Innovation and Diffusion of Software Technology Hugh Pattinson, 2007

Diffusing Software Product and Process Innovations Mark A. Ardis, Barbara L. Marcolin, 2013-04-17 Diffusing Software Product and Process Innovations addresses the problems and issues surrounding successful diffusion of innovations in software. Everett Rogers' classic text, Diffusion of Innovations, provides a valuable framework for evaluating and applying technology transfer methods. In today's new economy, the most important innovations may well be new software products and processes. Topics covered in this valuable new book include: Implementation and coordination issues; New interpretations of diffusion theory; Diffusion of software processes; Contextual factors; Communication of information; Experience reports. This volume contains the edited proceedings of the Fourth Working Conference on Diffusing Software Product and Process Innovations, which was sponsored by the International Federation for Information Processing (IFIP) Working Group 8.6, and held in Banff, Canada in April 2001. It reflects the latest experiences of practitioners and theories of academics in this fast-changing field.

IT Innovation for Adaptability and Competitiveness Brian Fitzgerald, Eleanor Wynn, 2006-04-11 IT Innovation for Adaptability and Competitiveness addresses the topic of IT innovations that can further an organization's ability to adapt and be competitive. Thus we address the problem at an earlier starting

point, that is, the emergence of something innovative in an organization, applied to that organization, and its process of being diffused and accepted internally. Topics covered in the book include: -The role of IT in organizational innovation, -Innovating systems development & process, -Assessing innovation drivers, -Innovation adoption, -New environments, new innovation practices. This volume contains the edited proceedings of the Seventh Working Conference on IT Innovation for Adaptability and Competitiveness, which was sponsored by the International Federation for Information Processing (IFIP) Working Group 8.6 and held at Intel Corporation, Leixlip, Ireland in May-June 2004.

Democratizing Innovation Eric von Hippel, 2005 Innovation is rapidly becoming democratized. Users, aided by improvements in computer and communications technology, increasingly can develop their own new products and services. Eric von Hippel looks closely at this emerging system of user-centred innovation.

Open IT-Based Innovation: Moving Towards Cooperative IT Transfer and Knowledge Diffusion Gonzalo León, Ana M. Bernardos, José R. Casar, Karlheinz Kautz, Janice I. DeGross, 2008-09-25 The 11 Working Conference of IFIP WG 8.6, Open-IT Based Innovation: Moving Towards Cooperative IT Transfer and Knowledge Diffusion, organized in Madrid in October 22–24, 2008, follows the series started in Oslo in 1995 and continues in the footprints of the past year's conference in Manchester. This year, although the Madrid Conference

addresses the usual topics covered in previous WG8.6 conferences, the emphasis is on the issue of open innovation and its relationships with technology transfer and diffusion in the field of information technology. This issue is deeply modifying the way that knowledge is generated, shared, transferred, diffused, and used across the world as a side effect of globalization. It affects the organizational structure, partnerships, roles assumed by stakeholders, and technology transfer and diffusion models and instruments. Industry, academia, and governments are simultaneously concerned. Although the concept applies to all industrial sectors, IT companies were early innovators. The analysis of the contents of this book allows the identification of some trends in technology transfer and diffusion issues as a part of the innovation process. The same problem is addressed in very different ways and extrapolation is not straightforward. Even innovation terminology is not clearly shared by different subcultures in the field.

Organizational Dynamics of Technology-Based Innovation: Diversifying the Research Agenda Tom McMaster, David Wastell, Elaine Ferneley, Janice DeGross, 2007-06-01 This volume presents papers from the 10th Working Conference of the IFIP WG 8.6 on the adoption and diffusion of information systems and technologies. It explores the dynamics of how some technological innovation efforts succeed while others fail. The book looks to expand the research agenda, paying special attention to the areas of theoretical perspectives, methodologies, and organizational sectors.

Diffusing Software Product and Process Innovations Mark A. Ardis, Barbara L. Marcolin, 2014-01-15

Advanced Information Systems Engineering Haris Mouratidis, Colette Rolland, 2011-06-29 This book constitutes the refereed proceedings of the 23rd International Conference on Advanced Information Systems Engineering, CAiSE 2011, held in London, UK, in June 2011. The 42 revised full papers and 5 revised short papers presented were carefully reviewed and selected from 320 submissions. In addition the book contains the abstracts of 2 keynote speeches. The contributions are organized in topical sections on requirements; adaptation and evolution; model transformation; conceptual design; domain specific languages; case studies and experiences; mining and matching; business process modelling; validation and quality; and service and management.

