The Organized Mind Daniel Levitin,2015-01-29 Author and neuroscientist Daniel Levitin tackles the problems of twenty-first century information overload in his New York Times bestselling book The Organized Mind. 'The Organized Mind is smart, important, and as always, exquisitely written' - Daniel Gilbert, Harvard University, author of Stumbling on Happiness Overwhelmed by demands on your time? Baffled by the sheer volume of data? You're not alone: modern society is in a state of information overload. The Organized Mind investigates this phenomenon and the effect it has on us, analysing how and why our brains are struggling to keep up with the demands of the digital age. The twenty-first century sees us drowning under emails, forever juggling six tasks at once and trying to make complex decisions ever more quickly. Using a combination of academic research and examples from daily life, neuroscientist and bestselling author Daniel Levitin explains how to take back control of your life. This book will take you through every aspect of modern life, from healthcare to online dating to raising kids, showing that the secret to success is always organization. Levitin's research is surprising, powerful and will change the way you see the world. It's time to learn why there's no such thing as multitasking, why email is so addictive and why all successful people need a junk drawer. In a world where information is power, The Organized Mind holds the key to harnessing that information and making it work for you. Dr. Daniel J. Levitin has a PhD in Psychology, training at Stanford University Medical School and UC Berkeley. He is the author of the No. 1 bestseller This Is Your Brain On Music (Dutton, 2006), published in nineteen languages, and The World in Six Songs (Dutton, 2008) which hit the bestseller lists in its first week of release. Currently he is a James McGill Professor of Psychology, Behavioral Neuroscience and Music at McGill University in Montreal, Canada.

Too Much to Know Ann M. Blair,2010-11-02 The flood of information brought to us by advancing technology is often accompanied by a distressing sense of information overload, yet this experience is not unique to modern times. In fact, says Ann M. Blair in this intriguing book, the invention of the printing press and the ensuing abundance of books provoked sixteenth- and seventeenth-century European scholars to register complaints very similar to our own. Blair examines methods of information management in ancient and medieval Europe as well as the Islamic world and China, then focuses particular attention on the organization, composition, and reception of Latin reference books in print in early modern Europe. She explores in detail the sophisticated and sometimes idiosyncratic techniques that scholars and readers developed in an era of new technology and exploding information.

**Information Overload** Judith B. Strother, Jan M. Ulijn, Zohra Fazal, 2012-10-02 This book covers the ever-increasing problem of information overload from both the professional and academic perspectives. Focusing on the needs of practicing engineers and professional communicators, it addresses the causes and costs of information overload, along with strategies and techniques for reducing and minimizing its negative effects. The theoretical framework of information overload and ideas for future research are also presented. The book brings together an international group of authors, providing a truly global point of view on this important, rarely covered topic.

Information and Communication Overload in the Digital Age Marques, Rui Pedro Figueiredo, Batista, Joao Carlos Lopes, 2017-01-30 Advances in communication technologies have created an overabundance of available information and knowledge to people in contemporary society. Consequently, it has become pivotal to develop new approaches for information processing and understanding. Information and Communication Overload in the Digital Age is a comprehensive reference source for the latest scholarly material on the increased amount of information created by evolving technologies, examining creative methods for improved control of information overload. Focusing on theoretical and experimental topics, such as media consumption, media literacy, and business applications, this book is ideally designed for researchers, practitioners, academics, graduate students, and professionals seeking emerging perspectives on information and communication management.

**Surviving Information Overload** Kevin A. Miller,2009-05-18 The barrage of emails, voicemail, web pages to scan, books to read, and magazines and newsletters to digest leave people increasingly feeling overwhelmed and out of control in dealing with information overload as society spins even faster. This book offers a brief, seven-chapter practical guide to the capture approach. It teaches the skills of point, focus, and shoot to help the reader become more productive and overcome mental fatigue. This is not a gimmick for neat desk people or an expensive system requiring purchase of multiple resources or practice of rigid exercises. This practical, quick-read book shows how people of any temperament can keep from drowning in the sea of information. Features include interviews and insights from national leaders plus charts, cartoons, worksheets, and creative exercises. The book is not about how to speed up but how to gain time and focus and purpose and the mental space to be creative. You don't have to finish the book but can read it selectively at different times depending on your current needs. Feel free to skim-read, tear out pages, email small sections to a friend, or read from back to front. The goal is that you come away with ideas and help. The four sections are: 1. Finding the information you need: and getting results from it.2. Clearing information clutter: less is more.3. Creating space to think: finding oasis amid overload.4. Discovering bonus stuff: it doesn't cost you anything extra. This clear, practical guide will help you to: -Sort and organize information in less time -Make space to be creative -Find just the information you need when you need it -Move from frantic to purposeful -Keep growing over a lifetime.

<u>Surviving Information Overload</u> Odette Pollar,2003-08-29 Newspapers, books, magazines, and the Internet tell us what we want to know when we want to know it. Reports, memos, e-mails, and voice mail help us transmit and receive information quickly and easily. With so much information coming at us constantly, it's no wonder many of us are living with information anxiety. Odette Pollar, productivity specialist and author of Crisp's best-selling Organizing Your Work Space, empowers readers to dig out of the avalanche of information they are bombarded with daily and to take back control of their time in her new book, Surviving Information Overload.

