The Story of the Selma Voting Rights Marches in Photographs David Aretha,2014-01-01 The Civil Rights Act of 1964 was a momentous victory for civil rights activists, but one major obstacle remained in the path toward equal rights for African Americans: the right to vote. In the South, segregationists prevented African Americans from voting. Civil rights leaders believed it was time for strong action and chose Selma, Alabama, as the rallying point. There, the marches and protests captured the nation's attention. Through gripping primary source photographs, author David Aretha explores this important time in American history.

High Efficiency Video Coding (HEVC) Vivienne Sze,Madhukar Budagavi,Gary J. Sullivan,2014-08-23 This book provides developers, engineers, researchers and students with detailed knowledge about the High Efficiency Video Coding (HEVC) standard. HEVC is the successor to the widely successful H.264/AVC video compression standard, and it provides around twice as much compression as H.264/AVC for the same level of quality. The applications for HEVC will not only cover the space of the well-known current uses and capabilities of digital video – they will also include the deployment of new services and the delivery of enhanced video quality, such as ultra-high-definition television (UHDTV) and video with higher dynamic range, wider range of representable color, and greater representation precision than what is typically found today. HEVC is the next major generation of video coding design – a flexible, reliable and robust solution that will support the next decade of video applications and ease the burden of video on world-wide network traffic. This book provides a detailed explanation of the various parts of the standard, insight into how it was developed, and in-depth discussion of algorithms and architectures for its implementation.

Rome Sweet Home Kimberly Hahn,Scott Hahn,2009-09-03 The well-known and very popular Catholic couple, Scott and Kimberly Hahn, have been constantly travelling and speaking all over North America for the last few years about their conversion to the Catholic Church. Now these two outstanding Catholic apologists tell in their own words about the incredible spiritual journey that led them to embrace Catholicism. Scott Hahn was a Presbyterian minister, the top student in his seminary class, a brilliant Scripture scholar, and militantly anti-Catholic ... until he reluctantly began to discover that his enemy had all the right answers. Kimberly, also a top-notch theology student in the seminary, is the daughter of a well-known Protestant minister, and went through a tremendous dark night of the soul after Scott converted to Catholicism. Their conversion story and love for the Church has captured the hearts and minds of thousands of lukewarm Catholics and brought them back into an active participation in the Church. They have also influenced countless conversions to Catholicism among their friends and others who have heard their powerful testimony. Written with simplicity, charity, grace and wit, the Hahns' deep love and knowledge of Christ and of Scripture is evident and contagious throughout their story. Their love of truth and of neighbor is equally evident, and their theological focus on the great importance of the family, both biological and spiritual, will be a source of inspiration for all readers.

Implementing CDISC Using SAS Chris Holland,Jack Shostak,2019-05-30 For decades researchers and programmers have used SAS to analyze, summarize, and report clinical trial data. Now Chris Holland and Jack Shostak have updated their popular Implementing CDISC Using SAS, the first comprehensive book on applying clinical research data and metadata to the Clinical Data Interchange Standards Consortium (CDISC) standards. Implementing CDISC Using SAS: An End-to-End Guide, Revised Second Edition, is an all-inclusive guide on how to implement and analyze the Study Data Tabulation Model (SDTM) and the Analysis Data Model (ADaM) data and prepare clinical trial data for regulatory submission. Updated to reflect the 2017 FDA mandate for adherence to CDISC standards, this new edition covers creating and using metadata, developing conversion specifications, implementing and validating SDTM and ADaM data, determining solutions for legacy data conversions, and preparing data for regulatory submission. The book covers products such as Base SAS, SAS Clinical Data Integration, and the SAS Clinical Standards Toolkit, as well as JMP Clinical. Topics included in this edition include an implementation of the Define-XML 2.0 standard, new SDTM domains, validation with Pinnacle 21 software, event narratives in JMP Clinical, SDTM and ADaM metadata spreadsheets, and of course new versions of SAS and JMP software. The second edition was revised to add the latest C-Codes from the most recent release as well as update the make_define macro that accompanies this book in order to add the capability to handle C-Codes. The metadata spreadsheets were updated accordingly. Any manager or user of clinical trial data in this day and age is likely to benefit from knowing how to either put data into a CDISC standard or analyzing and finding data once it is in a CDISC format. If you are one such person--a data manager, clinical and/or statistical programmer, biostatistician, or even a clinician--then this book is for you.