Papers and Proceedings of the Advanced Technology Program's International Conference on the Economic Evaluation of Technological Change, June 15-16, 1998, Georgetown University Conference Center, Washington, DC Richard N. Spivack, 2001

Advanced Computer System Design George Zobrist, Kallol Bagchi, Kishor Trivedi, 1999-01-18 This text focuses on the major issues involved in computer design and architectures. Dealing primarily with systems and applications as related to advanced computer system design, it provides tutorials and surveys and relates new important research results. The intent is to provide a set of

tools based on current research that will enable readers to overcome difficulties with the design and construction of advanced computer systems. Each chapter provides background information, describes and analyzes important work done in the field and provides important direction to the reader on future work and further readings. This book may be purchased as a set with its companion volume, Advanced Computer Performance Modeling and Simulation, edited by Kallol Bagchi, Jean Walrand and George Zobrist.

Emerging Technologies for Innovation Management in the Software Industry
Gupta, Varun, Gupta, Chetna, 2022-05-20 Innovation is the key to maintain competitive advantage. Innovation in products, processes, and business models help companies to provide economic value to their customers. Identifying the innovative ideas, implementing those ideas, and absorbing them in the market requires investing many resources that could incur large costs. Technology encourages companies to foster innovation to remain competitive in the marketplace. Emerging Technologies for Innovation Management in the Software Industry serves as a resource for technology absorption in companies supporting innovation. It highlights the role of technology to assist software companies—especially small start-ups—to innovate their products, processes, and business models. This book provides the necessary guidelines of which tools to use and under what situations. Covering topics such as risk management, prioritization approaches, and digitally-enabled innovation processes, this premier reference source is an ideal resource for

entrepreneurs, software developers, software managers, business leaders, engineers, students and faculty of higher education, researchers, and academicians.

Handbook of Advanced Performability Engineering Krishna B. Misra, 2020-11-16
This book considers all aspects of performability engineering, providing a holistic view of the activities associated with a product throughout its entire life cycle of the product, as well as the cost of minimizing the environmental impact at each stage, while maximizing the performance. Building on the editor's previous *Handbook of Performability Engineering*, it explains how performability engineering provides us with a framework to consider both dependability and sustainability in the optimal design of products, systems and services, and explores the role of performability in energy and waste minimization, raw material selection, increased production volume, and many other areas of engineering and production. The book discusses a range of new ideas, concepts, disciplines, and applications in performability, including smart manufacturing and Industry 4.0; cyber-physical systems and artificial intelligence; digital transformation of railways; and asset management. Given its broad scope, it will appeal to researchers, academics, industrial practitioners and postgraduate students involved in manufacturing, engineering, and system and product development.

Innovations and Advanced Techniques in Systems, Computing Sciences and Software Engineering Khaled Elleithy, 2008-08-17 Innovations and Advanced

Techniques in Systems, Computing Sciences and Software Engineering includes a set of rigorously reviewed world-class manuscripts addressing and detailing state-of-the-art research projects in the areas of Computer Science, Software Engineering, Computer Engineering, and Systems Engineering and Sciences. Innovations and Advanced Techniques in Systems, Computing Sciences and Software Engineering includes selected papers from the conference proceedings of the International Conference on Systems, Computing Sciences and Software Engineering (SCSS 2007) which was part of the International Joint Conferences on Computer, Information and Systems Sciences and Engineering (CISSE 2007).

