Mathematical Insights into Advanced Computer Graphics Techniques Yoshinori Dobashi,Shizuo Kaji,Kei Iwasaki,2018-11-27 This book presents cutting-edge developments in the advanced mathematical theories utilized in computer graphics research – fluid simulation, realistic image synthesis, and texture, visualization and digital fabrication. A spin-off book from the International Symposium on Mathematical Progress in Expressive Image Synthesis in 2016 and 2017 (MEIS2016/2017) held in Fukuoka, Japan, it includes lecture notes and an expert introduction to the latest research presented at the symposium. The book offers an overview of the emerging interdisciplinary themes between computer graphics and driven mathematic theories, such as discrete differential geometry. Further, it highlights open problems in those themes, making it a valuable resource not only for researchers, but also for graduate students interested in computer graphics and mathematics.

Python: Deeper Insights into Machine Learning Sebastian Raschka,David Julian,John Hearty,2016-08-31 Leverage benefits of machine learning techniques using Python About This Book Improve and optimise machine learning systems using effective strategies. Develop a strategy to deal with a large amount of data. Use of Python code for implementing a range of machine learning

algorithms and techniques. Who This Book Is For This title is for data scientist and researchers who are already into the field of data science and want to see machine learning in action and explore its real-world application. Prior knowledge of Python programming and mathematics is must with basic knowledge of machine learning concepts. What You Will Learn Learn to write clean and elegant Python code that will optimize the strength of your algorithms Uncover hidden patterns and structures in data with clustering Improve accuracy and consistency of results using powerful feature engineering techniques Gain practical and theoretical understanding of cutting-edge deep learning algorithms Solve unique tasks by building models Get grips on the machine learning design process In Detail Machine learning and predictive analytics are becoming one of the key strategies for unlocking growth in a challenging contemporary marketplace. It is one of the fastest growing trends in modern computing, and everyone wants to get into the field of machine learning. In order to obtain sufficient recognition in this field, one must be able to understand and design a machine learning system that serves the needs of a project. The idea is to prepare a learning path that will help you to tackle the real-world complexities of modern machine learning with innovative and cutting-edge techniques. Also, it will give you a solid foundation in the machine learning design process, and enable you to build customized machine learning models to solve unique problems. The course begins with getting your Python fundamentals nailed down. It focuses on answering the right questions that cove a wide range of powerful Python libraries, including scikit-learn Theano and Keras.After getting familiar with Python core concepts, it's time to dive into the field of data science. You will further gain a solid foundation on the machine learning design and also learn to customize models for solving problems. At a later stage, you will get a grip on more advanced techniques and acquire a broad set of powerful skills in the area of feature selection and feature engineering. Style

and approach This course includes all the resources that will help you jump into the data science field with Python. The aim is to walk through the elements of Python covering powerful machine learning libraries. This course will explain important machine learning models in a step-by-step manner. Each topic is well explained with real-world applications with detailed guidance.Through this comprehensive guide, you will be able to explore machine learning techniques.

The Price We Pay for Google Peter Olsthoorn,2015-10-23 The growth of Google as a gate to information and entertainment is as dizzying as it is fascinating. 'I can't imagine a life without Google', is an often heard saying. There is a blind trust at its ground, but are we aware of Google's selection processes and what it does with the information on our behavior on the internet? The search results are getting more and more personal and the so-called 'free' services are paid for by the information on our surf behavior. We have become both the producer of and a product to Google. It even intends to become our personal advisor. Where will this lead us? This book will analyze the advantages and risks of the growing power of this corporation. It is not an accusation, but a critical analysis on basis of facts. Peter Olsthoorn (1960) studied history before he became a successful journalist at various newspapers and magazines in the Netherlands, Germany and the US. He has been one of the first European journalists publishing daily online articles since '95. Moreover, Olsthoorn is currently the Chairman of the Internet Section at the Dutch Association for Journalists, and a member of the Netherlands Press Council. This ebook contains exclusive interviews with Google Privacy Director Alma Whitten and Danny Sullivan, founder of Search Engine Land. It also contains practical instructions on how to combat data collection about your personal life.

