Countering Terrorism and WMD Peter Katona, Michael D. Intriligator, John P. Sullivan, 2007-01-24 This volume shows us that in order to deal with today's Fourth Generation asymmetric warfare by terrorist groups using conventional arms and weapons of mass destruction, we need a new 'global networked' approach. The contributors examine the various attempts that have been made to counter the latest wave of terrorism, including the US strikes against Afghanistan and Iraq, President George W. Bush's declaration of a 'war against terrorism', the creation of the US Department of Homeland Security, and the 9/11 Commission. Drawing from our experience with 'Terrorism Early Warning' and the co-production of counter-terrorism intelligence, this book explains the need for such a network and shows how it could be formed. It compiles the opinions of experts from clinical medicine, public policy, law enforcement and the military. These expert contributors identify the nature of a global counter-terrorism network, show how it could be created, and provide clear guidelines for gauging its future effectiveness. This book will be of great interest to all students of terrorism studies, US national security, international relations, and political science in general.

Network Algorithmics George Varghese, Jun Xu, 2022-11-11 *Network Algorithmics: An Interdisciplinary Approach to Designing Fast Networked Devices*, Second Edition takes an interdisciplinary approach to applying principles for efficient implementation of network devices, offering solutions to the problem of network implementation bottlenecks. In designing a network device, there are dozens of decisions that affect the speed with which it will perform - sometimes for better, but sometimes for worse. The book provides a complete and coherent methodology for maximizing speed while meeting network design goals. The book is uniquely focused on the seamless integration of data structures, algorithms, operating systems and hardware/software co-designs for high-performance routers/switches and network end systems. Thoroughly updated based on courses taught by the authors over the past decade, the book lays out the bottlenecks most often encountered at four disparate levels of implementation: protocol, OS, hardware and architecture. It then develops fifteen principles key to breaking these bottlenecks, systematically applying them to bottlenecks found in end-nodes, interconnect devices and specialty functions located along the network. Later sections discuss the inherent challenges of modern cloud computing and data center networking. Offers techniques that address common bottlenecks of interconnect devices, including routers, bridges, gateways, endnodes, and Web servers Presents many practical algorithmic concepts that students and readers can work with immediately Revised and updated throughout to discuss the latest developments from authors' courses, including measurement algorithmics, randomization, regular expression matching, and software-defined networking Includes a new, rich set of homework exercises and exam questions to facilitate classroom use

Equitable Access Olivia Adwoa Tiwaah Frimpong Kwabong,2010 Concerns about new learning environments have spurred the debate as to whether the new world of online teaching and virtual studying might be as closed to the developing world, especially the women, as the traditional universities were until the turn of the twentieth century. Gender specific and feminist research shows that women often have less access to technology, less control over the ICT (Information and Communication Technology) in their homes and places of work, and less confidence and competency in using these technologies. According to the United Nations, lack of access to information is the third most important issue facing women globally, after poverty and violence against women. Equitable Access looks in detail at the ODL (Online Distance Learning) and ICT situations in Ghana. The author provides a critical assessment of the strengths and threats to the development of an effective distance education program in tertiary institutions in Ghana, surfacing the need to promote equity in educational access. Based on a survey of distance learners in four public

universities, the author navigates to the heart of issues and determines that in Ghana and for that matter Africa, the digital and gender divides could further widen if conscious effort is not made to mainstream ICT in all gender issues.

