Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Zebrafish James F. Amatruda,Corinne Houart,Koichi Kawakami,Kenneth D. Poss,2024 This fully updated edition introduces new tools, models, and analytic insights that position the zebrafish even more strongly as an engine of discovery for

developmental and disease biology. Beginning with a section exploring detailed methods for use of zebrafish to model a variety of human diseases, the book continues by illuminating the key ongoing role of the fish model in studies of the vertebrate nervous system, tools and approaches using zebrafish to study stem cell and regenerative biology, as well as techniques in genetics and genomics. Written for the highly successful Methods in Molecular Biology series, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step and readily reproducible laboratory protocols, as well as tips on troubleshooting and avoiding known pitfalls. Authoritative and up-to-date, Zebrafish: Methods and Protocols, Third Edition serves as an invaluable guide to propel advances in developmental biology, disease modeling, and regeneration research using zebrafish and medaka as model systems.

High Efficiency Video Coding (HEVC) Vivienne Sze,Madhukar Budagavi,Gary J. Sullivan,2014-08-23 This book provides developers, engineers, researchers and students with detailed knowledge about the High Efficiency Video Coding (HEVC) standard. HEVC is the successor to the widely successful H.264/AVC video compression standard, and it provides around twice as much compression as H.264/AVC for the same level of quality. The applications for HEVC will not only cover the space of the well-known current uses and capabilities of digital video – they will also include the deployment of new services and the delivery of enhanced video quality, such as ultra-high-definition television (UHDTV) and video with higher dynamic range, wider range of representable color, and greater representation precision than what is typically found today. HEVC is the next major generation of video coding design – a flexible, reliable and robust solution that will support the next decade of video applications and ease the burden of video on world-wide network traffic. This book provides a detailed explanation of the various parts of the standard, insight into how it was developed, and in-depth discussion of algorithms

and architectures for its implementation.

   Video Compression Handbook Andy Beach,Aaron Owen,2018-06-27 Video compression is not a new process; however, it is forever evolving. New standards, codecs, and ways of getting the job done are continually being created. Newcomers to video compression and seasoned veterans alike need to know how to harness the tools and use them for specific workflows for broadcast, the Web, Blu-rays, set-top boxes, digital cinema, and mobile devices. Here to guide you through the multitude of formats and confusing array of specifications, Andy Beach and Aaron Owen use a practical, straightforward approach to explaining video compression. After covering the fundamentals of audio and video compression, they explore the current applications for encoding, discuss the common workflows associated with each, and then look at the most common delivery platforms. The book includes examples from the authors' projects as well as recipes that offer a way to define some of the best practices of video compression today. This invaluable resource gives you: proven techniques for delivering video online, or via disc or other devices. clear, straightforward explanations that cut through the jargon. step-by-step instructions for using a wide variety of encoding tools. workflow tips for performing either stand-alone or batch compressions. insight and advice from top compression professionals sprinkled throughout.

Social Behaviour in Animals with Special Reference to

<u>Vertebrates</u> Niko Tinbergen,2014-02 2014 Reprint of 1953 New York Edition. Full facsimile of the original edition, not reproduced with Optical Recognition Software. This book aims to be a presentation of a biological approach to the phenomena of social behavior in animals. This approach is characterized by the need for careful observation of the variety of social phenomena occurring in nature; by emphasis on a balanced study of the three main biological problems - function, causation, evolution; by emphasis on an appropriate sequence of description, qualitative analysis, quantitative analysis; and finally by emphasis on the need for continuous re-synthesis. The book covers a range of aspects of animal behavior, including mating, fighting, family and group life, and social organizations, as well as some unrelated analytical evidence, acquired under such special laboratory conditions it is at present impossible to say how it is related to the normal life of the species concerned. The significance of intraspecific fighting, the causation of threat and courtship behavior, the functions of releasers and other problems are discussed in detail and an attempt has been made to give them their proper place in the complex system of problems. Tinbergen was a Dutch ethologist and ornithologist who shared the 1973 Nobel Prize in Physiology or Medicine with Karl von Frisch and Konrad Lorenz for their discoveries concerning organization and elicitation of individual and social behavior patterns in animals.
