<u>Discourses of (De)Legitimization</u> Andrew S. Ross,Damian J. Rivers,2018-10-17 This volume provides a comprehensive analysis of the ways in which digital communication facilitate and inform discourses of legitimization and delegitimization in contemporary participatory cultures. The book draws on multiple theoretical traditions from critical discourse analysis to allow for a greater critical engagement of the ways in which values are either justified or criticized on social media platforms across a variety of social milieus, including the personal, political, religious, corporate, and commercial. The volume highlights data from across ten national contexts and a range of online platforms to demonstrate how these discursive practices manifest themselves differently across a range of settings. Taken together, the seventeen chapters in this book offer a more informed understanding of how these discursive spaces help us to interpret the manner in which digital communication can be used to legitimize or delegitimize, making this book an ideal resource for students and scholars in discourse analysis, sociolinguistics, new media, and media production.

Dying for an iPhone Jenny Chan,Mark Selden,Ngai Pun,2020-06-02 Suicides, excessive overtime, and hostility and violence on the factory floor in China. Drawing on vivid testimonies from rural migrant workers, student interns, managers and trade union staff, Dying for an iPhone is a devastating expose of two of the world's most powerful companies: Foxconn and Apple. As the leading manufacturer of iPhones, iPads, and Kindles, and employing one million workers in China alone, Taiwanese-invested Foxconn's drive to dominate global electronics manufacturing has aligned perfectly with China's goal of becoming the world leader in technology. This book reveals the human cost of that ambition and what our demands for the newest and best technology means for workers. Foxconn workers have repeatedly demonstrated their power to strike at key nodes of transnational production, challenge management and the Chinese state, and confront global tech behemoths. Dying for an iPhone allows us to assess the impact of global capitalism's deepening crisis on
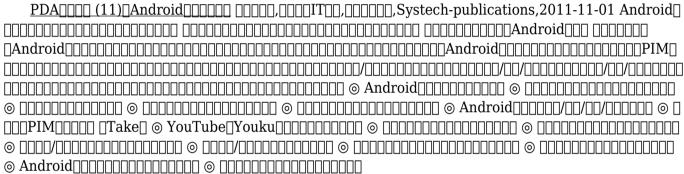

workers.'