Internet Access in Vehicular Networks Wenchao Xu,Haibo Zhou,Xuemin (Sherman) Shen,2021-11-18 This book introduces the Internet access for vehicles as well as novel communication and computing paradigms based on the Internet of vehicles. To enable efficient and reliable Internet connection for mobile vehicle users, this book first introduces analytical modelling methods for the practical vehicle-to-roadside (V2R) Internet access procedure, and employ the interworking of V2R and vehicle-to-vehicle (V2V) to improve the network performance for a variety of automotive applications. In addition, the wireless link performance between a vehicle and an Internet access station is investigated, and a machine learning based algorithm is proposed to improve the link throughout by selecting an efficient modulation and coding scheme. This book also investigates the distributed machine learning algorithms over the Internet access of vehicles. A novel broadcasting scheme is designed to intelligently adjust the training users that are involved in the iteration rounds for an asynchronous federated learning scheme, which is shown to greatly improve the training efficiency. This book conducts the fully asynchronous machine learning evaluations among vehicle users that can utilize the opportunistic V2R communication to train machine learning models. Researchers and advanced-level students who focus on vehicular networks, industrial entities for internet of vehicles providers, government agencies target on transportation system and road management will find this book useful as reference. Network device manufacturers and network operators will also want to purchase this book.

Advances in Information and Communication Technologies for Adapting Agriculture to Climate Change II Juan Carlos Corrales,Plamen Angelov,José Antonio Iglesias,2018-11-20 This book presents novel communication technology solutions to address the effects of climate change and climate variability on agriculture, with a particular focus on those that increase agricultural production. It discusses decision support and early warning systems for agriculture; information technology (IT) supporting sustainable water management and land cover dynamics; predictive of crop production models; and software applications for reducing the effects of diseases and pests on crops. Further topics include the real-time monitoring of weather conditions and water quality, as well as food security issues. Featuring the proceedings of the International Conference of ICT for Adapting Agriculture to Climate Change (AACC'18), held on November 21-23, 2018, in Cali, Colombia, the book represents a timely report and a source of new ideas and solutions for both researchers and practitioners active in the agricultural sector around the globe.

Protecting National Security Phil Glover,2021-07-27 This book contends that modern concerns surrounding the UK State's investigation of communications (and, more recently, data), whether at rest or in transit, are in fact nothing new. It evidences how, whether using common law, the Royal Prerogative, or statutes to provide a lawful basis for a state practice traceable to at least 1324, the underlying policy rationale has always been that first publicly articulated in Cromwell's initial Postage Act 1657, namely the protection of British 'national security', broadly construed. It further illustrates how developments in communications technology led to Executive assumptions of relevant investigatory powers, administered in conditions of relative secrecy. In demonstrating the key role played throughout history by communications service providers, the book also charts how the evolution of the UK Intelligence Community, entry into the 'UKUSA' communications intelligence-sharing agreement 1946, and intelligence

community advocacy all significantly influenced the era of arguably disingenuous statutory governance of communications investigation between 1984 and 2016. The book illustrates how the 2013 ‘Intelligence Shock’ triggered by publication of Edward Snowden’s unauthorized disclosures impelled a transition from Executive secrecy and statutory disingenuousness to a more consultative, candid Executive and a policy of ‘transparent secrecy’, now reflected in the Investigatory Powers Act 2016. What the book ultimately demonstrates is that this latest comprehensive statute, whilst welcome for its candour, represents only the latest manifestation of the British state’s policy of ensuring protection of national security by granting powers enabling investigative access to communications and data, in transit or at rest, irrespective of location.

Making IT Count Nancy Olson,Leslie Willcocks,Peter Petherbridge,2013-06-17 'Making IT Count: from strategy to implementation' focuses on the practical elements of delivering Information Technology strategy. Studies regularly show that over half of Information Technology strategies are never implemented, or are unsuccessful in delivering the desired results, and that a significant percentage of strategies implemented were never in the original plans. The linkage between strategy development and delivery needs a very clear focus; this is the key topic that the authors address. The book highlights eight major fallacies in managing IT, and eighteen better practices. It then details how to draw up strategy, instigate navigation techniques and make sourcing decisions. Change and delivery are a major focus, as is infrastructure development. Caselets and full length case studies of organizations such as General Electric, Siemens, Colonial Mutual, Charles Schwab, Macquarie Bank, ICI, United Airlines, Norwich Union, Walgreens and Dell and have been included to show how strategies have been successfully implemented and managed.
