The Theory and Practice of Online Learning Terry Anderson,2008 Neither an academic tome nor a prescriptive 'how to' guide, The Theory and Practice of Online Learning is an illuminating collection of essays by practitioners and scholars active in the complex field of distance education. Distance education has evolved significantly in its 150 years of existence. For most of this time, it was an individual pursuit defined by infrequent postal communication. But recently, three more developmental generations have emerged, supported by television and radio, teleconferencing, and computer conferencing. The early 21st century has produced a fifth generation, based on autonomous agents and intelligent, database-assisted learning, that has been referred to as Web 2.0. The second edition of The Theory and Practice of Online Learning features updates in each chapter, plus four new chapters on current distance education issues such as connectivism and social software innovations.--BOOK JACKET.

Beyond Infinity Eugenia Cheng,2017-03-09 SHORTLISTED FOR THE 2017 ROYAL SOCIETY SCIENCE BOOK PRIZE Even small children know there are infinitely many whole numbers - start counting and you'll never reach the end. But there are also infinitely many decimal numbers between zero and one. Are these two types of infinity the same? Are they larger or smaller than each other? Can we even talk about 'larger' and 'smaller' when we talk about infinity? In Beyond Infinity, international maths sensation Eugenia Cheng reveals the inner workings of infinity. What happens when a new guest arrives at your infinite hotel - but you already have an infinite number of guests? How does infinity give Zeno's tortoise the edge in a paradoxical foot-race with Achilles? And can we really make an infinite number of cookies from a finite amount of cookie dough? Wielding an armoury of inventive, intuitive metaphor, Cheng draws beginners and enthusiasts alike into the heart of this mysterious, powerful concept to reveal fundamental truths about mathematics, all the way from the infinitely large down to the infinitely small.

Imagine Design Create Tom Wujec,2011-05 Imagine, Design, Create offers a wide-ranging look at how the creative process and the tools of design are dramatically changing--and where design is headed in the coming years. Bringing together stories of good design happening around the world, the book shows how people are using fresh design approaches and new capabilities to solve problems, create opportunities, and improve the way we live and work. From the impact of SOM's Cathedral of Christ the Light in Oakland to the spark that inspired Thomas Heatherwick's U.K. Pavilion in Shanghai; from the new processes fueling Zaha Hadid's extraordinary architecture to the digital tools Ford is using to transform car design, each of these stories explores questions that swirl around the idea of design. How does design change our lives for the better? How is our capacity to produce good design evolving? How will the next generation of designers work? What will they make? What new areas of human experience is design opening for us? Now that designers can do almost anything--what should they do? The Publisher has two cover versions for this title. The books will ship with either a black or white cover. The interior contents are the same.

Visiting with the Ancestors Laura Peers,Alison K. Brown,2016-09-29 In 2010, five magnificent Blackfoot shirts, now owned by the University of Oxford's Pitt Rivers Museum, were brought to Alberta to be exhibited at the Glenbow Museum, in Calgary, and the Galt Museum, in Lethbridge. The shirts had not returned to Blackfoot territory since 1841, when officers of the Hudson's Bay Company acquired them. The shirts were later transported to England, where they had remained ever since. Exhibiting the shirts at the museums was, however, only one part of the project undertaken by Laura Peers and Alison Brown. Prior to the installation of the

exhibits, groups of Blackfoot people—hundreds altogether—participated in special “handling sessions,” in which they were able to touch the shirts and examine them up close. The shirts, some painted with mineral pigments and adorned with porcupine quillwork, others decorated with locks of human and horse hair, took the breath away of those who saw, smelled, and touched them. Long-dormant memories were awakened, and many of the participants described a powerful sense of connection and familiarity with the shirts, which still house the spirit of the ancestors who wore them. In the pages of this beautifully illustrated volume is the story of an effort to build a bridge between museums and source communities, in hopes of establishing stronger, more sustaining relationships between the two and spurring change in prevailing museum policies. Negotiating the tension between a museum’s institutional protocol and Blackfoot cultural protocol was challenging, but the experience described both by the authors and by Blackfoot contributors to the volume was transformative. Museums seek to preserve objects for posterity. This volume demonstrates that the emotional and spiritual power of objects does not vanish with the death of those who created them. For Blackfoot people today, these shirts are a living presence, one that evokes a sense of continuity and inspires pride in Blackfoot cultural heritage.

