**The Role of the Learner in Task-Based Language Teaching** Craig Lambert, Scott Aubrey, Gavin Bui, 2023-05-03 This comprehensive, forward-looking text is the first holistic research overview and practical methods guide for researching the role that affective and conative factors play in second language learners' task performance and language acquisition. It provides a long overdue update on the role of the learner in task-based language teaching (TBLT). The book brings together theoretical background and major constructs, established and innovative methodological and technological tools, cutting-edge findings, and illuminating suggestions for future work. A group of expert scholars from around the world synthesize the state of the art, detail how to design and conduct empirical studies, and authoritatively set the agenda for future work in this critical, emerging area of language learning and instructional design. With a variety of helpful features like suggested research, discussion questions, and recommended further readings, this will be an invaluable resource to advanced students and researchers of second language acquisition, applied linguistics, psychology, education, and related areas.

**Referent Similarity and Nominal Syntax in Task-Based Language Teaching** Craig Lambert, 2018-12-07 This volume addresses an important gap in the literature on task design and second language use. Building on insights from over 50 years of research on the relationship between task demands and language use, it examines how referent similarity relates to developmentally-relevant variation in the use of nominal structures, comparative structures and abstract lexis among first and second language speakers of English. In addition to providing an empirical basis for future research on tasks, it shares both theoretical and practical information on task design, which will greatly benefit curriculum and material developers.

*Critical Thinking in Academic Writing* Shi PU, 2021-08-30 The book inquires into critical thinking through a cultural approach. Based on an ethnographic study, it compares Chinese postgraduate students' conceptualisations and applications of critical thinking in three different settings in China and the UK. From an insider's perspective, it analyses the intricate interplay of multiple cultural and individual factors that conditions students' critical thinking development as they learn to write an academic thesis and to manage postgraduate learning. The book offers insights into the nature of problems that Chinese students encounter with critical thinking and envisions possibilities for the ideas for critical thinking to have a transformative power in an intercultural space. The book will primarily be of interest to academics and educators who work on critical thinking and academic writing, especially those who work with Chinese students. Scholars interested in intercultural issues in higher education may also find it relevant.

Handbook of Human Multitasking Andrea Kiesel, Leif Johannsen, Iring Koch, Hermann Müller, 2022-09-12 This handbook on human multitasking provides an integrative overview on simultaneous and sequential multitasking and thus combines theorizing on dual task limitations as well as costs related to task switching. In addition to a wide range of empirical findings and their theoretical integration, the editors provide a number of applications of multitasking, like training, interindividual differences and applied research in traffic and health psychology and music expertise. The book is suitable for people interested in multitasking, that is, for researchers and graduate students of cognitive psychology, movement science, sport psychology, cognitive neuroscience, cognitive and neurological rehabilitation, aging sciences, and broader cognitive science.

*Perceived Unfairness in Task-oriented Reward-interdependent Work Relationships* Stephanie Chyi-Ruey Chen, 1996

*Constructing a Personal Orientation to Music Teaching* Mark Robin Campbell, Linda K. Thompson, Janet Revell Barrett, 2010-09-13 Constructing a Personal Orientation to Music Teaching promotes inquiry and reflection to facilitate teacher growth, lifelong learning and a disposition toward educational change. Strongly grounded in current theories and research in teacher education, the text engages readers in analyzing their own experiences in order to conceptualize the complexity of teaching; involves them in clarifying their reasons for seeking a career in teaching; supports their insights, questions, and reflections about their work; and promotes a reflective, critical attitude about schools in general as teachers are urged to think of themselves as change agents in school settings.

**Motivational Effects of Self-awareness in Task Performing Groups** Janet A. Hymes, 1985

**Task-Based Language Teaching** Rod Ellis, Peter Skehan, Shaofeng Li, Natsuko Shintani, Craig Lambert, 2019-10-17 A comprehensive account of the research and practice of task-based language teaching.

Handbook of Motivation Science James Y. Shah, Wendi L. Gardner, 2013-12-09 Integrating significant advances in motivation science that have occurred over the last two decades, this volume thoroughly examines the ways in which motivation interacts with social, developmental, and emotional processes, as well as personality more generally. The Handbook comprises 39 clearly written chapters from leaders in the field. Cutting-edge theory and research is presented on core psychological motives, such as the need for esteem, security, consistency, and achievement; motivational systems that arise to address these fundamental needs; the process and consequences of goal pursuit, including the role of individual differences and contextual moderators; and implications for personal well-being and interpersonal and intergroup relations.

