Mastering the Core Teachings of the Buddha Daniel

Ingram,2020-01-20 The very idea that the teachings can be mastered will arouse controversy within Buddhist circles. Even so, Ingram insists that enlightenment is an attainable goal, once our fanciful notions of it are stripped away, and we have learned to use meditation as a method for examining reality rather than an opportunity to wallow in self-absorbed mind-noise. Ingram sets out concisely the difference between concentration-based and insight (vipassana) meditation; he provides example practices; and most importantly he presents detailed maps of the states of mind we are likely to

encounter, and the stages we must negotiate as we move through clearly-defined cycles of insight. It's easy to feel overawed, at first, by Ingram's assurance and ease in the higher levels of consciousness, but consistently he writes as a down-to-earth and compassionate guide, and to the practitioner willing to commit themselves this is a glittering gift of a book. In this new edition of the bestselling book, the author rearranges, revises and expands upon the original material, as well as adding new sections that bring further clarity to his ideas.

The Geometry Code Bruce Rawles, 2012-04 Integrate practical insights from modern physics, ancient Hermetic Laws, non-dual metaphysics, transpersonal psychology, and humor, as tools for undoing conflicting beliefs we've dreamed ourselves into. The seven Hermetic laws are explored in depth and demonstrate how a mindfulness that embraces 'other' as 'self' can reverse the typical misapplication of these inescapable laws of Mentalism, Correspondence, Vibration, Polarity, Rhythm, Cause & Effect and Generation. Ubiquitous geometric symbols, paired to each of these laws - the circle, vesica piscis, sine wave, line, spiral, fractal and yin-yang - and their countless commonplace variations, seen from the vantage point of shared interests, reflect these ideas. The inspired use of natural law restores attributes of life, love, strength, purity, beauty, perfection and gratitude to our awareness.

My Kids Quotes Onefam, 2017-11 As a parent, we are terrified that we cannot choose which memories will be lost or retained. Perhaps it's the cute little things they used to say, or their first word, mispronounced words or simply a saying which brought us to the

edge of hysterics. OneFam's Kids Quotes memory book ensures every memory will last a lifetime.

The Tell-tale Start Gordon McAlpine, 2013 Edgar and Allan, the great-great-great-great-grandnephews of the famed writer Edgar Allan Poe, discover that they are entrapped in a nefarious plot that has been going on since their birth--

The Wolf of Baghdad Carol Isaacs, 2020-01-30 'Enthralling and moving. It is magical.'— Claudia Roden In the 1940s a third of Baghdad's population was Jewish. Within a decade nearly all 150,000 had been expelled, killed or had escaped. This graphic memoir of a lost homeland is a wordless narrative by an author homesick for a home she has never visited. Transported by the power of music to her ancestral home in the old Jewish quarter of Baghdad, the author encounters its ghost-like inhabitants who are revealed as long-gone family members. As she explores the city, journeying through their memories and her imagination, she at first sees successful integration, and cultural and social cohesion. Then the mood turns darker with the fading of this ancient community's fortunes. This beautiful wordless narrative is illuminated by the words and portraits of her family, a brief history of Baghdadi Jews and of the making of this work. Says Isaacs: 'The Finns have a word, *kaukokaipuu*, which means a feeling of homesickness for a place you've never been to. I've been living in two places all my life; the England I was born in, and the lost world of my Iraqi-Jewish family's roots.'

My Beginning with No End Gloria Pickersgill, 2009-02-01 In Volume 2 she has written about issues many have a hard time with. Her feelings are expressed in detail with romantic sensual moments, culture, metaphors of understanding, lessons learned on her point of view, inspirational thoughts, regrets of actions, grown woman and men issues and more. What many don't realize is that I am not little Gloria anymore so the little girl poetry is on the back burner for now. In Volume 2 you will see the grown woman truly come out in ways you wouldn't believe. This book is for male and female and I hope you're ready for Volume 2 on explosive levels. _____

