U. Holm, M. Forsgren, J. Johanson

**Agile Processes in Software Engineering and
Extreme Programming** Alberto Sillitti, Orit

Hazzan, Emily Bache, Xavier Albaladejo, 2011-05-03

This book contains the refereed proceedings of the 12th International Conference on Agile Software Development, XP 2011, held in Madrid, Spain, in May 2011. The year 2011 marked the 10th anniversary of the Agile Manifesto. In this spirit, the XP conference continued its fine tradition of promoting agility by disseminating new research results in a timely manner and by bringing together researchers and practitioners for a fruitful mutual exchange of experiences. As introduced for XP 2010, there were again two different program committees, one for research papers and one for experience reports. Regarding the research papers, 11 out of 56 submissions were accepted as full papers; and as far as the experience reports were concerned, the respective number was 4 out of 17 submissions. In addition to these papers, this volume also includes the short research papers, the abstracts of the posters, the position papers of the PhD symposium, and the abstracts of the workshops.

Advances in Information Systems and Technologies

Álvaro Rocha, Ana Maria Correia, Tom Wilson, Karl A.

Stroetmann, 2013-03-14 This book contains a selection of articles from The 2013 World Conference on Information Systems and Technologies (WorldCIST'13), a global forum for researchers and practitioners to present and discuss the most recent innovations, trends, results, experiences and concerns in the several perspectives of

Information Systems and Technologies. The main topics covered are: Information and Knowledge Management; Organizational Models and Information Systems; Intelligent and Decision Support Systems; Software Systems, Architectures, Applications and Tools; Computer Networks, Mobility and Pervasive Systems; Radar Technologies; and Human-Computer Interaction.

Handbook of Research on European Business and Entrepreneurship Leo Paul Dana, 2008 This book is an important contribution to the field of international entrepreneurship. . . it provides a comprehensive account of internationalization strategies adopted by SMEs in a wide range of European countries, and by drawing on a number of empirical studies, it enriches the theory of SME internationalization with a new theoretical framework that can be useful for understanding the complexity of SME internationalization processes in Europe. Julia Korosteleva, Thunderbird International Business Review From Andorra to Wales with stops in more than 35 other European countries along the way, this comprehensive collection of articles is required reading for scholars interested in international entrepreneurship. It provides information on how entrepreneurs and their firms go international from virtually every country in Europe. This unique volume permits researchers to compare how the process of entrepreneurial internationalization is affected by differences in culture, location, technology, and other influences within Europe. Furthermore, the various authors consider a range of theoretically

important issues, such as cooperation and trust, venture capital, research and development, learning, networks, and government policy. This book serves as an essential departure point from which scholars can embark on their study of international entrepreneurship in Europe. Benjamin M. Oviatt, Georgia State University, US This is a timely and interesting book that brings together some of the most insightful contributions on the internationalization of new ventures, with an emphasis on the European experiences. Assembling some of the best scholars, the book offers a distinctively European perspective one that deserves recognition, analysis, and discussion. I applaud the editors for doing such a masterful job in bringing a great group of researchers and ideas together. I highly recommend this book for any serious researcher and scholar. Shaker A. Zahra, University of Minnesota, US This remarkable book provides valuable contributions on how the process of SMEs internationalization is operating in 37 different European countries. Researchers in international entrepreneurship will find new materials for theorization. Numerous facets of international business are carefully documented by a great many well-known scholars. Also, given the variety of situations typical of the European small business sector, the book may prove to be helpful to small-scale entrepreneurs wishing to take steps towards internationalization. Overall, this coordinate work makes you realize why Europe is so fascinating. Jean-Jacques Obrecht, University Robert Schuman, Strasbourg, France This unique comparative study of the

internationalization of small firms is a milestone in international business research. It compares the internationalization strategies of fast-growing firms across nearly forty different European countries. It shows that the growth trajectories of firms reflect the investing country's geographical location, natural resource endowments, legal and financial institutions and local culture. There are many important new insights to be gained from a careful study of this important new research resource. Mark Casson, University of Reading, UK This unique Handbook illustrates how entrepreneurs across Europe tackle internationalization. This timely and important book identifies patterns and builds a theory of international entrepreneurship in Europe. The contributors discuss the performances of SMEs on the road to internationalization. Each chapter emphasizes how the process of internationalization of SMEs operates, the challenges and opportunities that arise due to each country's specific political and economic situation, and their subsequent internationalization performance. These processes, challenges and performances can be understood through theories of international business and entrepreneurship. Although at times these theories cannot fully

