational contexts where users deploy visual resources for more transactional, often commercial ends.

The Philosopher's Kiss Peter Prange, 2012-04-24
In 1747 Paris, Sophie falls in love with married philosopher Denis Diderot, who is collaborating with authors to create an encyclopedia of all human knowledge, a project that threatens to undermine both the monarchy and the church--as well as Sophie's right to freedom, love, and happiness.

Critique of Authenticity Thomas Claviez, Kornelia Imesch, Britta Sweers, 2020-01-10 The volume provides a critical assessment of the concept of authenticity and gauges its role, significance and shortcomings in a variety of disciplinary contexts. Many of the contributions communicate with each other and thus acknowledge the enormous significance of this politically, morally, philosophically and economically-charged concept that at the same time harbors dangerous implications and has been critically deconstructed. The volume shows that the alleged need or desire for authenticity is alive and kicking but oftentimes comes at a high price, connected to a culture of experts, authority and exclusionary strategies.

Feather to Fire Gregory Colbert, 2008-06 Preface and postf. of v. 1 in English and Japanese; pref. of v. 2-4 in English.

Secrecy and Surveillance in Medieval and Early Modern England Annette Kern-Stähler, Nicole Nyffenegger, 2020-01-20 This volume explores practices of secrecy and surveillance in medieval and early modern England. The ten contributions by Swiss and international scholars (including Paul Strohm, Sylvia Tomasch, Karma Lochrie, and Richard Wilson) address in particular the intersections of secrecy and surveillance with gender and identity, public and private spheres, religious practices, and power structures. Covering a wide range of English literary texts from Old English riddles to medieval romances, the Book of Margery Kempe, and the plays and poems of Shakespeare, these essays seek to contribute to our understanding of the practices of secrecy, exclusion, and disclosure as well as to the much-needed historicisation of Surveillance Studies called for in the opening article by Sylvia Tomasch. ---

Effective Field Theory in Particle Physics and Cosmology Sacha Davidson, Paolo Gambino, Mikko Laine, Matthias Neubert, Christophe Salomon, 2020-04-20 The topic of the CVIII session of the Ecole de Physique des Houches, held in July 2017, was Effective Field Theory in Particle Physics and Cosmology. Effective Field Theory (EFT) is a general method for describing quantum systems with multiple length scales in a tractable fashion. It allows to perform precise calculations in established models (such as the Standard Models of particle physics and cosmology), as well as to concisely parametrise possible effects from physics beyond the Standard Models. The goal of this school was to offer a broad introduction to

the foundations and modern applications of Effective Field Theory in many of its incarnations. This is all the more important as there are precious few textbooks covering the subject, none of them in a complete way. In this book, the lecturers present the concepts in a pedagogical way so that readers can adapt some of the latest developments to their own problems. The chapters cover almost all the lectures given at the school and will serve as an introduction to the topic and as a reference manual to students and researchers.

Functions of Sports Clubs in European Societies
Siegfried Nagel, Karsten Elmoose-Østerlund, Bjarne Ibsen, Jeroen Scheerder, 2021-08-01 This book takes

a closer look at the societal functions of sports clubs by using the broad range of empirical data of a comparative study. There is a limited amount of up-to-date knowledge on the functions of sports clubs and their potential to promote public health, social cohesion and democratic participation through volunteering and thus contribute to public welfare in European societies. Most of the existing studies are country-specific and therefore do not allow for making comparisons from a cross-national perspective. In light of this, the project 'Social Inclusion and Volunteering in Sports Clubs in Europe' (SIVSCE) collected, analysed and discussed comparable data and knowledge across ten European countries and disseminated this knowledge to politicians, sports professionals and sports volunteers in Europe. The SIVSCE project contains comparative data of clubs as well as of members in selected sports clubs. In each country chapter, the comparative data from the SIVSCE project is put together in a coherent way. Particularly, the data of the member survey give in-depth information about the fulfillment of the different functions of sports clubs (e.g. extension of democratic participation, social integration). Providing in-depth data related to policy issues, structure and management of clubs and individual member surveys, this book will be useful for students—particularly those in sports management programmes—as well as researchers and practitioners in social science and economics.