Human Factors Considerations of Undergrounds in Insurgencies

Us Army Special Operations Command, 2017-08-31 From the preface: The 1966 'Human Factors' edition focused on the contemporary threat of Maoist insurgencies, particularly in Southeast Asia, and also drew extensively on World War II resistance movements in Europe. Much of this information is still relevant and has been retained and integrated. In the post-Cold War world, the most important insurgencies tend to be ethnic and religious. Long-simmering conflicts, sometimes with roots in colonial policies, have become prominent; examples include the Liberation Tigers of Tamil Eelam (LTTE) in Sri Lanka, Euskadi Ta Askatasuna (Basque Homeland and Freedom or ETA) in Spain, the Hutu-Tutsi genocides, the Ushtia ♦lirimtare e Kosov♦s (Kosovo Liberation Army, or KLA), and the Provisional Irish Republican Army (PIRA). Battle lines in these conflicts are often drawn along ethnic lines, even when land or politics are the immediate issues in contention. The other important new category is extremist religious movements, most prominently Islamic groups, including regional insurgent movements like Hizbollah and Harakat al-Muqawamah al'Isla ♦miyyah (Islamic Resistance Movement, or HAMAS) and global movements like Al Qaeda. These present a different profile of ideology, organizational forms, and psychology than either Cold War Maoists or post-colonial ethnic insurgencies (although the Palestinian cause could be considered a post-colonial issue). Globalization has also changed underground operations in numerous ways. Insurgencies, enabled by low-cost transportation, Internet based communications, and other information technologies, can more easily recruit, communicate, and operate across borders. It is correspondingly much more difficult to

contain an insurgency in a region. Global media has led to development of new tactics, in particular new types of terrorism, designed to capture worldwide attention. Compared with what was available in the 1960s, there are orders of magnitude more academic research available relevant to this study's topics. We were able to draw on more recent work in psychology, political science, economics, sociology, organizational studies, and communications studies. Readers of this edition will, over the course of eleven chapters, get a wide exposure to basic concepts from a number of disciplines.

New Public Diplomacy in the 21st Century James Pamment, 2012
This book examines the concept of new public diplomacy against empirical data derived from three country case studies, in order to offer a systematic assessment of policy and practice in the early 21st century. The new public diplomacy (PD) is a major paradigm shift in international political communication. Globalisation and a new media landscape challenge traditional foreign ministry 'gatekeeper' structures, and foreign ministries can no longer lay claim to being sole or dominant actors in communicating foreign policy. This demands new ways of elucidating foreign policy to a range of nongovernmental international actors, and new ways of evaluating the influence of these communicative efforts. The author investigates the methods and strategies used by five foreign ministries and cultural institutes in three countries as they attempt to adapt their PD practices to the demands of the new public diplomacy environment. Drawing upon case studies of US, British, and Swedish efforts, each chapter covers national policy, current activities, evaluation methods, and examples of individual campaigns. This book will be of much interest to students of public diplomacy, foreign policy, political communication, media studies and international relations in general.

Enfoldment and Infinity Laura U. Marks,2010-08-13 Tracing the connections—both visual and philosophical—between new media art and classical Islamic art. In both classical Islamic art and contemporary new media art, one point can unfold to reveal an entire universe. A fourteenth-century dome decorated with geometric complexity and a new media work that shapes a dome from programmed beams of light: both can inspire feelings of immersion and transcendence. In *Enfoldment and Infinity*, Laura Marks traces the strong similarities, visual and philosophical, between these two kinds of art. Her argument is more than metaphorical; she shows that the “Islamic” quality of modern and new media art is a latent, deeply enfolded, historical inheritance from Islamic art and thought. Marks proposes an aesthetics of unfolding and enfolding in which image, information, and the infinite interact: image is an interface to information, and information (such as computer code or the words of the Qur'an) is an interface to the infinite. After demonstrating historically how Islamic aesthetics traveled into Western art, Marks draws explicit parallels between works of classical Islamic art and new media art, describing texts that burst into image, lines that multiply to form fractal spaces, “nonorganic life” in carpets and algorithms, and other shared concepts and images. Islamic philosophy, she suggests, can offer fruitful ways of understanding contemporary art.
