Free Capital Guy Thomas, 2020-10-13 3rd edition with new foreword by Ian Cassel Wouldn't life be better if you were free of the daily grind - the conventional job and boss - and instead succeeded or failed purely on the merits of your own investment choices? *Free Capital* is a window into this world. Based on a series of interviews, it outlines the investing strategies, wisdom and lifestyles of 12 highly successful private investors. Each of them has accumulated \$1 million or more - in most cases considerably more - mainly from stock market investment. Some have several academic degrees or backgrounds in professional finance; others left school with few qualifications and are entirely self-taught as investors. Some invest most of their money in very few shares and hold them for years at a time; others make dozens of trades every day, and hold them for at most a few hours. Some are inveterate networkers, who spend their day talking to managers at companies in which they invest; for others a share is just a symbol on a screen, and a price chart shows most of what they need to know to make their trading decisions. *Free capital* - money surplus to immediate living expenses - is the raw material with which these investors work. It can also be thought of as their psychological habitat, free from the petty tribulations of office politics. Lastly, *free capital* describes the footloose nature of their assets, which can be quickly redirected towards any type of investment anywhere in the world, without the constraints which institutional investors often face. Although it presents many advanced insights and valuable investment hints, this is not an overly technical book. It offers practical ideas and inspiration, with revealing detail and minimal jargon, making it an

indispensable read for novice and experienced investors alike. *** This third edition of *Free Capital* follows the text of the second edition, published in 2013, with the addition of a new foreword by Ian Cassel. ***

Investing in Movies Joseph N. Cohen, 2021-12-30 In this second edition of

Investing in Movies, industry veteran Joseph N. Cohen provides investors and producers with an analytical framework to assess the opportunities and pitfalls of film investments. The book traces macroeconomic trends and the globalization of the business, including the rise of streamers, as well as the impact these have on potential returns. It offers a broad range of guidelines on how to source interesting projects and advice on what kinds of projects to avoid, as well as numerous ways to maximize risk-adjusted returns. While focusing primarily on investments in independent films, Cohen also provides valuable insights into the studio and independent slate deals that have been marketed to the institutional investment community. As well, this new edition has been updated to fully optimize the current film industry climate including brand new chapters on the Chinese film market, new media/streaming services, and the effects of COVID-19 on the global film market. Written in a detailed and approachable manner, this book is essential for students and aspiring professionals looking to gain an insider perspective against the minefield of film investing.

Investor Financing of Independent Film John W. Cones, 2023-10-12 This book explains how to comply with the federal and states securities regulations when seeking to raise money from private investors for the development, production and/or distribution of a feature or documentary film. Drawing from the experience and expertise of a securities and entertainment attorney who has worked with independent filmmakers for 30 plus years, this resource explores securities law compliance in order to help readers comply with the law and avoid criminal and civil liability, while successfully raising investor funds for their film projects. Readers will gain an understanding of why the securities laws apply to most investor financing transactions, what

choices need to be made by the filmmaker, what information needs to be disclosed to prospective investors, how to comply with the SEC's policy regarding financial projections, what is the appropriate investment vehicle for various forms of investor financing, what limitations are imposed on the use of finders and how to handle the required federal and state notice filings. It is an essential resource for any film student taking a film finance course (or a production course with a film finance component), as well as any independent film producers, entertainment/securities attorneys and film school instructors, who want to be informed about the legal and practical aspects of investor financing of independent films.

The 12% Solution David Carter,2017-10-19 How to make money in stocks? First step: don't trade stocks. In a radical departure from most investment books, a former day trader demonstrates how a simple asset allocation strategy that 'adapts' to changing market conditions has delivered a 12% average annual return over the past 10 years. What does 12% mean? If you're familiar with investing basics, you'll know that figure comes close to doubling the average return of the benchmark S&P 500. It also outperforms 99% of all mutual funds. But what's outperformance without protection? When the S&P 500 crashed in 2008 and lost 37% of its value, this plan actually returned +10.9%. Beat the market with this unique ETF trading system. Beat The Street and build long-term wealth in the stock market with this simple ETF rotation strategy that automates decision making, reduces risk and volatility in your portfolio, and lets you sleep soundly at night without worries of market bears or bursting bubbles. A trading strategy that's not pie-in-the-sky and not just a bunch of theory, but rather a systematic plan employing index fund ETFs and backed up with real numbers. A trading plan that's understandable, repeatable, that works and works simply. Anyone can do this. Whether you're new to stock market investing, or a stock trading veteran grown wary of Wall Street gurus with subpar track records touting the latest hot stock that underperforms the minute you buy it, this will make sense. In easy-to-understand language, you'll discover... The six index fund ETFs that power the strategy, and why. The simple technique for identifying which of those ETFs to buy, and which to sell -- and most importantly, when. How \$5,000 can end up \$1,000,000 in your

retirement portfolio. How to protect your portfolio during market downturns with a simple cash trigger. In short, how to earn an average of 12% annually in the stock market with minimal trading, less volatility, and less risk. Make money trading without obsessing. If you have 20 minutes a month and a computer, you can turn any investment amount into a steadily growing compounding machine that will make you the envy of Mad Money's Jim Cramer and 99% of all mutual fund managers. Make just 2-4 trades one day a month. The strategy tells you what ETFs to buy and what to sell. That's it. Then turn off the computer and go live your life. Start making your 12% today. Scroll to the top of the page and select the Buy Now button.

Shaping the Future of African American Film Monica White Ndounou,2014-04-29
In Hollywood, we hear, it's all about the money. It's a ready explanation for why so few black films get made—no crossover appeal, no promise of a big payoff. But what if the money itself is color-coded? What if the economics that governs film production is so skewed that no film by, about, or for people of color will ever look like a worthy investment unless it follows

specific racial or gender patterns? This, Monica Ndounou shows us, is precisely the case. In a work as revealing about the culture of filmmaking as it is about the distorted economics of African American film, Ndounou clearly traces the insidious connections between history, content, and cash in black films. How does history come into it? Hollywood's reliance on past performance as a measure of potential success virtually guarantees that historically underrepresented, underfunded, and undersold African American films devalue the future prospects of black films. So the cycle continues as it has for nearly a century. Behind the scenes, the numbers are far from neutral. Analyzing the onscreen narratives and off-screen circumstances behind nearly two thousand films featuring African Americans in leading and supporting roles, including such recent productions as Bamboozled, Beloved, and Tyler Perry's Diary of a Mad Black Woman, Ndounou exposes the cultural and racial constraints that limit not just the production but also the expression and creative freedom of black films. Her wide-ranging analysis reaches into questions of literature, language, speech and dialect, film images and narrative, acting, theater and film business practices, production history and financing, and organizational history. By uncovering the ideology behind profit-driven industry practices that reshape narratives by, about, and for people of color, this provocative work brings to light existing limitations—and possibilities for reworking stories and business practices in theater, literature, and film.