The Little Black Book of Neuropsychology Mike R. Schoenberg,James G. Scott,2011-01-11 From translating the patient's medical records and test results to providing recommendations, the neuropsychological evaluation incorporates the science and practice of neuropsychology, neurology, and psychological sciences. The Little Black Book of Neuropsychology brings the practice and study of neuropsychology into concise step-by-step focus—without skimping on scientific quality. This one-of-a-kind assessment reference complements standard textbooks by outlining signs, symptoms, and complaints according to neuropsychological domain (such as memory, language, or executive function), with descriptions of possible deficits involved, inpatient and outpatient assessment methods, and possible etiologies. Additional chapters offer a more traditional approach to evaluation, discussing specific neurological disorders and diseases in terms of their clinical features, neuroanatomical correlates, and assessment and treatment considerations. Chapters in psychometrics provide for initial understanding of brain-behavior interpretation as well as more advanced principals for neuropsychology practice including new diagnostic concepts and analysis of change in performance over time. For the trainee, beginning clinician or seasoned expert, this user-friendly presentation incorporating 'quick reference guides' throughout which will add to the practice armentarium of beginning and seasoned clinicians alike. Key features of The Black Book of Neuropsychology: Concise framework for understanding the neuropsychological referral. Symptoms/syndromes presented in a handy outline format, with dozens of charts and tables. Review of basic neurobehavioral examination procedure. Attention to professional issues, including advances in psychometrics and diagnoses, including tables for reliable change for many commonly used tests. Special "Writing Reports like You Mean It" section and guidelines for answering referral questions. Includes appendices of practical information, including neuropsychological formulary. The Little Black Book of Neuropsychology is an indispensable resource for the range of practitioners and scientists interested in brain-behavior relationships. Particular emphasis is provided for trainees in neuropsychology and neuropsychologists. However, the easy to use format and concise presentation is likely to be of particular value to interns, residents, and fellows studying neurology, neurological surgery, psychiatry, and nurses. Finally, teachers of neuropsychological and neurological assessment may also find this book useful as a classroom text. There is no other book in the field that covers the scope of material that is inside this comprehensive text. The work might be best summed up as being a clinical neuropsychology postdoctoral residency in a book, with the most up to date information available, so that it is also an indispensable book for practicing neuropsychologists in addition to students and residents...There is really no book like this available today. It skillfully brings together the most important foundations of clinical neuropsychology with the 'nuts and bolts' of every facet of assessment. It also reminds the more weathered neuropsychologists among us of the essential value of neuropsychological

assessment...the impact of the disease on the patient's cognitive functioning and behavior may only be objectively quantified through a neuropsychological assessment. Arch Clin Neuropsychol (2011) first published online June 13, 2011 Read the full review acn.oxfordjournals.org

Counterpoints Anti-Eviction Mapping Project,2021-08-03 Counterpoints: A San Francisco Bay Area Atlas of Displacement and Resistance brings together cartography, essays, illustrations, poetry, and more in order to depict gentrification and resistance struggles from across the San Francisco Bay Area and act as a roadmap to counter-hegemonic knowledge making and activism. Compiled by the Anti-Eviction Mapping Project, each chapter reflects different frameworks for understanding the Bay Area's ongoing urban upheaval, including: evictions and root shock, indigenous geographies, health and environmental racism, state violence, transportation and infrastructure, migration and relocation, and speculative futures. By weaving these themes together, Counterpoints expands normative urban-studies framings of gentrification to consider more complex, regional, historically grounded, and entangled horizons for understanding the present. Understanding the tech boom and its effects means looking beyond San Francisco's borders to consider the region as a socially, economically, and politically interconnected whole and reckoning with the area's deep history of displacement, going back to its first moments of settler colonialism. Counterpoints combines work from within the project with contributions from community partners, from longtime community members who have been fighting multiple waves of racial dispossession to elementary school youth envisioning decolonial futures. In this way, Counterpoints is a collaborative, co-created atlas aimed at expanding knowledge on displacement and resistance in the Bay Area with, rather than for or about, those most impacted.

The Complete Father Brown Stories G K Chesterton,2012-04-05 The complete adventures of the well-loved clerical sleuth, collected in one brilliant volume. Shabby and lumbering, with a face like a Norfolk dumpling, Father Brown makes for an improbable super-sleuth. But his innocence is the secret of his success: refusing the scientific method of detection, he adopts instead an approach of simple sympathy, interpreting each crime as a work of art, and each criminal as a man no worse than himself. This complete edition brings together all of the Father Brown stories, including two not previously available in Penguin: 'The Donnington Affair', in which Chesterton rises to the challenge of solving a murder-mystery half written by someone else (Max Pemberton), and 'The Mask of Midas', which was found in Chesterton's papers after his death. It also includes an introduction and notes by Michael D. Hurley. G.K. Chesterton was born in 1874. He attended the Slade School of Art, where he appears to have suffered a nervous breakdown, before turning his hand to journalism. A prolific writer throughout his life, his best-known books include The Napoleon of Notting Hill (1904), The Man Who Knew Too Much(1922), The Man Who Was Thursday (1908) and the Father Brown stories. Chesterton converted to Roman Catholicism in 1922 and died in 1938. Michael D. Hurley is a Lecturer in English at the University of Cambridge, and a Fellow of St Catharine's College. He has written widely on English literature from the nineteenth century to the present day, with an emphasis on poetry and poetics. His book on G. K. Chesterton was published in 2011.
