Too Ill to Talk? Penny Rhodes, Neil Small, 2014-07-10 User involvement has become an important part of health policy initiatives during the last decade, but how realistic is the concept and do all users want to be involved? This book brings the voices of people with serious illness, and those caring for them, into debate about how far health and social care services can reflect the views of users. Providing an overview of the literature on user involvement, the book looks at the policy and professional context within which user involvement is undertaken, in particular user involvement in palliative care. The authors discuss two key concepts - palliative care and empowerment - and analyse the role of self-help groups and new information and communication technologies in this context. The book focuses on the detailed narratives of people coping with three life-threatening illnesses - cystic fibrosis, multiple sclerosis and motor neurone disease - and in this way the views and experiences of the 'user' are brought into play to critique current policy and practice. Addressing a current health services issue in a refreshingly critical manner the text challenges the assumption that user involvement is either easy to achieve or that it is necessarily welcomed by all parties. It will be valuable reading for students on health studies courses, health professionals and policy makers in health and social care.

**Adult-Gerontology Practice Guidelines** Jill C. Cash, MSN, APN, FNP-BC, 2023-02-13 Praise for the First Edition: Because of the way it is organized, this book meets the needs of both novice and experienced advance practice nurses. Each chapter defines the problem, how often it occurs, and what leads to the problem. To aid in assessment, the book includes the physical examination landmarks as well as diagnostic tests that might be needed. A plan of care is offered with several different alternatives for treatment and then notes what type of follow-up is needed. This would be a great resource for anyone working in the field of geriatrics...Score: 92 - 4 Stars! --Doody's Reviews This hands-on text and clinical reference--used by thousands of NP students and practitioners alike--delivers national practice guidelines and professional standards of care to help clinicians deliver optimal primary care to adult and older adult patients. The new third edition, featuring the expert input of two renowned Adult-Gerontology practitioners, updates all chapters, teaching guides, and illustrative charts and provides new charts to enhance readability. Fresh content includes information on Sjogren's syndrome; reactive arthritis; elder abuse; LGBTQ health; concussion assessment; joint pain, bursitis, and fractures; peripheral neuropathy; and perimenopause/menopause. The third edition also includes the updated Beers Criteria and covers COVID-19 treatment and vaccines. Ideal for quick reference and as a study guide, the text presents the most up-to-date guidelines in a consistent, easy-to-read, bulleted format. Conveniently organized by body system, it features detailed content on the physical examination and diagnostic testing, information on health promotion, guidelines of care, dietary information, common procedures, national patient resources, and popular Client Teaching Guides--available in print and digital format--that serve as both patient handouts and concise study tools. Clinical points throughout the text highlight critical practice considerations. The book, with its great breadth and depth of information, will be a welcome companion for NP students as they transition to professional practice and beyond. New to the Third Edition: Completely updated content including patient teaching guides and charts New charts added to enhance comprehension Coverage of Sjogren's syndrome; reactive arthritis; elder abuse; LGBTQ health; concussion assessment; joint pain, bursitis, and fractures; peripheral neuropathy, and perimenopause/menopause Latest guidelines on COVID-19 treatment and vaccines Updated Beers Criteria Current CDC recommendations on vaccines and cancer screening Key Features: Offers consistent guidelines for over 275 disorders Presents practice guidelines organized by body system Lists disorders alphabetically for easy access Highlights key considerations for practice Delivers individual care considerations for adult, geriatric, and pregnant patients Provides Client Teaching Guides serving as both take-home teaching supplements for patients and a concise study tool for students