The Routledge Companion to International Entrepreneurship Stephanie A. Fernhaber, Shameen Prashantham, 2014-12-05 The domain of international entrepreneurship has continued to gain momentum in an era that sees entrepreneurship and globalization as critical issues in the world of business. Given the flourish of new research in this area, there is a need to provide an up-to-date perspective on the field and its future. This volume draws together a team of experts purposely selected from both the entrepreneurship and international business fields to present a comprehensive resource on the cutting-edge conversations within international entrepreneurship. This prestigious reference book will offer students and researchers an introduction to leading scholarship in international entrepreneurship and also serve as a catapult for future research.

Emerging Paradigms in International Entrepreneurship Marian Jones, Pavlos Dimitratos, 2004-01-01 Emerging Paradigms in International Entrepreneurship consists of 15

articles organised into six broad themes of interest to scholars. . . which are likely to remain of interest for some time. Ben Oviatt, Journal of International Business Studies

International entrepreneurship as a field of study is not necessarily confined to the internationalisation phenomenon, and recently advanced definitions suggest significant scope for the development and establishment of, as yet, undetermined parameters. Emerging Paradigms in International Entrepreneurship identifies key themes that collectively demonstrate the convergence of thinking at the interface between the disciplines of international business and entrepreneurship. These are: development of the field and the effects of international entrepreneurship on a new economy conceptual and paradigmatic developments international entrepreneurship and the internet as a developing research agenda contacts links and networks as process driven internationalisation cross-sectoral, cross-national and cross-cultural comparisons of entrepreneurship the experiential emphasis in entrepreneurial internationalisation. Explaining the complexities of enterprise in an international and sometimes global environment, this book is distinguished by the cross-disciplinary nature of its contributors and their efforts to develop new paradigmatic approaches in an area characterised by theoretical diversity and convergence. Appealing to researchers, academics and policymakers working in international business particularly the international growth and development of small firms and for

entrepreneurship and small firm scholars this book is a must-have. Lecturers and students on post-graduate programmes would also be interested in the book as a reader.

Entrepreneurial Marketing for SMEs Luca

Impacts of Emerging Economies and Firms on International Business M. Marinov, S.

Marinova, 2012-11-19 The internationalization of emerging economies has brought new perspectives to international business development. Focusing on the extensive impact these emerging economies and firms have had, this volume covers the strong players, such as Brazil, Russia, India and China, as well as dynamically developing economies such as Mexico and the Philippines. The contributors review topics such as the role of institutions and resource dependency on outward foreign direct investment from emerging economies, and the role of the global mindset and psychic distance on the performance of subsidiaries of firms originating from emerging economies. It explores new horizons in international business development and addresses challenging perspectives.

ECEI2009- 4th European conference on entrepreneurship and innovation Johan Breat, 2009
International Business Strategy Peter J

Buckley,Pervez Ghauri,2015-02-20 With stagnated demand in many home economies, the need to internationalize and exploit foreign market opportunities has never been more paramount for businesses to succeed at a global level. However, this process raises a number of questions, such as: can firms use their knowledge of one market in the next? Can firms pursue internationalization on several fronts at the same time? How should firms handle cultural and institutional differences between markets? This textbook provides students with the core research in international business and strategy, including organization, efficiency, external relationships and the challenges found in an increasingly multicultural world. Each part begins with a presentation of the issues and controversies faced in that particular area, followed by a synthesis of the research which provides avenues for future research. To facilitate and encourage further debate and learning, each part also includes at least one original case study. Compiled by two of the World's leading scholars of international business, and supplemented with critical commentaries and a range of integrative case studies, this comprehensive textbook provides advanced students of international business and strategy with a resource that will be invaluable in their studies and beyond.

Software Business João M. Fernandes,Ricardo J. Machado,Krzysztof Wnuk,2015-06-11 This book contains the refereed proceedings of the 6th International Conference on Software Business, ICSOB 2015, held in Braga, Portugal, in June 2015.

