A Charter School Principal Story Barbara J. Smith, 2024-03-21 What happens when a Canadian principal, guided by the teachings of Fullan and Hargreaves, takes on the role of school leader in an inner-city charter school in the United States? This inside story of a principal in the DC charter school system, reveals much about the desire for educators and students to experience more than a life of multiple-choice testing that tends to be so commonplace in these schools. While such a case adds to the mound of research that supports the 'change takes time' findings, it nevertheless demonstrates the reality, on a day-to-day basis, of what's worth fighting for in schools. Student and teacher engagement and empowerment matter, and to get to such ends, a school must fiercely focus on targets well beyond test scores.

Sustainable Development Research and Practice in Mexico and Selected Latin American Countries Walter Leal Filho, Ricardo Noyola-Cherpitel, Pedro Medellín-Milán, Valeria Ruiz Vargas, 2017-11-27 This book provides an essential overview of sustainable development research in Mexico. It discusses the empirical research methods and findings, as well as practical initiatives and projects being pursued in Mexico and other countries in the region. Although a number of Mexican universities are now conducting high-quality research on matters related to sustainable development, there are few publications that offer a multidisciplinary overview of research efforts for a broader audience. This book addresses that gap in the literature, providing researchers at Mexican universities – including those from other countries working in Mexico – with an opportunity to present their work, i.e. curriculum innovations, empirical work, activities, case studies, and practical projects. As such, it fosters the exchange of information, ideas and experiences, successful initiatives and best practices.

High Performance Computing in Clouds Edson Borin, Lúcia Maria A. Drummond, Jean-Luc Gaudiot, Alba Melo, Maicon Melo Alves, Philippe Olivier Alexandre Navaux, 2023-07-05 This book brings a thorough explanation on the path needed to use cloud computing technologies to run High-Performance Computing (HPC) applications. Besides presenting the motivation behind moving HPC applications to the cloud, it covers both essential and advanced issues on this topic such as deploying HPC applications and infrastructures, designing cloud-friendly HPC applications, and optimizing a provisioned cloud infrastructure to run this family of applications. Additionally, this book also describes the best practices to maintain and keep running HPC applications in the cloud by employing fault tolerance techniques and avoiding resource wastage. To give practical meaning to topics covered in this book, it brings some case studies where HPC applications, used in relevant scientific areas like Bioinformatics and Oil and Gas industry were moved to the cloud. Moreover, it also discusses how to train deep learning models in the cloud elucidating the key components and aspects necessary to train these models via different types of services offered by cloud providers. Despite the vast bibliography about cloud computing and HPC, to the best of our knowledge, no existing manuscript has comprehensively covered these topics and discussed the steps, methods and strategies to execute HPC applications in clouds. Therefore, we believe this title is useful for IT professionals and students and researchers interested in cutting-edge technologies, concepts, and insights focusing on the use of cloud technologies to run HPC applications.

Places in Need Scott W. Allard, Scott Allard, 2017-06-20 Americans think of suburbs as prosperous areas that are relatively free from poverty and unemployment. Yet, today more poor people live in the suburbs than in cities themselves. In *Places in Need*, social policy expert Scott W. Allard tracks how the number of poor people living in suburbs has more than doubled over the last 25 years, with little attention from either academics or policymakers. Rising suburban poverty has not coincided with a decrease in urban poverty, meaning that solutions for reducing poverty must work in both cities and suburbs. Allard notes that because the suburban social safety net is less-developed than the urban safety net, a better understanding of suburban communities is critical for understanding and alleviating poverty in metropolitan areas. Using census data, administrative data from safety net programs, and interviews with nonprofit leaders in the Chicago, Los Angeles, and Washington, D.C. metropolitan areas, Allard shows that poor suburban households resemble their urban counterparts in terms of labor force participation, family structure, and educational attainment. In the last few decades, suburbs have seen increases in single-parent households, decreases in the number of college graduates, and higher unemployment rates. As a result, suburban demand for safety net assistance has increased. Concerning is evidence suburban social service providers—which serve clients spread out over large geographical areas, and often lack the political and philanthropic support that urban nonprofit organizations can command—do not have sufficient resources to meet the demand. To strengthen local safety nets, Allard argues for expanding funding and eligibility to federal programs such as SNAP and the Earned Income Tax Credit, which have proven effective in urban and suburban communities alike. He also proposes to increase the capabilities of community-based service providers through a mix of new funding and capacity-building efforts. *Places in Need* demonstrates why researchers, policymakers, and nonprofit leaders should focus more on the shared fate of poor urban and suburban communities. This account of suburban vulnerability amidst persistent urban poverty provides a valuable foundation for developing more effective antipoverty strategies.