**Resident Duty Hours** Institute of Medicine, Committee on Optimizing Graduate Medical Trainee (Resident) Hours and Work Schedules to Improve Patient Safety, 2009-04-27 Medical residents in hospitals are often required to be on duty for long hours. In 2003 the organization overseeing graduate medical education adopted common program requirements to restrict resident workweeks, including limits to an average of 80 hours over 4 weeks and the longest consecutive period of work to 30 hours in order to protect patients and residents from unsafe conditions resulting from excessive fatigue. Resident Duty Hours provides a timely examination of how those requirements were implemented and their impact on safety, education, and the training institutions. An in-depth review of the evidence on sleep and human performance indicated a need to increase opportunities for sleep during residency training to prevent acute and chronic sleep deprivation and minimize the risk of fatigue-related errors. In addition to recommending opportunities for on-duty sleep during long duty periods and breaks for sleep of appropriate lengths between work periods, the committee also recommends enhancements of supervision, appropriate workload, and changes in the work environment to improve conditions for safety and learning. All residents, medical educators, those involved with academic training institutions, specialty societies, professional groups, and consumer/patient safety organizations will find this book useful to advocate for an improved culture of safety.

**Night Noise Guidelines for Europe** Charlotte Hurlley, 2009 The WHO Regional Office for Europe set up a working group of experts to provide scientific advice to the Member States for the development of future legislation and policy action in the area of assessment and control of night noise exposure. The working group reviewed available scientific evidence on the health effects of night noise, and derived health-based guideline values. In December 2006, the working group and stakeholders from industry, government and nongovernmental organizations reviewed and reached general agreement on the guideline values and key texts for the final document of the Night noise guidelines for Europe. Considering the scientific evidence on the thresholds of night noise exposure indicated by L<sub>night,outside</sub> [L suffix night,outside] as defined in the Environmental Noise Directive (2002/49/EC), an L<sub>night, outside</sub> of 40 dB should be the target of the night noise guideline (NNG) to protect the public, including the most vulnerable groups such as children, the chronically ill and the elderly. L<sub>night,outside</sub> value of 55 dB is recommended as an interim target for the countries where the NNG cannot be achieved in the short term for various reasons, and where policy-makers choose to adopt a stepwise approach. These guidelines are applicable to the Member States of the European Region, and may be considered as an extension to, as well as an update of, the previous WHO Guidelines for community noise (1999). *International Handbook of Survey Methodology* Edith D. de Leeuw, Joop Hox, Don Dillman, 2012-10-12 Taking into account both traditional and emerging modes, this comprehensive new Handbook covers all major methodological and statistical issues in designing and analyzing surveys. With contributions from the world's leading survey methodologists and statisticians, this invaluable new resource provides guidance on collecting survey data and creating meaningful results. Featuring examples from a variety of countries, the book reviews such things as how to deal with sample designs, write survey questions, and collect data on the Internet. A thorough review of the procedures associated with multiple modes of collecting sample survey information and applying that combination of methods that fit the situation best is included. The International Handbook of Survey Methodology opens with the foundations of survey design, ranging from sources of error, to ethical issues. This is followed by a section on design that reviews sampling challenges and tips on writing and testing questions for multiple methods. Part three focuses on data collection, from face-to-face interviews, to Internet and interactive voice response, to special challenges involved in mixing these modes within one survey. Analyzing data from both simple and complex surveys is then explored, as well as procedures for adjusting data. The book concludes with a discussion of maintaining quality. Intended for advanced students and researchers in the behavioral, social, and health sciences, this must have resource will appeal to those interested in conducting or using survey data from anywhere in the world, especially those interested in comparing results across countries. The book also serves as a state-of-the-art text for graduate level courses and seminars on survey methodology. A companion website contains additional readings and examples.

**Managing the Undesirables** Michel Agier,2011-01-25 Official figures classify some fifty million of the world's people as 'victims of forced displacement'. Refugees, asylum seekers, disaster victims, the internally displaced and the temporarily tolerated - categories of the excluded proliferate, but many more are left out of count. In the face of this tragedy, humanitarian action increasingly seems the only possible response. On the ground, however, the 'facilities' put in place are more reminiscent of the logic of totalitarianism. In a situation of permanent catastrophe and endless emergency, 'undesirables' are kept apart and out of sight, while the care dispensed is designed to control, filter and confine. How should we interpret the disturbing symbiosis between the hand that cares and the hand that strikes? After seven years of study in the refugee camps, Michel Agier reveals their 'disquieting ambiguity' and stresses the imperative need to take into account forms of improvisation and challenge that are currently transforming the camps, sometimes making them into towns and heralding the emergence of political subjects. A radical critique of the foundations, contexts, and political effects of humanitarian action.

