Python for Finance Yves Hilpisch, 2018-12-05 The financial industry has recently adopted Python at a tremendous rate, with some of the largest investment banks and hedge funds using it to build core trading and risk management systems. Updated for Python 3, the second edition of this hands-on book helps you get started with the language, guiding developers and quantitative analysts through Python libraries and tools for building financial applications and interactive financial analytics. Using practical examples throughout the book, author Yves Hilpisch also shows you how to develop a full-fledged framework for Monte Carlo simulation-based derivatives and risk analytics, based on a large, realistic case study. Much of the book uses interactive IPython Notebooks.

Understanding the Global Energy Crisis Richard A. Simmons, Eugene D. Coyle, 2014-03-15 We are facing a global energy crisis caused by world population growth, an escalating increase in demand, and continued dependence on fossil-based fuels for generation. It is widely accepted that increases in greenhouse gas concentration levels, if not reversed, will result in major changes to world climate with consequential effects on our society and economy. This is just the kind of intractable problem that Purdue University's Global Policy Research Institute seeks to address in the Purdue Studies in Public Policy series by promoting the engagement between policy makers and experts in fields such as engineering and technology. Major steps forward in the development and use of technology are required. In order to achieve solutions of the required scale and magnitude within a limited timeline, it is essential that engineers be not only technologically-adept but also aware of the wider social and political issues that policy-makers face. Likewise, it is also imperative that policy makers liaise closely with the academic community in order to realize advances. This book is designed to bridge the gap between these two groups, with a particular emphasis on educating the socially-conscious engineers and technologists of the future. In this accessibly-written volume, central issues in global energy are discussed through interdisciplinary dialogue between experts from both North America and Europe. The first section provides an overview of the nature of the global energy crisis approached from historical, political, and sociocultural perspectives. In the second section, expert contributors outline the technology and policy issues facing the development of major conventional and renewable energy sources. The third and final section explores policy and technology challenges and opportunities in the distribution and consumption of energy, in sectors such as transportation and the built environment. The book's epilogue suggests some future scenarios in energy distribution and use.

Project Management in Practice Samuel J. Mantel, 2011 Project Management in Practice, 4th Edition focuses on the technical aspects of project management that are directly related to practice.

Emerging Topics and Controversies in Neonatology Elaine M. Boyle, Jonathan Cusack, 2020-02-05 This textbook addresses the themes that are at the forefront of neonatal clinical care and research, based on natural divisions in care during pregnancy, and postnatally by gestational age at birth. The book offers a unique approach, in that it proposes discussion of important general principles underpinning neonatal care that are not addressed in most general neonatology textbooks, such as ethical issues, counselling, effective training methods, quality and safety, among other subjects. These are fundamental aspects and challenges that need to be appreciated by senior clinicians. A chapter authored by parents describing their perspectives of neonatal intensive care is unique and will be highly educational, with the potential to influence the way in which individuals view and deliver neonatal care. The authors discuss common and important conditions, to promote adoption of sound evidenced based practice where this is available. However, where evidence is limited, as is the case in many areas of neonatal practice, the authors aim to encourage critical thinking and evidence appraisal, which are necessary skills for busy clinicians wishing to filter evidence to guide delivery of care. This text is suitable for senior trainees wishing to pursue a career in neonatal medicine, early career neonatologists and paediatricians with an interest in neonatology. It is also of interest to established neonatologists wishing to update their neonatal knowledge. The content is based on the RCPCH Level 3 curriculum, and addresses important topical and/or controversial aspects of neonatal care.

Introductory Relational Database Design for Business, with Microsoft Access Jonathan Eckstein, Bonnie R. Schultz, 2018-01-16 A hands-on beginner's guide to designing relational databases and managing data using Microsoft Access Relational databases represent one of the most enduring and pervasive forms of information technology. Yet most texts covering relational database design assume an extensive, sophisticated computer science background. There are texts on relational database software tools like Microsoft Access that assume less background, but they focus primarily on details of the user interface, with inadequate coverage of the underlying design issues of how to structure databases. Growing out of Professor Jonathan Eckstein's twenty years' experience teaching courses on management information systems (MIS) at Rutgers Business School, this book fills this gap in the literature by providing a rigorous introduction to relational databases for readers without prior computer science or programming experience. Relational Database Design for Business, with Microsoft Access helps readers to quickly develop a thorough, practical understanding of relational database design. It takes a step-by-step, real-world approach, using application examples from business and finance every step the way. As a result, readers learn to think concretely about database design and how to address issues that commonly arise when developing and manipulating relational databases. By the time they finish the final chapter, students will have the knowledge and skills needed to build relational databases with dozens of tables. They will also be able to build complete Microsoft Access applications around such databases. This text: Takes a hands-on approach using numerous real-world examples drawn from the worlds of business, finance, and more Gets readers up and running, fast, with the skills they need to use and develop relational databases with Microsoft Access Moves swiftly from conceptual fundamentals to advanced design techniques Leads readers step-by-step through data management and design, relational database theory, multiple tables and the possible relationships between them, Microsoft Access features such as forms and navigation, formulating queries in SQL, and normalization Introductory Relational Database Design for Business, with Microsoft Access is the definitive guide for undergraduate and graduate students in business, finance, and data analysis without prior experience in database design. While Microsoft Access is its primary "hands-on" learning vehicle, most of the skills in this text are transferrable to other relational database software such as MySQL.

The Wind Power Book Jack Park, 1981 Covers basics of wind-electric systems, water-pumping windmills, and a wind furnace. Focuses on how to build appropriate windmills in many different situations, on all kinds of sites.

