*Modelling in Health Care Finance* Michael Cichon, 1999 In straightforward, non-technical language, the book demystifies the modelling process and provides step-by-step guidance, demonstrating how managers and policy-makers can best make use of models in the formation of health policy goals, the identification of options, and the analysis and implementation of results.

Public Expenditure Analysis World Bank, 2005 Focuses on the public sector in developing countries. Provides tools of analysis for discovering equity in tax burdens as well as in public spending and judging government performance in its role in safeguarding the interests of the poor and disadvantaged. Outlines a framework for a rights-based approach to citizen empowerment - in other words, creating an institutional design with appropriate rules, restraints, and incentives to make the public sector responsive and accountable to an average voter.

*Haiti*, 2008-01-01 Haiti: Public Expenditure Management and Financial Accountability Review is part of the World Bank Country Study series. These reports are published with the approval of the subject government to communicate the results of the Bank's work on the economic and related conditions of member countries to governments and to the development community. This book summarizes the key findings and policy recommendations of a comprehensive diagnosis of a Public Expenditure Management and Financial Accountability Review (PEMFAR). The PEMFAR is an exercise which integrates the analysis of a Public Expenditure.

**Social Budgeting** Wolfgang Scholz, Krzysztof Hagemejer, Michael Cichon, International Labour Office, 2000 The first part of the book provides designing a social accounting system. The second part shows how the relationships between the economy and the social protection system can be translated into a quantitative model which permits projections and simulations to be carried out. Includes two concrete country applications.

*Zambia*, 2004-01-01 Zambia's economy is not growing fast. Poverty is on the rise. The quality of economic governance is on the decline. And public resources are not well spent. The badly needed first steps to reverse this situation are to start getting the budgetary allocations right and to make sure those allocations go where they're intended. Addressing the longstanding challenges that Zambia faces in public expenditure management will require strong political will. For Zambia to assure that public accountability is enduring and not dependent on the government of the day, it must strengthen budget processes and institutions that can provide public oversight and promote basic checks and balances. This report provides an analysis of how Zambia can strengthen budgetary processes and institutions for accountability and effective service delivery to its citizens.

Liberia International Monetary Fund. Fiscal Affairs Dept., 2012-09-18 At the request of the Government of Liberia (GoL), the IMF Fiscal Affairs Department (FAD) led an external assessment of the central government's public financial management (PFM) systems based on the Public Expenditure and Financial Accountability (PEFA) methodology. The assessment was undertaken in close collaboration with the Ministry of Finance's (MoF) PFM Reform Coordination Unit (RCU), with the participation of staff of the African Development Bank and the World Bank, and with financial support from the European Union and Sida. The assessment examines progress since the PEFA assessment of 2007 and provides a renewed baseline for monitoring progress in PFM reform and for supporting the GoL in refining, where necessary, the current PFM reform strategy. The assessment snapshot date was April 23, 2012. The report was reviewed by the GoL, the PEFA Secretariat, a donor reference group, and FAD, the latter being at the same time responsible for quality

assurance.

**Antiquarianisms** Benjamin Anderson, Felipe Rojas, 2017-05-31 Antiquarianism and collecting have been associated intimately with European imperial and colonial enterprises, although both existed long before the early modern period and both were (and continue to be) practiced in places other than Europe. Scholars have made significant progress in the documentation and analysis of indigenous antiquarian traditions, but the clear-cut distinction between “indigenous” and “colonial” archaeologies has obscured the intense and dynamic interaction between these seemingly different endeavours. This book concerns the divide between local and foreign antiquarianisms focusing on case studies drawn primarily from the Mediterranean and the Americas. Both regions host robust pre-modern antiquarian traditions that have continued to develop during periods of colonialism. In both regions, moreover, colonial encounters have been mediated by the antiquarian practices and preferences of European elites. The two regions also exhibit salient differences. For example, Europeans claimed the “antiquities” of the eastern Mediterranean as part of their own, “classical,” heritage, whereas they perceived those of the Americas as essentially alien, even as they attempted to understand them by analogy to the classical world. These basic points of comparison and contrast provide a framework for conjoint analysis of the emergence of hybrid or cross-bred antiquarianisms. Rather than assuming that interest in antiquity is a human universal, this book explores the circumstances under which the past itself is produced and transformed through encounters between antiquarian traditions over common objects of interpretation.

*Over the Spectrum* Philip Williams, 2022-08-08 *Over the Spectrum* was first published in 1982 and at the time was considered one of the best introductions to programming on Sir Clive Sinclair's incredible new home computer. Many who went on to have long careers in the computer industry started with the programs in this excellent book. As such it is not only a great re-print for purposes of nostalgia, but also a practical and helpful guide to anyone interested in the programming of retro games. As *Personal Computer World* stated at the time: \*\*\* Final entrant in the Spectrum stakes is Melbourne House's *OVER THE SPECTRUM*, and for me it runs out the clear winner. Not a teach-yourself-programming guide, it is a collection of programs: each program has a detailed breakdown of exactly what happens when and how it's all achieved. The listings are not trivial, and the result is well worth the effort. The book is liberally illustrated showing screen displays for almost all the programs so you know what you are trying to achieve at the outset. As a demonstration of what can be achieved using the Spectrum's User Defined Characters this book cannot be faulted, and although it contains no programming hints as such, a diligent reader is going to learn a lot about the Spectrum by working his or her way through it. Take a bow gents, and give us more. \*\*\* Acorn Books is proud to present its Retro Reproductions series, a collection of classic computing works from the 1980s and 90s, lovingly reproduced in the 21st century. From standards of programming reference no self-respecting microcomputer programmer would be without, to obscure works not found in print anywhere else, these modern reprints are perfect for any connoisseur of retro computing.