Communication and Technology Lorenzo Cantoni, James A. Danowski, 2015-08-31 The primary goal of the Communication and Technology volume (5th within the series Handbooks of Communication Science) is to provide the reader with a comprehensive compilation of key scholarly literature, identifying theoretical issues, emerging concepts, current research, specialized methods, and directions for future investigations. The internet and web have become the backbone of many new communication technologies, often transforming older communication media, through digitization, to make them compatible with the net. Accordingly, this volume focuses on internet/web technologies. The essays cover various infrastructure technologies, ranging from different kinds of hard-wired elements to a range of wireless technologies such as WiFi, mobile telephony, and satellite technologies. Audio/visual communication is discussed with reference to large-format motion pictures, medium-sized television and video formats, and the small-screen mobile smartphone. There is also coverage of audio-only media, such as radio, music, and voice telephony; text media, in such venues as online newspapers, blogs, discussion forums and mobile texting; and multi-media technologies, such as games and virtual reality.

Information Overload Paradox L. V. Orman, 2016-01-05 We are living in an age of information. Staggering amounts of information are collected, stored, and widely disseminated. Yet, we may be less informed and less knowledgeable than ever. The paradox of increasing information, yet decreasing knowledge and insight has many possible reasons, some of which are subtle and difficult to identify, and even more difficult to remedy. The fundamental issue is quantity crowding out quality, leading to an abundance of poor quality information which may not be a good substitute for scarce but high quality information. Information is not unique in exhibiting this paradox. There are many other goods that exhibit this unusual characteristic of more being worse than less. Those who eat the most food are rarely the healthiest people, and they may actually be severely deficient in some nutrients. Those who have the most Facebook friends are often the loneliest people. Those who are the busiest are not the most productive. Those who read books and watch television the most are sometimes the least knowledgeable. Information overload is like a raging fire. There is so much heat, yet no useful heat can be extracted from it. Or it is like a raging flood. There is so much water, yet no useful water can come out of it. All of these examples point to the pervasiveness of this paradox, but it is most insidious with information, critical in an information economy, and most difficult to overcome in a modern society dominated by communication technologies. In an information economy, we appear to be shipwrecked, surrounded by an ocean of water, yet dying of thirst! The most obvious reason for the paradox is the substitution problem where the emphasis on quantity shifts the emphasis and resources away from quality. It is costly to produce quality information, and it is difficult to do both quality and quantity. When quality does not pay in proportion to its high cost, quantity wins over. The second reason is the obsolescence problem. Information is not neutral with respect to the physical world, but it is an agent of change. Information is useful precisely because it is used to change the environment and subjugate nature and society to our purposes. But as information is used to change the environment to take advantage of new opportunities, our existing information about the environment becomes obsolete, leading to a loss of information. The net effect may be positive or negative, but increasingly negative as we show, in a fast-changing information-intensive society. The third reason is the competition problem when information is used as a competitive weapon against others, to mislead and confuse others, leading to a loss of knowledge on their part. Information is power, because it can be used to control others and exploit them, by controlling their information sources, and consequently their behavior. But replacing reliable information with distorted and misleading information leads to a net information loss on their part. More importantly, if everybody uses the same tactics, leading to an information war, everybody may end up worse off with significant loss of knowledge and insight by all.

Being a Scholar in the Digital Era Daniels, Jessie, Thistlethwaite, Polly, 2016-07-29 What opportunities, rather than disruptions, do digital technologies present? How do developments in digital media not only support scholarship and teaching but also further social justice? Written by two experts in the field, this accessible book offers practical guidance, examples, and reflection on this changing foundation of scholarly practice. It is the first to consider how new technologies can connect academics, journalists, and activists in ways that foster transformation on issues of social justice. Discussing digital innovations in higher education as well as what these changes mean in an age of austerity, this book provides both a vision of what scholars can be in the digital era and a road map to how they can enliven the public good.

**Unload Email Overload** Bob O'Hare,2012-10-31 Email steals too much of your precious time, doesnt it? Processing email takes way too much time because we never learned to manage it effectively. We are constantly interrupted, invest countless hours in it, re-read emails that languish in our inbox, store email we dont need and suffer from email overload. Dont you agree? This book provides what you need to manage email, eliminate the overload and save your precious time. It will help you minimize interruption, overcome indecision and empty your inbox. It will help you organize priorities and manage time, so you can get your work doneat work. You can give up doing email at dinner and in bed. Good idea?

Navigating Fake News, Alternative Facts, and Misinformation in a Post-Truth World Dalkir, Kimiz, Katz, Rebecca, 2020-02-28 In the current day and age, objective facts have less influence on opinions and decisions than personal emotions and beliefs. Many individuals rely on their social networks to gather information thanks to social media's ability to share information rapidly and over a much greater geographic range. However, this creates an overall false balance as people tend to seek out information that is compatible with their existing views and values. They deliberately seek out "facts" and data that specifically support their conclusions and classify any information that contradicts their beliefs as "false news." Navigating Fake News, Alternative Facts, and Misinformation in a Post-Truth World is a collection of innovative research on human and automated methods to deter the spread of misinformation online, such as legal or policy changes, information literacy workshops, and algorithms that can detect fake news dissemination patterns in social media. While highlighting topics including source credibility, share culture, and media literacy, this book is ideally designed for social media managers, technology and software developers, IT specialists, educators, columnists, writers, editors, journalists, broadcasters, newscasters, researchers, policymakers, and students.