Oracle High Availability, Disaster Recovery, and Cloud Services YV Ravi Kumar, Nassyam Basha, Krishna Kumar K M, Bal Mukund Sharma, Konstantin Kerekovski, 2019-05-16 Work with Oracle database's high-availability and disaster-management technologies. This book covers all the Oracle high-availability technologies in one place and also discusses how you configure them in engineered systems and cloud services. You will see that when you say your database is healthy, it is not limited to whether the database is performing well on day-to-day operations; rather it should also be robust and free from disasters. As a result, your database will be capable of handling unforeseen incidents and recovering from disaster with very minimal or zero downtime. Oracle High Availability, Disaster Recovery, and Cloud Services explores all the high-availability features of Oracle database, how to configure them, and best practices. After you have read this book you will have mastered database high-availability concepts such as RAC, Data Guard, OEM 13c, and engineered systems (Oracle Exadata x6/x7 and Oracle Database Appliance). What You Will Learn Master the best practices and features of Exadata and ODA Implement and monitor high availability with OEM 13c Clone databases

Cyberdeterrence and Cyberwar Martin C. Libicki, 2009-09-22 Cyberspace, where information--and hence serious value--is stored and manipulated, is a tempting target. An attacker could be a person, group, or state and may disrupt or corrupt the systems from which cyberspace is built. When states are involved, it is tempting to compare fights to warfare, but there are important differences. The author addresses these differences and ways the United States protect itself in the face of attack.

Evidence-Based Treatments for Trauma Related Disorders in Children and Adolescents Markus A. Landolt, Marylène Cloitre, Ulrich Schnyder, 2018-07-15 This handbook presents the current evidence-based psychological treatments for trauma related disorders in childhood and adolescence and in addition provides clearly structured, up-to-date information on the basic principles of traumatic stress research and practice in that age group, covering epidemiology, developmental issues, pathogenetic models, diagnostics, and assessment. Each of the chapters on treatment, which form the core of the book, begins with a summary of the theoretical underpinnings of the approach, followed by a case presentation illustrating the treatment protocol session by session, an analysis of special challenges typically encountered in implementing this treatment, and an overview of the current evidence base for the treatment approach. A special section considers modern treatments in particular settings, such as schools, hospitals, and juvenile justice systems, and the concluding chapters provide an integrative discussion on how to treat traumatized children and adolescents and an outlook. The book will be invaluable for clinical child and adolescent psychologists, child and adolescent psychiatrists, psychotherapists, and other mental health professionals working with traumatized children and adolescents.

Agents and Multi-Agent Systems: Technologies and Applications 2020 G. Jezic, J. Chen-Burger, M. Kusek, R. Sperka, Robert J. Howlett, Lakhmi C. Jain, 2021-05-22 The book highlights new trends and challenges in research on agents and the new digital and knowledge economy. It includes papers on business process management, agent-based modeling and simulation and anthropic-oriented computing that were originally presented at the 14th International KES Conference on Agents and Multi-Agent Systems: Technologies and Applications (KES-AMSTA 2020), being held as a Virtual Conference in June 17-19, 2020. The respective papers cover topics such as software agents, multi-agent systems, agent modeling, mobile and cloud computing, big data analysis, business intelligence, artificial intelligence, social systems, computer embedded systems and nature inspired manufacturing, all of which contribute to the modern digital economy.

Human Factors in Aviation Eduardo Salas, Florian Jentsch, Dan Maurino, 2010-01-30 This edited textbook is a fully updated and expanded version of the highly successful first edition of Human Factors in Aviation. Written for the widespread aviation community - students, engineers, scientists, pilots, managers, government personnel, etc., HFA offers a comprehensive overview of the topic, taking readers from the general to the specific, first covering broad issues, then the more specific topics of pilot performance, human factors in aircraft design, and vehicles and systems. The new editors offer essential breath of experience on aviation human factors from multiple perspectives (i.e. scientific research, regulation, funding agencies, technology, and implementation) as well as knowledge about the science. The contributors are experts in their fields. Topics carried over from the first edition are fully updated, several by new authors who are now at the fore of the field. New material - which represents 50% of the volume - focuses on the challenges facing aviation specialists today. One of the most significant developments in this decade has been NextGen, the Federal Aviation Administration's plan to modernize national airspace and to address the impact of air traffic growth by increasing airspace capacity and efficiency while simultaneously improving safety, environmental impacts and user access. NextGen issues are covered in full. Other new topics include: High Reliability Organizational Perspective, Situation Awareness & Workload in Aviation, Human Error Analysis, Human-System Risk Management, LOSA, NOSS and Unmanned Aircraft System. Comprehensive text with up-to-date

synthesis of primary source material that does not need to be supplemented New edition thoroughly updated with 50% new material and full coverage of NexGen and other modern issues Instructor website with test bank and image collection makes this the only text offering ancillary support Liberal use of case examples exposes readers to real-world examples of dangers and solutions

Stamped (for Kids) Jason Reynolds,Ibram X. Kendi,2024-04-09 The #1 New York Times bestseller! This chapter book edition of the #1 New York Times bestseller by luminaries Ibram X. Kendi and Jason Reynolds is an essential introduction to the history of racism and antiracism in America RACE. Uh-oh. The R-word. But actually talking about race is one of the most important things to learn how to do. Adapted from the groundbreaking bestseller Stamped: Racism, Antiracism, and You, this book takes readers on a journey from present to past and back again. Kids will discover where racist ideas came from, identify how they impact America today, and meet those who have fought racism with antiracism. Along the way, they'll learn how to identify and stamp out racist thoughts in their own lives. Ibram X. Kendi's research, Jason Reynolds's and Sonja Cherry-Paul's writing, and Rachelle Baker's art come together in this vital read, enhanced with a glossary, timeline, and more.