Reel Time Robert Morris Seiler, Tamara Palmer Seiler, 2013 In this authoritative work, Seiler and Seiler argues that the establishment and development of moviegoing and movie exhibition in Prairie Canada is best understood in the context of changing late-nineteenth-century and early-twentieth-century social, economic, and technological developments. From the first entrepreneurs who attempted to lure customers in to movie exhibition halls, to the digital revolution and its impact on moviegoing, Reel Time highlights the pivotal role of amusement venues in shaping the leisure activities of working- and middle-class people across North America. As marketing efforts, the lavish interiors of the movie palace and the romantic view of the local movie theatre concealed a competitive environment in which producers, exhibitors, and distributors tried to monopolize the industry and drive their rivals out of business. The pitched battles and power struggles between national movie theatre chains took place at the same time that movie exhibitors launched campaigns to reassure moviegoers that theatres were no longer the unclean and immoral places of amusement of yesteryear. Under the leadership of impresarios, the movie theatre rose up from these attacks to become an important social and cultural centre - one deemed suitable for women and children. An innovative examination of moviegoing as a social practice and movie exhibition as a commercial enterprise, Reel Time depicts how the industry shaped the development of the Canadian Prairie West and propelled the region into the modern era. Robert M. Seiler is associate professor emeritus in communication and culture at the University of Calgary. Tamara P. Seiler is professor emeritus of Canadian studies at the University of Calgary. Reel Time is their second joint publication.

Dwight’s classmate Tommy wonders how Yoda can be so smart when Dwight himself is so clueless. With contributions from his puzzled classmates, Tommy assembles this first case file in the blockbuster bestselling Origami Yoda series, written by Tom Angleberger, author of Star Wars: Return of the Jedi: Beware the Power of the Dark Side, and hailed by School Library Journal as “honest, funny, and immensely entertaining.” F&P Level: T F&P Genre: RF

The only clue is the sighting of a wild monkey in the Magic Kingdom during the storm. The mystery deepens as Finn is contacted by Wayne, an old man he hasn't heard from in months. The Spy's Son Bryan Denson, 2015-05-05 The true account of the Nicholsons, the father and son who sold national secrets to Russia. “One of the strangest spy stories in American history” (Robert Lindsey, author of The Falcon and the Snowman). Investigative reporter and Pulitzer Prize finalist Bryan Denson tells the riveting story of the father and son co-conspirators who betrayed the United States. Jim Nicholson was one of the CIA’s top veteran case officers. By day, he taught spycraft at the CIA’s clandestine training center, The Farm. By night, he was a minivan-driving single father racing home to have dinner with his kids. But Nicholson led a double life. For more than two years, he had met covertly with agents of Russia’s foreign intelligence service and turned over troves of classified documents. In 1997, Nicholson became the highest-ranking CIA officer ever convicted of espionage. But his duplicity didn’t stop there. While behind the bars of a federal prison, the former mole systematically groomed the one person he trusted most to serve as his stand-in: his youngest son, Nathan. When asked to smuggle messages out of prison to Russian contacts, Nathan saw an opportunity to be heroic and to make his father proud. “Filled with fascinating details of the cloak-and-dagger techniques of KGB and CIA operatives, double agents, and spy catchers . . . A poignant and painful tale of family love, loyalty, manipulation and betrayal.” —The Oregonian

Teaching Youth Media Steven Goodman, 2003-01-23 This book explores the power of using media education to help urban teenagers develop their critical thinking and literacy skills. Drawing on his twenty years of experience working with inner-city youth at the acclaimed Educational Video Center (EVC) in New York City, Steven Goodman looks closely at both the problems and possibilities of this model of media education. Responding to our national concern about adolescents, literacy, media, and violence, Teaching Youth Media: Describes the changes schools and after-school programs need to make in order to create a media education that empowers students to change their world; Explores the intersection of literacy and culture as youth learn to analyze information from a variety of sources, including television, newspapers, books, films, school, church, and lives outside of school; Features case studies of students and teachers engaged in making video documentaries at EVC and in an alternative high school; Illuminates the practical day-to-day challenges faced by professional developers and teachers working to change the way education is practiced in their classes and schools.

As China Goes, So Goes the World Karl Gerth, 2010-11-09 In this revelatory examination of the most overlooked force that is changing the face of China, the Oxford historian and scholar of modern Asia Karl Gerth shows that as the Chinese consumer goes, so goes the world. While Americans and Europeans have become increasingly worried about China's competition for manufacturing jobs and energy resources, they have overlooked an even bigger story: China's rapid development of an American-style consumer culture, which is revolutionizing the lives of hundreds of millions of Chinese and has the potential to reshape the world. This change is already well under way. China has become the world's largest consumer of everything from automobiles to beer and has begun to adopt such consumer habits as living in large single-occupancy homes, shopping

in gigantic malls, and eating meat-based diets served in fast-food outlets. Even rural Chinese, long the laggards of consumerism, have been buying refrigerators, televisions, mobile phones, and larger houses in unprecedented numbers. As China Goes, So Goes the World reveals why we should all care about the everyday choices made by ordinary Chinese. Taken together, these seemingly small changes are deeper and more profound than the headline-grabbing stories on military budgets, carbon emissions, or trade disputes.
