**Application Development for IBM CICS Web Services** O'Grady James, Ian Burnett, Jim Harrison, San Yong Liu, Xue Yong Zhang, IBM Redbooks, 2015-01-27 This IBM® Redbooks® publication focuses on developing Web service applications in IBM CICS®. It takes the broad view of developing and modernizing CICS applications for XML, Web services, SOAP, and SOA support, and lays out a reference architecture for developing these kinds of applications. We start by discussing Web services in general, then review how CICS implements Web services. We offer an overview of different development approaches: bottom-up, top-down, and meet-in-the-middle. We then look at how you would go about exposing a CICS application as a Web service provider, again looking at the different approaches. The book then steps through the process of creating a CICS Web service requester. We follow this by looking at CICS application aggregation (including 3270 applications) with IBM Rational® Application Developer for IBM System z® and how to implement CICS Web Services using CICS Cloud technology. The first part is concluded with hints and tips to help you when implementing this technology. Part two of this publication provides performance figures for a basic Web service. We investigate some common variables and examine their effects on the performance of CICS as both a requester and provider of Web services.

Your success story begins with the Whole30®, Dallas and Melissa Hartwig's powerful 30-day nutritional reset. More significant, many people have reported the “magical” elimination of a variety of symptoms, diseases, and conditions in just 30 days, such as those associated with diabetes, high cholesterol, high blood pressure, obesity, acne, eczema, psoriasis, chronic fatigue, asthma, sinus infections, allergies, migraines, acid reflux, Crohn's, celiac disease, IBS, bipolar disorder, depression, Lyme disease, endometriosis, PCOS, autism, fibromyalgia, ADHD, hypothyroidism, arthritis, and multiple sclerosis. It Starts With Food reveals how specific foods may be having negative effects on how you look, feel, and live—in ways that you'd never associate with your diet. More important, they outline their lifelong strategy for eating Good Food in one clear and detailed action plan designed to help you create a healthy metabolism, heal your digestive tract, calm systemic inflammation, and put an end to unhealthy cravings, habits, and relationships with food. Infused with the Hartwigs' signature wit, tough love, and common sense, It Starts With Food is based on the latest scientific research and real-life experience, and includes testimonials, a detailed shopping guide, a meal-planning template, a Meal

**Applied Demography for Biologists** James R. Carey, 1993-02-04 This is the first book to comprehensively apply the fundamental tools and concepts of demography to a nonhuman species. It provides clear and concise treatment of standard demographic techniques such as life table analysis and population projection; introduces models that have seldom appeared outside of the demographic literature including the multiple decrement life table, the intrinsic sex ratio, and multiregional demography; and addresses demographic problems that are unique to nonhuman organisms such as the demographic theory of social insects and harvesting techniques applied to insect mass rearing. The book also contains a synthesis of fundamental properties of population such as momentum and convergence to the stable age distribution, with a section on the unity of demographic models, and appendices detailing analytical methods used to quantify and model the data gathered in a groundbreaking study on the mortality experience of 1.2 million medflies. Based on an insect demography course at the University of California, Davis, the book is intended for practicing entomologists, population biologists, and ecologists for use in research or as a graduate text.

**Earth Observation Science and Applications for Risk Reduction and Enhanced Resilience in Hindu Kush Himalaya Region** Birendra Bajracharya, Rajesh Bahadur Thapa, Mir A. Matin, 2021-08-14 This open access book is a consolidation of lessons learnt and experiences gathered from our efforts to utilise Earth observation (EO) science and applications to address environmental challenges in the Hindu Kush Himalayan region. It includes a complete package of knowledge on service life cycles including multi-disciplinary topics and practically tested applications for the HKH. It comprises 19 chapters drawing from a decade's worth of experience gleaned over the course of our implementation of SERVIR-HKH - a joint initiative of NASA, USAID, and ICIMOD - to build capacity on using EO and geospatial technology for effective decision making in the region. The book highlights SERVIR's approaches to the design and delivery of information services - in agriculture and food security; land cover and land use change, and ecosystems; water resources and hydro-climatic disasters; and weather and climate services. It also touches upon multidisciplinary topics such as service planning; gender integration; user engagement; capacity building; communication; and monitoring, evaluation, and learning. We hope that this book will be a good reference document for professionals and practitioners working in remote sensing, geographic information systems, regional and spatial sciences, climate change, ecosystems, and environmental analysis. Furthermore, we are hopeful that policymakers, academics, and other informed audiences working in sustainable development and evaluation - beyond the wider SERVIR network and well as within it - will greatly benefit from what we share here on our applications, case studies, and documentation across cross-cutting topics.

**Insect Hearing** Gerald S. Pollack, Andrew C. Mason, Arthur N Popper, Richard R Fay, 2016-06-06 Insect Hearing provides a broadly based view of the functions, mechanisms, and evolution of hearing in insects. With a single exception, the chapters focus on problems of hearing and their solutions, rather than being focused on particular taxa. The exception, hearing in *Drosophila*, is justified because, due to its ever growing toolbox of genetic and optical techniques, *Drosophila* is rapidly becoming one of the most important model systems in neurobiology, including the neurobiology of hearing. Auditory systems, whether insectan or vertebrate, must perform a number of basic tasks: capturing mechanical stimuli and transducing these into neural activity, representing the timing and frequency of sound signals, distinguishing between behaviorally relevant signals and other sounds and localizing sound sources. Studying how these are accomplished in insects offers a valuable comparative view that helps to reveal general principles of auditory function.

**Design for Augmentation, Not Automation** Amin Bashi, 2020-07-24 Product and Design Leaders who consistently design and build great products over time are said to have great product sense. Product sense is simply the ability to consistently design and build for value. More than ever, Artificial Intelligence needs product sense. AI cannot figure out what problems to solve. If as Product and Design Leaders, we are not aligned with a human need, we build a very powerful system to address a very small -- or perhaps nonexistent -- problem. We have a unique and tremendous opportunity to shape a more humanist and inclusive world in concert with AI, and it starts by remembering our roots: finding and addressing real human needs, upholding human values, and designing for augmentation, not automation.

**High Efficiency Video Coding (HEVC)** Vivienne Sze, Madhukar Budagavi, Gary J. Sullivan, 2014-08-23 This book provides developers, engineers, researchers and students with detailed knowledge about the High Efficiency Video Coding (HEVC) standard. HEVC is the successor to the widely successful H.264/AVC video compression standard, and it provides around twice as much compression as H.264/AVC for the same level of quality. The applications for HEVC will not only cover the space of the well-known current uses and capabilities of digital video - they will also include the deployment of new services and the delivery of enhanced video quality, such as ultra-high-definition television (UHDTV) and video with higher dynamic range, wider range of

representable color, and greater representation precision than what is typically found today. HEVC is the next major generation of video coding design – a flexible, reliable and robust solution that will support the next decade of video applications and ease the burden of video on world-wide network traffic. This book provides a detailed explanation of the various parts of the standard, insight into how it was developed, and in-depth discussion of algorithms and architectures for its implementation.
