Maurice Ades, Ron Griebenow

Charting the Topic Maps Research and Applications Landscape Lutz Maicher, 2006-02-21
This book constitutes the thoroughly refereed post-proceedings of the First International Workshop on Topic Map Research and Applications, held in October 2005. The 17 revised full papers and five revised short papers presented together with one invited lecture were carefully selected during two rounds of reviewing and improvement from more than 35 submissions. One of the goals of the workshop is to survey and structure the field of topic map research and the emerging topic map technologies.

Governance by Indicators Kevin Davis, Angelina Fisher, Benedict Kingsbury, Sally Engle Merry, 2012-07-05 Indicators and rankings are widely used by governments and organisations to assess the effectiveness, efficiency, and success of policy decisions. This book evaluates the creation of indicators, their impact on policy decisions, and the implications of their use.

Producing 24p Video John Skidgel, 2012-09-10
Producing 24p Video demystifies the emerging standards of film and video production and discusses the 24p video film format to help novice and experienced filmmakers alike learn how to better use the newly available DV cameras. Since the 24p frame rate closely approximates the look and feel of film, it is the speed of choice whenever a cinematic look is desired. 24p video also offers certain compression options that are advantageous to web and wireless delivery. This full-color book discusses the special techniques

required by 24p productions - all the way through the production, from preproduction planning through post and output. Each chapter includes techniques, examples, tips, and case studies. The field techniques section features real-world setups presented as demonstrations or as tutorials. Case studies present profiles of people producing 24p projects, and the DVD includes step-by-step instructions that illustrate how to work with 24p material in NLE, compositor, DVD authoring, and audio applications.

The Country Garden Josephine Nuese, 1970

The SAGES Manual of Fluorescence-Guided Surgery
Nova Szoka, David Renton, Santiago Horgan, 2023-11-27
Fluorescence-guided surgery (FGS) is defined as a medical imaging technique that uses a fluorescent dye or a near-infrared emitting light source to identify anatomic structures during surgical procedures. In 2020 alone, over 1200 academic articles were published on the topic of fluorescence-guidance surgery, a sign that this modality is making significant inroads into surgical practice. The use of near-infrared imaging and FGS is a rapidly growing modality, allowing surgeons to see more intraoperatively, enhance surgical precision, and improve surgical decision-making and patient outcomes. This manual provides a comprehensive, state-of-the art review of this field and will serve as a valuable resource for clinicians, surgeons and researchers with an interest in fluorescence-guided surgery, guiding patient management and stimulating

investigative efforts. After initial chapters discussing the history of FGS and the current platforms and devices, it presents the most up-to-date data regarding the use of FGS in multiple surgical fields - colorectal, hepatic, endocrine, reconstructive, pediatric, among others - as well as in the treatment of specific conditions such as burns. Chapters are generously illustrated with full-color figures and intraoperative photographs, and selected chapters include video segments. Access to a comprehensive resource such as this is currently limited by the relatively new inroads that fluorescence-guided technology has made into surgery. The SAGES Manual of Fluorescence-Guided Surgery fills this gap in the literature.

RLG Focus, 2000 Intended primarily for users of RLG's computer-based services. Includes information about upcoming new services; new bibliographic, citation or other online resources; enhancements to RLIN, CitaDel, Eureka, Zephyr, and Ariel; tips on their use; and the impact of service updates on the user community.

Managing and Using Information Systems Keri E. Pearlson, Carol S. Saunders, 2006 This book arms non-technical managers with the insights and knowledge they need to become active participants in information systems decisions. They'll learn how IT relates to the organization, its overall strategy, and the individual; how information is managed in today's organizations; how to recognize opportunities; and how to apply current technologies in new and innovative ways.

Digital Cinematography Paul Wheeler,2013-05-02
High end digital cinematography can truly
challenge the film camera in many of the
technical, artistic and emotional aspects of what
we think of as 'cinematography'. This book is a
guide for practising and aspiring cinematographers
and DOPs to digital cinematography essentials -
from how to use the cameras to the rapidly
emerging world of High Definition cinematography
and 24p technology. This book covers the 'on-the-
set' knowledge you need to know - its emphasis
lies in practical application, rather than
descriptions of technologies, so that in this book
you will find usable 'tools' and information to
help you get the job done. From 'getting the look'
to lighting styles and ratios, what is needed for
different types of shoots and the technical
preparation required, this is a complete reference
to the knowledge and skills required to shoot high
end digital films. The book also features a guide
to the Sony DVW in-camera menus - showing how to
set them up and how they work - a device to save
you time and frustration on set. Paul Wheeler is a
renowned cinematographer/director of photography
and trainer, he runs courses on Digital

Cinematography at the National Film & Television School and has lectured on the Royal College of Art's MA course and at The London International Film School. He has been twice nominated by BAFTA for a Best Cinematography award and also twice been the winner of the INDIE award for Best Digital Cinematography.