Advances in Intelligent Systems and Computing II Natalia Shakhovska,Volodymyr Stepashko,2017-11-20 This book reports on new theories and applications in the field of intelligent systems and computing. It covers computational and artificial intelligence methods, as well as advances in computer vision, current issues in big data and cloud computing, computation linguistics, and cyber-physical systems. It also reports on data mining and knowledge extraction technologies, as well as central issues in intelligent information management. Written by active researchers, the respective chapters are based on papers presented at the International Conference on Computer Science and Information Technologies (CSIT 2017), held on September 5–8, 2017, in Lviv, Ukraine; and at two workshops accompanying the conference: one on inductive modeling, jointly organized by the Lviv Polytechnic National University and the National Academy of Science of Ukraine; and another on project management, which was jointly organized by the Lviv Polytechnic National University, the International Project Management Association, the Ukrainian Project Management Association, the Kazakhstan Project Management Association, and Nazarbayev University. Given its breadth of coverage, the book provides academics and professionals with extensive information and a timely snapshot of the field of intelligent systems, and is sure to foster new discussions and collaborations among different groups.

The New Advertising [2 volumes] Valerie K. Jones,Ruth E. Brown Ph.D.,Ming Wang,2016-09-19 The era of big data has revolutionized many industries—including advertising.

This is a valuable resource that supplies current, authoritative, and inspiring information about—and examples of—current and forward-looking theories and practices in advertising. The New Advertising: Branding, Content, and Consumer Relationships in the Data-Driven Social Media Era supplies a breadth of information on the theories and practices of new advertising, from its origins nearly a quarter of a century ago, through its evolution, to current uses with an eye to the future. Unlike most other books that focus on one niche topic, this two-volume set investigates the overall discipline of advertising in the modern context. It sheds light on significant areas of change against the backdrop of digital data collection and use. The key topics of branding, content, interaction, engagement, big data, and measurement are addressed from multiple perspectives. With contributions from experts in academia as well as the advertising and marketing industries, this unique set is an indispensable resource that is focused specifically on new approaches to and forms of advertising. Readers will gain an understanding of the distinct shifts that have taken place in advertising. They will be able to build their knowledge on frameworks for navigating and capitalizing on today's fragmented, consumer-focused, digital media landscape, and they will be prepared for what the future of advertising will likely bring.

The Social Media Revolution Jarice Hanson,2016-05-23 Social media shapes the ways in which we communicate, think about friends, and hear about news and current events. It also affects how users think of themselves, their communities, and their place in the world. This book examines the tremendous impact of social media on daily life. When the Internet became mainstream in the early 2000s, everything changed. Now that social media is fully entrenched in daily life, contemporary society has shifted again in how we communicate, behave as consumers, seek out and enjoy entertainment, and express ourselves. Every one of the new applications of social media presents us with a new way of thinking about the economy that supports technological development and communication content and offers new models that challenge us to think about the economic impact of communication in the 21st century. The Social Media Revolution examines the tremendous influence of social media on how we make meaning of our place in the world. The book emphasizes the economic impacts of how we use the Internet and World Wide Web to exchange information, enabling readers to see how social media has taken root and challenged previous media industries, laws, policies, and social practices. Each entry in this useful reference serves to document the history, impact, and criticism of every subject and shows how social media has become a primary tool of the 21st-century world—one that not only contributes to our everyday life and social practices but also affects the future of business. The coverage of topics is extremely broad, ranging from economic models and concepts relevant to social media, such as e-commerce, crowdfunding, the use of cyber currency, and the impact of freeware; to key technologies and devices like Android and

Apple iOS, apps, the cloud, streaming, and smartphones and tablets; to major entrepreneurs, inventors, and subjects of social media, such as Julian Assange, Bill Gates, Steve Jobs, Marissa Mayer, Edward Snowden, Steve Wozniak, and Mark Zuckerberg.

Protecting User Privacy in Web Search Utilization Khan, Rafi Ullah,2023-04-25 Online user privacy is a delicate issue that has been unfortunately overlooked by technology corporations and especially the public since the birth of the internet. Many online businesses and services such as web search engines, retailers, and social network sites exploit user data for profit. There is a misconception among people about the term "privacy." Usually, people think that privacy is the ability of an individual to isolate themselves or that it is a person's right to control access to their personal information. However, privacy is not just about revealing secret information; it also includes exploiting user personal data, as the exploitation of personal data may lead to disastrous consequences. Protecting User Privacy in Web Search Utilization presents both multidisciplinary

and interdisciplinary works on questions related to experiences and phenomena that can or could be covered by concepts regarding the protection and privacy of web service users. It further highlights the importance of web search privacy to the readers and educates them about recent developments in the field. Covering topics such as AI-based intrusion detection, desktop search engines, and privacy risks, this premier reference source is an essential resource for students and educators of higher education, data experts, privacy professionals and engineers, IT managers, software developers, government officials, archivists and librarians, privacy rights activists, researchers, and academicians.
