Does What You Export Matter? Daniel Lederman,William Maloney,2012-06-18 Does what economies export matter for development? If so, can industrial policies improve on the export basket generated by the market? This book approaches these questions from a variety of conceptual and policy viewpoints. Reviewing the theoretical arguments in favor of industrial policies, the authors first ask whether existing indicators allow policy makers to identify growth-promoting sectors with confidence. To this end, they assess, and ultimately cast doubt upon, the reliability of many popular indicators advocated by proponents of industrial policy. Second, and central to their critique, the authors document extraordinary differences in the performance of countries exporting seemingly identical products, be they natural resources or 'high-tech' goods. Further, they argue that globalization has so fragmented the production process that even talking about exported goods as opposed to tasks may be misleading. Reviewing evidence from history and from around the world, the authors conclude that policy makers should focus less on what is produced, and more on how it is produced. They analyze alternative approaches to picking winners but conclude by favoring 'horizontal-ish' policies--for instance, those that build human capital or foment innovation in existing and future products—that only incidentally favor some sectors over others.

Innovative Business Practices Alkis Thrassou,Demetris Vrontis,2013-07-16 This second decade of the millennium finds the world changing at a once unimaginable pace. Businesses, tangled in the interwoven threads of galloping globalization, technological advances, cultural diversity, economic recession and deep-rooted human social evolution, struggle to keep up with incessant changes; consequently and inexorably experiencing severe difficulties and disorientation. Executives, much bewildered, habitually turn to conventional, time-honoured strategies and practices, which increasingly fail to offer the much-sought answers and means to survival, competitiveness and growth. We are currently experiencing a business era of turbulence and dynamic change – an era that inherently rejects conventionality and orthodox business theory to reward businesses embracing agility, reflex-style adaptability, innovation and creativity. This turbulence is, however, not a parenthesis or even a pattern, but the new reality in which each business must reinvent and redefine itself. This is a new reality of stakeholders that shift focus from the external to the internal, from the tangible to the intangible, and from fact to perception. This book presents research and paradigms that transcend classical theory in order to examine how business practice is positively affected by these conditions. Across a multitude of sectors and organisational types, scholars of different business specialisations

set the theoretical foundations of contemporary thinking and present their practical implementations.

Machine Learning and Big Data Analytics (Proceedings of International Conference on Machine Learning and Big Data Analytics (ICMLBDA) 2021) Rajiv Misra,Rudrapatna K. Shyamasundar,Amrita Chaturvedi,Rana Omer,2021-09-29 This edited volume on machine learning and big data analytics (Proceedings of ICMLBDA 2021) is intended to be used as a reference book for researchers and practitioners in the disciplines of computer science, electronics and telecommunication, information science, and electrical engineering. Machine learning and Big data analytics represent a key ingredients in the industrial applications for new products and services. Big data analytics applies machine learning for predictions by examining large and varied data sets—i.e., big data—to uncover hidden patterns, unknown correlations, market trends, customer preferences, and other useful information that can help organizations make more informed business decisions.

Yeasts in Biotechnology and Human Health Isabel Sá-Correia,2019-03-25 This book discusses genome-based strategies to provide a holistic understanding of yeasts in Human Health and as model organisms in basic research or industrial production. Using numerous Saccharomyces cerevisiae strains and various non-conventional yeast species isolated from diverse origins, it describes essential biological processes, the biotechnological exploitation of yeast and pathogenesis control. It also demonstrates how functional and comparative genomics and the development of genome engineering tools are used in modern yeast research. The use of yeasts as experimental eukaryotic models increasingly gained prominence when several Nobel Prizes in Physiology/Medicine and Chemistry were awarded for innovative research, using yeast strains to elucidate molecular mechanisms in a wide range of human physiological processes and diseases, such as autophagy, cell cycle regulation and telomerase activity. This book offers useful insights for scientists in yeast research, clinical scientists working with yeast infectious models and for industrial researchers using applied microbiology.

Resistance, Liberation Technology and Human Rights in the Digital Age Giovanni Ziccardi,2012-09-29 This book explains strategies, techniques, legal issues and the relationships between digital resistance activities, information warfare actions, liberation technology and human rights. It studies the concept of authority in the digital era and focuses in particular on the actions of so-called digital dissidents. Moving from the difference between hacking and computer crimes, the book explains concepts of hacktivism, the information war between states, a new form of politics (such as open data movements, radical transparency, crowd sourcing and "Twitter Revolutions"), and the hacking of political systems and of state technologies. The book focuses on the protection of human

rights in countries with oppressive regimes.