Research in Personnel and Human Resources Management M. Ronald Buckley, Anthony R. Wheeler, Jonathon R. B. Halbesleben, 2017-08-08

Research in Personnel and Human Resources Management is designed to promote theory and research on important substantive and methodological topics in the field of human resources management.

*Task Switching and Cognitive Control* James Grange, George Houghton, 2014-04-25 One thing that separates human beings from the rest of the animal world is our ability to control behavior by referencing internal plans, goals, and rules. This ability, which is crucial to our success in a complex social environment, depends on the purposeful generation of task sets--states of mental readiness that allow each of us to engage with the world in a particular way or achieve a particular aim. This book reports the latest research regarding the activation, maintenance, and suppression of task sets. Chapters from many of the world's leading researchers in task switching and cognitive control investigate key issues in the field, from how we select the most relevant task when presented with distracting alternatives, to how we maintain focus on a task (eyes on the prize) and switch to a new one when our goals or external circumstances change. Chapters also explore the brain structures responsible for these abilities, how they develop during childhood, and whether they decline due to normal aging or neurological disorders. Of interest especially to scholars and students of cognitive psychology, the volume offers thorough, multi-disciplinary coverage of contemporary research and theories concerning this fundamental yet mysterious aspect of human brain function and behavior.

**The Oxford Handbook of Personnel Assessment and Selection** Neal Schmitt, 2012-03-28 Employee selection remains an integral role of industrial/organizational psychology. Modern demands on organizations have required adaptations on the part of those responsible for selection programs, and researchers in evaluating the impact of these adaptations as well as their implications for how we view human potential. Many of these developments (web-based assessments, social networking, globalization of organizations, for example) determine in great part the content and focus of many of the chapters in this book. The Oxford Handbook of Personnel Assessment and Selection is organized into seven parts: (1) historical and social context of the field of assessment and selection; (2) research strategies; (3) individual difference constructs that underlie effective performance; (4) measures of predictor constructs; (5) employee performance and outcome assessment; (6) societal and organizational constraints on selection practice; and (7) implementation and sustainability of selection systems. While providing a comprehensive review of current research and practice, the purpose of the volume is to provide an up-to-date profile of each of the areas addressed and highlight current questions that deserve additional attention from researchers and practitioners. This compendium is essential reading for industrial/organizational psychologists and human resource managers.

Theory of Mind in Middle Childhood and Adolescence Rory T. Devine, Serena Lecce, 2021-05-26 This landmark text integrates diverse

perspectives on how humans understand others’ minds (or ‘theory of mind’) beyond early childhood into middle childhood and adolescence. It explores how the neural, cognitive, and social changes of middle childhood and adolescence shape the ongoing development of theory of mind, and how theory of mind helps children navigate their lives. Drawing on cutting-edge research from leading international experts, this book provides a survey and analysis of the current state and future direction of the field. It is organized around three themes relating to the key issues in contemporary research. The first part focuses on the biological and cognitive bases of theory of mind in middle childhood and adolescence. The second part goes on to explore the social predictors and consequences, considering how theory of mind is shaped by social experiences and, in turn, impacts children’s social lives in middle childhood and adolescence. Finally, the third part focuses on theory of mind in the context of neurodiversity, disability, and youth mental health in middle childhood and adolescence. Offering in-depth understanding for all students and scholars of developmental and cognitive psychology, neuroscience, clinical psychology and psychiatry, and education, this valuable text also identifies an agenda for future scholarship on this exciting topic.

*Design and Analysis in Task-based Language Assessment* Robert J. Mislevy,2002

*Inclusive Group Work* William Pelech,Cheryl D. Lee,Robert Basso,Maria Gandarilla,2016 Inclusive Group Work offers an innovative approach to working with intervention groups and task groups by redefining the concept of diversity and reframing core group work concepts. Appropriate for both undergraduate and graduate courses, this book introduces readers to the foundations of group practice with an emphasis on social justice. The book presents diversity as a relational concept that is at the heart of all group interactions. Individual identity is complex, and in order for all members to be treated equally their individuality must be accepted and respected. Using this framework, the book discusses the values and ethics of social work with groups, explores the stages of group work including planning, and presents both basic and advanced skills such as conflict resolution and the use of self. Theories are put into practice in three chapters of case studies that show in-detail how diversity can be employed as a strength in multiple settings to achieve the wide variety of goals groups pursue. Through this new approach, students and practitioners alike will learn how to harness diversity to engage and maintain participation in inclusive group processes.
