Workshop Proceedings of the 9th International Conference on Intelligent Environments J.A. Botía, D. Charitos, 2013-07-26 Intelligent Environments (IE) play an increasingly important role in many areas of our lives, including education, healthcare and the domestic environment. The term refers to physical spaces incorporating pervasive computing technology used to achieve specific goals for the user, the environment or both. This book presents the proceedings of the workshops of the 9th International Conference on Intelligent Environments (IE '13), held in Athens, Greece, in July 2013. The workshops which were presented in the context of this conference range from regular lectures to practical sessions. They provide a forum for scientists, researchers and engineers from both industry and academia to engage in discussions on newly emerging or rapidly evolving topics in the field. Topics covered in the workshops include artificial intelligence techniques for ambient intelligence; applications of affective computing in intelligent environments; smart offices and other workplaces;

intelligent environment technology in education for creative learning; museums as intelligent environments; the application of intelligent environment technologies in the urban context for creating more sociable, intelligent cities and for constructing urban intelligence. IE can enrich user experience, better manage the environment's resources, and increase user awareness of that environment. This book will be of interest to all those whose work involves the application of intelligent environments.

The Biggest Book of Games for One Ever! Robert Allen,2005 A pack of playing cards usually suggests friends gathered around a card table. But what can you do when you have a deck of cards, a wish to play, and nobody to play with? Author Robert Allen has the answer in this unusual book that presents rules and variations for 100 different fascinating and challenging solitaire card games--but there's still more! You'll also find approximately 400 coin games, matchstick puzzles, logic puzzles, crosswords, and memory games. The solitaire games include Roll-Call, Pyramid, Canfield, Grandfather Clock, and Flower Garden, to name just a few. Some games--both solitaire and non-card games--take only a few minutes to play, while others can go on for much longer. Each game is described with detailed diagrams, easy-to-follow rules, and the game's object clearly defined. Here's a book to help readers make an hour or two of solitude pass rapidly and entertainingly!

Co-evolution of Intelligent Socio-technical Systems Evangelia Mitleton-Kelly, 2013-05-27 As the interconnectivity between humans through technical devices is becoming ubiquitous, the next step is already in the making: ambient intelligence, i.e. smart (technical) environments, which will eventually play the same active role in communication as the human players, leading to a co-evolution in all domains where real-time communication is essential. This topical volume, based on the findings of the Socionical European research project, gives equal attention to two highly relevant domains of applications: transport, specifically traffic, dynamics from the viewpoint of a socio-technical interaction and evacuation scenarios for large-scale emergency situations. Care was taken to investigate as much as possible the limits of scalability and to combine the modeling using complex systems science approaches with relevant data analysis.

Application of Intelligent Systems in Multi-modal Information Analytics Vijayan