Online Child Grooming Kim-Kwang Raymond Choo,2009 The grooming of children for sexual purposes has been facilitated by online technologies, particularly social networking sites. This report describes the nature and extent of how new technologies are being exploited by offenders and the legislative and non-legislative responses being used to combat this growing problem.

Development Models, Globalization and Economies John B. Kidd,Frank-Jürgen Richter,2005-01-31 This text considers different economic models available in the global market. The US or Anglo-Saxon model is often portrayed as the best but now Asia is again on a roll. The book analyzes how these models have influenced both regional and global development, and engages in discussions upon alternatives and the search for the 'grail'.

La Fille Aux Cheveux de Lin (the Girl with the Flaxen Hair) Claude Debussy,2003-11 Debussy's music epitomizes the concept of Impressionism in music. One of the most famous pieces from Debussy's Preludes, Book 1, The Girl with the Flaxen Hair is a lyrical piece, awash with color and atmosphere. Drawing on the original autographed manuscript and first edition by Durand, all editorial details are contained in footnotes or parentheses.

<u>In Silico Drug Design</u> Kunal Roy,2019-02-12 In Silico Drug Design: Repurposing Techniques and Methodologies explores the application of computational tools that can be utilized for this approach. The book covers theoretical background and methodologies of chem-bioinformatic techniques and network modeling and discusses the various applied strategies to systematically retrieve, integrate and analyze datasets from diverse sources. Other topics include in silico drug design methods, computational workflows for drug repurposing, and network-based in silico screening for drug efficacy. With contributions from experts in the field and the inclusion of practical case studies, this book gives scientists, researchers and R&D professionals in the pharmaceutical industry valuable insights into drug design. Discusses the theoretical background and methodologies of useful techniques of cheminformatics and bioinformatics that can be applied for drug repurposing Offers case studies relating to the in silico modeling of FDA-approved drugs for the discovery of antifungal, anticancer, antiplatelet agents, and for drug therapies against diseases Covers tools and databases that can be utilized to facilitate in silico methods for drug repurposing

Global Capitalism and American Empire Leo Panitch,Sam Gindin,2004 This thoughtful reflection on capitalism, hegemony, and the United States addresses such questions as What does imperialism mean today? How does the United States influence the rest of the world? and What are the economic

interests served by its domination? Explored is how the rise of the United States as a superpower brought an end to the old inter-imperial rivalries. Also discussed is the Bretton Woods system in the 1970s, and how American hegemony, far from being fundamentally challenged by the other advanced capitalist states, came to be reconstituted in the form of global neoliberalism. The challenges America faces in the future in nation building and shaping a global agency are also addressed.

Understanding the Global Spa Industry Gerry Bodeker,Marc Cohen,2010-08-20 The spa industry is currently the fastest growing segment of the hospitality and leisure industry with revenues exceeding those from amusement parks, box office receipts, vacation ownership gross sales and ski resort ticket sales. Understanding the Global Spa Industry is the first book to examine management practices in this industry and offers a groundbreaking and comprehensive approach to global spa management, covering everything from the beginnings of the industry through to contemporary management and social and ethical issues. With contributions from internationally renowned business leaders, practitioners and academics, this unique book is packed with case studies, examples and advice for all those working in, and studying, the international spa industry. Understanding the Global Spa Industry brings an analytic lens to the spa movement, examining past, current and future trends and the potential for shaping wellness and health services in the 21st century.

European Fair Trading Law Geraint Howells,Hans-W. Micklitz,Thomas Wilhelmsson,2016-04-22 The Unfair Commercial Practices Directive is the most important directive in the field of trade practices to have emerged from the EC but it builds upon European activity which has sought to regulate trade practices on both a sectoral and horizontal level. It is an umbrella provision, which uses general

clauses to protect consumers. How effective this approach is and how it relates the existing acquis are fundamental issues for debate. This work provides a critical appraisal of the Unfair Commercial Practices Directive linking discussion of it to general debates about how fair trading should be regulated. It explains how the Directive fits into the existing acquis. It also examines national traditions where these are necessary to explain the European approach, as in the case of general clauses. The book will be a valuable tool for any student of consumer law seeking to understand the thinking behind the directive and how it will affect national laws. It will also influence policy makers by suggesting how the directive should be interpreted and what policy lies behind its formulation. Businesses and their advisers will use the book as a means of understanding the new regulatory climate post-the directive.
