**Digital Activism Decoded** Mary C. Joyce,2010 The media has recently been abuzz with cases of citizens around the world using digital technologies to push for social and political change: from the use of Twitter to amplify protests in Iran and Moldova to the thousands of American non-profits creating Facebook accounts in the hopes of luring supporters. These stories have been published, discussed, extolled, and derided, but have not yet been viewed holistically as a new field of human endeavor. We call this field digital activism and its dynamics, practices, misconceptions, and possible futures are presented together for the first time in this book.--Pub. desc.

**Solidarity in Biomedicine and Beyond** Barbara Prainsack,Alena Buyx,2017-01-19 In times of global economic and political crises, the notion of solidarity is gaining new currency. This book argues that a solidarity-based perspective can help us to find new ways to address pressing problems. Exemplified by three case studies from the field of biomedicine: databases for health and disease research, personalised healthcare, and organ donation, it explores how solidarity can make a difference in how we frame problems, and in the policy solutions that we can offer.

This is a step-by-step guide that walks you through the whole process of how to escalate privilege in Windows environment using many common techniques. **Affective Health and Masculinities in South Africa** Hans Reihling,2020-04-03 Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity

that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

**The Ha-Ha** Dave King,2005-01-01 Howard Kapostash has not spoken in thirty years. The small repertory of gestures and simple sounds that he uses to communicate lead most people to assume he is disturbed. No one understands that Howard is still the same man he was before his tragic injury. But when he agrees to help an old girlfriend by opening his home to her nine-year-old son, the presence of this nervous, resourceful boy in his life transforms Howard utterly.
