*Terrific Makerspace Projects* Juan Denzer, Sharona Ginsberg, 2020-08-12 Terrific Makerspace Projects: A Practical Guide for Librarians features fifteen customizable projects that were designed as projects created by librarians/makerspace facilitators, rather than projects in which librarians guided others (makerspace users). These projects were showcased during library events with the goal of promoting the makerspace, as well as other library services, while using them to build connections both within and external to the library. This book outlines maker projects in detail and provides plenty of photos and resources so readers can recreate, customize, and implement them. People at all skill levels in every type of makerspace will find something they can try, with projects that range from simple and low-tech to more complex and tech-heavy. Most projects are inexpensive, taking advantage of free online tools, upcycled or repurposed materials, and low cost electronics such as Arduinos. Each project can be approached as an offering for makerspace visitors or can be created by library employees themselves as tools to engage in outreach and promote the makerspace, library services, the institution, and more. Every project has been created and tested in a real library setting by the authors, who present lessons learned, possible variations, and different ideas on how to implement the projects to their fullest extent. Explore the idea of using the makerspace to highlight the value of other library services, or simply find new and fun ways to engage with your users. The book also offers suggestions on how to be a great maker, and tips on makerspace safety, finding low-cost materials, and more. Whether you're just beginning your makerspace or looking for fresh ideas for your established space, this book has something to offer.

**Emotions in a Digital World** Adrian Scribano,2022-12-30 This book presents an introduction to strategies for qualitative digital social research on emotions in a digital world. The book emphasizes the connections that exist between emotional ecologies, emotions as texts, and the virtual / mobile / digital world that brings us closer to a hermeneutics of the practices of feeling. In the context of 'Society 4.0', the book explores: Changes in the organization of daily life and work in virtual, mobile and digital environments. The impact of apps and social networks on sensations, emotions and sensibilities. Necessary changes in social research to employ the power of these apps and networks for social enquiry. As such, this book shares a set of social inquiry practices developed and applied to capture and understand emotions today. It should be considered as a first step in a long journey of exploring the close connections between sensibilities, emotions, and social research methodology. The book will appeal to students and instructors of emotion studies from across the social sciences, including sociology, psychology, organization studies, ethnography, history, and political science.