**Sewage Treatment Plants** Katerina Stamatelatou,Konstantinos P. Tsagarakis,2015-05-15 Sewage Treatment Plants: Economic Evaluation of Innovative Technologies for Energy Efficiency aims to show how cost saving can be achieved in sewage treatment plants through implementation of novel, energy efficient technologies or modification of the conventional, energy demanding treatment facilities towards the concept of energy streamlining. The book brings together knowledge from Engineering, Economics, Utility Management and Practice and helps to provide a better understanding of the real economic value with methodologies and practices about innovative energy technologies and policies in sewage treatment plants.

*The Art of Writing Reasonable Organic Reaction Mechanisms* Robert B. Grossman,2007-07-31 Intended for students of intermediate organic chemistry, this text shows how to write a reasonable mechanism for an organic chemical transformation. The discussion is organized by types of mechanisms and the conditions under which the reaction is executed, rather than by the overall reaction as is the case in most textbooks. Each chapter discusses common mechanistic pathways and suggests practical tips for drawing them. Worked problems are included in the discussion of each mechanism, and common error alerts are scattered throughout the text to warn readers about pitfalls and misconceptions that bedevil students. Each chapter is capped by a large problem set.

**Guidelines for the Programmatic Management of Drug-resistant Tuberculosis** World Health Organization,2008 The emergence of extensively drug-resistant strains of tuberculosis, especially in countries with a high prevalence of human immunodeficiency virus, is a serious threat to global public health and jeopardizes efforts to effectively control the disease. This publication offers updated recommendations for the diagnosis and management of drug-resistant tuberculosis in a variety of geographical, economic and social settings, and the recording of data that enables the monitoring and evaluation of programs.--Publisher's description.

**Consolidated Guidelines on the Use of Antiretroviral Drugs for Treating and Preventing HIV Infection** World Health Organization,2016 These guidelines provide guidance on the diagnosis of human immunodeficiency virus (HIV) infection, the use of antiretroviral (ARV) drugs for treating and preventing HIV infection and the care of people living with HIV. They are structured along the continuum of HIV testing, prevention, treatment and care. This edition updates the 2013 consolidated guidelines on the use of antiretroviral drugs following an extensive review of evidence and consultations in mid-2015, shared at the end of 2015, and now published in full in 2016. It is being published in a changing global context for HIV and for health more broadly.

**Clinical Trials in Ovarian Cancer** Christine S. Walsh,2017-01-16 When a patient is diagnosed with a gynecological malignancy, she and her doctors must make urgent, high-risk decisions about her course of treatment. In selecting an appropriate plan of care, physicians must weigh the patient's individual needs, the tumor's specific characteristics, and the treatment's potential side effects. Because there is no one-size-fits-all treatment solution, a plethora of clinical trials have been performed on ovarian cancer patients, but clinicians may struggle to keep up with this ever-growing body of research. Collecting and synthesizing research findings from a wide array of medical journal articles and book chapters, Clinical Trials in Ovarian Cancer provides physicians with an invaluable resource. Gynecologic oncologist Christine S. Walsh systematically outlines each of the seminal Phase III trials that have shaped the treatment of ovarian cancers, detailing the rationale for the trial, the patient population studied, treatment delivery methods, efficacy, toxicity, and trial conclusions. She provides a clear overview of established treatments, as well as still-controversial experimental approaches. The first book to organize this cutting-edge research into an easy-to-use reference, Clinical Trials in Ovarian Cancer should help medical personnel at all levels provide their patients with the highest standard of care.