The theme of the event was Enterprising Cities focusing on a noticeable spillover of software within other industries enabling new business models: Companies bundle their physical products and software services into solutions and start to sell independent software products in addition to physical products. The 16 full, five short, and three doctoral symposium papers accepted for ICSOB were selected from 42 submissions. The papers span a wide range of issues related to contemporary software business—from strategic aspects that include external reuse, ecosystem participation, and acquisitions to operational challenges associated with running software business.

Business-to-Business Mario Glowik, Sarah Maria Bruhs, 2014-06-05 Contemporary business-to-business (B2B) industries consist of networks of customers, competitors and other stakeholders. Firms which manage their relationships with these important stakeholders are more likely to enjoy a sustained competitive advantage in the international business environment. This book is the first to provide a comprehensive overview of the field from a broad and accessible perspective. The authors bring an authoritative, scholarly understanding to the subject, taking readers through the entire process of creating, developing and maintaining B2B networks. Case studies illustrating each chapter include: Apple, Panasonic, Johnson & Johnson, Epson and Samsung. In providing a single and explicit established academic framework for understanding business networks in a global setting, this book is vital reading for students and researchers involved with international

management, international marketing and strategic management.

E-Retailing Challenges and Opportunities in the Global Marketplace Dixit, Shailja, 2016-02-26 The internet has become a flexible platform upon which global retail brands can expand and grow. With a greater emphasis on and opportunity for new market opportunities in the digital sphere, the global retail market is undergoing an era of rapid transformation as new web-based retail models emerge to meet the needs of the modern consumer. E-Retailing Challenges and Opportunities in the Global Marketplace explores the transformations occurring in the virtual marketplace as consumer needs and expectations shift to the new age of online shopping. Emphasizing the difficulties business professionals face in the digital age in addition to opportunities for market growth and new product development, this publication is a critical reference source for business professionals, product strategists, web managers, IT specialists, and graduate-level students in the fields of business, retail management, and advertising.

International Entrepreneurship in Emerging Markets Mohamed Yacine Haddoud, Paul Jones, Adah-Kole Emmanuel Onjewu, 2019-11-18 This volume presents insights from Brazil, China, India, Pakistan, Sri Lanka and Turkey to enlighten scholars by unearthing the nature, drivers, barriers and determinants of entrepreneurship in emerging markets

Internationalization and Managing Networks in the Asia Pacific Nipawan Thirawat, 2017-03-02

Internationalization and Managing Networks in the Asia Pacific consists of theories and analysis in sections that are related to network management, the power of business networking and the significance and role that business networking plays in propelling organizations towards international business, especially in Asia. Moreover, it includes stakeholder theory and applications of relevant theories to assist in identifying key stakeholders in the ASEAN Economic Community (AEC). The first section contains various fascinating headings, such as analysis of stakeholders' needs, negotiation techniques with stakeholders, relationship management with stakeholders and the role of network management in expanding international business within Asia. The second section emphasizes internationalization theories and empirical evidence with case studies of Asian multinational companies that have succeeded in expanding abroad, such as Singaporean, Taiwanese, Thai, Malaysian and Indonesian companies. These help provide guidelines of analysis for the adaptations these companies made to internationalize successfully, market penetration strategies used for the AEC and international expansion of Asian companies across countries in Asia and other continents. In addition, an included debate provides information on the applications of business networking and internationalization theories, best practices and development policy recommendations, along with a discussion of the role of the public sector in supporting overseas expansion of the private sector. Consists of two interesting and important

topics about network management and internationalization Focuses on the role of Asian companies, including international activities Includes case studies and empirical evidence from works by researchers and experts on network management and international business expansion Provides policy advice to the public sectors within Asia on formulating and implementing policies Offers insight into the role of the public sector in supporting international business activities of the private sector

Managing the Internationalization Process (Routledge Revivals) Mats Forsgren, 2015-06-11 Few nations have internationalized their business operations as successfully as the Swedes. This book, first published in 1989, looks at the process in detail, examining the international operations of Swedish firms since 1970, including acquisitions of foreign firms. The international dimension of business is becoming increasingly important for firms of all sizes, and this analysis of what happens when companies enter and then sustain a presence in the international arena will be of great value to students and teachers of international business and management.

Knowledge, Networks and Power U. Holm, M. Forsgren, J. Johanson, 2015-05-12 This book presents more than four decades of research in international business at the Department of Business Studies, Uppsala University. Gradually, this research has been recognized as 'The Uppsala School'. The work in Uppsala over the years reflects a broad palette of issues and approaches.