Advanced Information Systems Engineering Anne Banks Pidduck, John Mylopoulos, Carson C. Woo, M.T. Ozsü, 2003-08-01

The explosive growth of the Internet and the Web have created an ever-growing demand for information systems, and ever-growing challenges for Information Systems Engineering. The series of Conferences on Advanced Information Systems Engineering (CAiSE) was launched in Scandinavia by Janis Bubenko and Arne Solvberg in 1989, became an important European conference, and was held annually in major European sites throughout the 1990s. Now, in its 14th year, CAiSE was held for the first time outside Europe, showcasing international research on information systems and their engineering. Not surprisingly, this year the conference enjoyed unprecedented attention. In total, the conference received 173 paper submissions, the highest number ever for a CAiSE conference. Of those, 42 were accepted as regular papers and 26 as short

(poster) papers. In addition, the conference received 12 proposals for workshops of which 8 were approved, while 4 tutorials were selected from 15 submissions. The technical program was put together by an international committee of 81 experts. In total, 505 reviews were submitted, with every member of the committee contributing. Decisions on all submissions were reached at a program committee meeting in Toronto on January 26-27, 2002. Workshop and tutorial proposals were handled separately by committees chaired by Patrick Martin (workshops), and Jarek Gryz and Richard Paige (tutorials). We wish to extend a great "THANK YOU!" to all members of the program and organizing committees for their volunteer contributions of time and expertise. The fact that so many busy (and famous!) people took the trouble to help us with the organization of this conference and the formation of its technical program speaks well for the future of CAiSE and the field of Information Systems Engineering.

Industrial Organisation and Innovation Salvatore Torrasi, 1998-01-01 This work provides a systematic/quantitative analysis of the development of the software industry, the major growth industry in advanced economies. It presents the results of industry surveys, shedding light on differences in specialisation and performance of European and US software firms.

The Art of Software Innovation Minna Pikkarainen, Wim Codenier, Nick Boucart, José Antonio Heredia Alvaro, 2011-08-25 Imagine that you are the CEO

of a software company. You know you compete in an environment that does not permit you to treat innovation as a secondary issue. But how should you manage your software innovation to get the most out of it? This book will provide you with the answer. Software innovation is multifaceted and the approaches used by companies can be very different. The team of authors that wrote this book took the assumption that there is no such thing as a universal software engineering process or innovation process. Some things work well for a certain company, others do not. The book is organized around what the authors call eight fundamental practice areas for innovation with software. Each practice area contains a number of activities that can help companies to master that practice area. It also contains industrial experience reports that illustrate the applicability of these practice areas in software companies and is structured in such a way that you can select and read only those practice areas that are relevant to your company. The book is written with an industrial target audience in mind. Its most important goal is to challenge companies by offering them a framework to become more innovation-driven, rather than engineering-driven. Intrigued? Here you will find details of what you and your company can do to understand, implement, and sustain continuous innovation.

Innovation in the Software Sector Lippoldt Douglas C., Strykowski Piotr, 2009-11-23 This book throws a spotlight on innovation across the software universe, setting out key issues and highlighting policy

perspectives. It spans research and development, invention, production, distribution and use of software in the market.

Advanced Topics in Information Resources Management, Volume 1 Khosrow-Pour, D.B.A., Mehdi, 2001-07-01 *Advanced Topics in Information Resources Management* features the latest research findings dealing with all aspects of information resources management, managerial and organizational applications, as well as implications of information technology organizations. It aims to be instrumental in the improvement and development of the theory and practice of information resources management, appealing to both practicing managers and academics.

Managing Technology and Innovation Robert Verburg, J. Roland Ortt, Willemijn M. Dicke, 2006-06-19 Modern technology and innovation are vital to the success of all companies, be they hi-tech firms or companies seemingly unaffected by technology and innovation; whether established firms or business start-ups. This book focuses on understanding technology as a corporate resource, covering product development, design of systems and the managerial aspects of new and high technology. Topics investigated include: the internal organization of high technology firms the management of technology in society managing innovation dilemmas and strategies. The wide-ranging experience of the teachers and experts contributing to this book has resulted in an integrated, multi-disciplinary, textbook that provides an introductory overview to managing technology and innovation in the twenty-first century.

This text is essential reading for students of business and engineering concerned with technology and innovation management.

Advanced Topics in End User Computing Mo Adam Mahmood, 2004-01-01 Advanced Topics in End User Computing features the latest research findings dealing with end user computing concepts, issues, and trends. Empirical and theoretical research concerned with all aspects of end user computing including development, utilization, and management are included. Volume three is specifically interested in those studies that show a significant contribution by relating end user computing to end user satisfaction, end user productivity, and strategic and competitive advantage. *Note: This book is part of a new series entitled Advanced Topics in End User Computing. This book is Volume Three within this series (Vol. III, 2004).
