Technology Application in the Tourism and Hospitality Industry of Bangladesh Azizul Hassan,2021-10-06 The tourism and hospitality industry of Bangladesh as a South Asian country has potential. Sustainable development of this industry in this country is on the move. Still, there are some hindrances which appear to be stymieing this industry's overall development potential. Overcoming such hindrances can be partly enabled by applying digital innovation and introducing more Internet based platforms in the country's tourism and hospitality industry. The country is believed to have emphasized innovative technology application in this industry, but technology applications in this industry in Bangladesh have so far attracted very few researchers, resulting in insufficient contributions and very limited knowledge. This book, therefore, can make a significant contribution towards the very limited knowledge in this identified research area. On the specific ground of technology application in the tourism and hospitality industry, the book covers concepts and context, the present scenario, product and service offers, and an analysis of the roles of public and private institutions. On related issues, the book also covers social media, networking and connectivity; sustainability practices and climate change effects; tourist experiences; developments; and challenges, suggestions, and future research directions. The book is expected to appeal to general readers, as well as researchers with an interest in technology applications in the tourism and hospitality industry. This book is also an essential read for the relevant policy planners and industry professionals.

Challenging Colonial Administrative Behavior in Bangladesh Hasanuzzaman Zaman,2023-10-27 This book studies public policy and administration in Bangladesh. It studies how, despite recording high-levels of corruption persistently, some governments in least developed countries (LDCs) like Bangladesh have achieved impressive online transformation level, through digital, electronic or e-Government implementation. The book investigates the historical and political context, and examines the different policies and strategies adopted by successive governments of Bangladesh for facilitating digital service delivery transformation of traditional, paper-based, circuitous public service delivery processes. It reviews public administration reforms introduced over several decades, and other initiatives launched with the specific objective of improving service delivery management. The volume also contextualizes the new e-Government development initiatives in light of the various approaches such as traditional public administration, new public management, digital era governance, new public governance, and design thinking. Drawing on a host of published and unpublished materials, interviews with senior public officials, academics, representatives of international donor agencies, think tanks and non-governmental organizations, and a survey of more than 400 plus bureaucrats, the book analyzes the progress of digital government in Bangladesh from a soft, behavioral perspective. It will be of great interest to scholars and researchers of public policy and public administration, politics, innovation, and South Asian studies. It will be an essential reading for bureaucrats and government officials, as well as think tanks and NGOs.

ICT as Innovator Between Tourism and Culture Ramos, Célia M.Q.,Quinteiro, Silvia,Gonçalves, Alexandra R.,2021-11-05 Lately, tourists consider their mobile devices as essential accessories for the realization of their trip before, during, and after the visit. Such devices allow them to consult information about points of interest, services, or products in real time. Thus, mobile devices have come to be considered as tools to support decision making regarding the realization of trips. In the digital environment, tourists seek complementary information to consolidate knowledge about the destination, heritage, culture, customs, and traditions that make the visited place unique. Simultaneously, they transform tourist experiences into a memory associated with travel, contribute to the sustainability of local populations, reduce inequalities, and cooperate to improve the quality of life of all involved. ICT as Innovator Between Tourism and Culture differs from others on the same areas because it aims to place the emphasis on and increase the bridge of knowledge between information communications technology (ICT), tourism, and culture, considering ICT as the main driver that creates the development environment and enhances the tourist experience in general. In particular, it is linked to cultural heritage, making it a more sustainable and intelligent tourist destination, taking into account the well-being of the local population and visitors. Covering topics such as destination image, religious tourism, and innovation dynamics, this book is an essential resource for IT consultants, hotel managers, marketers, travel agencies, tour operators, tourism researchers, professors, students, practitioners within the tourism industry, and academicians.

Wireless Communications 3rd Edition Andreas F. Molisch,2022-12-06 Wireless communications is one of the most important modern technologies and is interwoven with all aspects of our daily lives. When we wake up, we check social media, email, and news on our smartphones. Before getting up, we adjust the room temperature through a Bluetooth-connected thermostat. After we leave the house and activate the Wi-Fi security cameras, we order a rideshare on a

phone app that recognizes our location and are driven to a factory where manufacturing robots are connected and controlled via 5G. And that is only the start of the day.... It is thus no wonder that wireless infrastructure, user devices, and networks are among the largest and most critical industries in most countries. As the demands for wireless services constantly increase, so are the requirements for new products, and for engineers that can develop these products and bring them to market. Such engineers need a deep understanding of both the fundamentals that govern the behavior of wireless systems, the current standardized systems implementations, and more recent research developments that will influence the next generation of products. The goal of this book is to help students, researchers, and practicing engineers to acquire, refresh, or update this knowledge. It is designed to lead them from the fundamental principles and building blocks, such as digital modulation, fading, and reuse of spectrum, to more advanced technologies that underly modern wireless systems, such as multicarrier and multiantenna transmission, to a description of the standardized systems dominating 5G cellular, Wi-Fi, and short-range communications, to the cutting-edge research that will form the basis for beyond-5G systems. In brief, the book leads the reader from the fundamentals to beyond 5G--

Cyber Communities in Rural Asia Kavita Karan,2004 This book focuses on the extent to which the Internet is fast penetrating the semi-urban and rural areas of Asia and the ways in which rural communities are accessing and using the Internet. It examines the infrastructure, use, and impact of the Internet at the grassroots level in seven representative South Asian and Southeast Asian countries: Bangladesh, China, India, Indonesia, Laos, the Philippines, and Sri Lanka. These countries are at various stages of development in their attempts to build epistemic societies, bridge the digital divide, and improve access to

services delivered through the Internet for their citizens leading to the gradual development of the cyber communities. The case studies and surveys are supported by secondary data and interviews. The major areas of concern include frequency of access, time spent, and purposes of using the Internet. The problems faced by the citizens, including those of infrastructure, content, and social factors are examined to evaluate how these barriers could be sorted out in the future. The challenges faced by governments in transforming their societies into the epistemic variety and much of the debate and interventions within these countries have been identified and compared, leading to a better understanding of how the Internet can catalyze development in Asia.--BOOK JACKET.
