Central Illinois Train Depots Thomas Dyrek,2021 From the mid-1800s to the early 1960s, the most integral place for Central Illinois communities was the train depot. These buildings, home to wooden benches, telegraph equipment, and old train schedules hanging on the wall, were the gateway to the rest of the world. One could catch a train to almost anywhere in the United States back in the day, but during the postwar years of America, the railroad depot faded into history. Decreased train ridership due to the increasing popularity of air travel and automobiles led to thousands of these once-important buildings closing and later being burned or torn down. From larger union depots in cities like Bloomington and Peoria to smaller isolated stops, Central Illinois Train Depots tells the story of buildings that once played vital roles in the development of communities throughout Central Illinois.

The Gravy Train Dan Ruppert,2003 Growing up in the suburbs of New York City on Long Island, I took a keen interest in all forms of transportation, especially trains. After graduating college, I worked as an industrial engineer for private sector corporations progressing to a middle management position within a Fortune 25 Company. In 1983 I accepted a job opportunity with the Long Island Rail Road as an industrial engineer. The LIRR is a government-subsidized agency that is part of a larger regional organization called the Metropolitan Transportation Authority. The LIRR had embarked on a very ambitious improvement program to upgrade their physical plants. This plan included the construction of a new railcar maintenance facility. The new facility was to replace their one hundred year old maintenance shops. I was hired to develop facility layouts for the most advanced rail car maintenance facility in the country. Friends and professional colleagues advised me to decline the job offer. However, I was a railroad buff and the opportunity to work for a railroad overshadowed any trepidations. For decades, the LIRR had bore the brunt of adverse publicity. I would often consider much of the criticism as being too harsh and misguided. Not long after commencing employment, my perspective of the LIRR would be completely transformed. The inefficient and workplace abuses I witnessed first hand could only flourish in publicly subsidized environment. My job required me to observe and analyze the maintenance and repair operations performed on commuter railcars. My next step was identifying more efficient methods. I would then implement these improvements into the design of the new railcar maintenance facilities. I was met with a wall of resistance and non-cooperation from the unionized workforce. The LIRR had languished in decades of inefficient work habits supplemented with managerial complacency and rampant nepotism. I would operate in a very hostile environment that had no incentive to embrace improvements. It would be in the better interests of the unions to maintain low productivity and therefore justify the gross overstaffing that existed for decades. Upon completion of developing the facility layouts, the next phase of my responsibilities involved coordination with design consultants hired by the LIRR. The consultants were responsible for the architectural and structural designs of the new maintenance facility. The consultants typically were selected based on political connections and not their level of expertise. The design phase was muddled with incompetence and waste. Inept project management would add tens of millions of dollars and lengthy delays to the construction phase of the project. Upon completion of construction, a new regime intent on maintaining the status quo within the LIRR assumed control of the new maintenance facility. The new regime is not committed to capitalizing on the labor efficiencies offered by the new facility. Key positions are then filled with managers' intent in preserving the traditional inefficient ways of the LIRR. My story concludes with the agendas of the new regime and conflicts with those who were trying to transform the LIRR into a socially responsible institution. My trials and tribulations along with personal victories and setbacks are all the basis of my book.

New York Central's Mercury Richard J. Cook,1991 New York Central's Mercury Richard J. Cook, Sr.It was a sensation in its time, a train that was a winged messenger of hope for a Depression consciousness. The Mercury, billed by the New York Central as a Train of Tomorrow, appeared on the scene in1936, a completely new streamlined train for the Cleveland-Detroit passenger business. People flock ed to the NYC tracks just to watch the train go by. The Mercurys have been called a turning point inrailroad design. They were the first streamliners done as a unit, inside and out, custom-built, str eamlined and air-conditioned. This is the story of America's most distinguished train. Amtrak in the Heartland Craig Sanders,2006-05-11 Craig Sanders has done an excellent job of research... his treatment is as comprehensive as anyone could reasonably wish for, and solidly based. In addition, he succeeds in making it all clear as well as any human can. He also manages to inject enough humor and human interest to keep the reader moving. —Herbert H. Harwood, author of *The Lake Shore Electric Railway Story* and *Invisible Giants: The Empires of Cleveland's Van Sweringen Brothers* A complete history of Amtrak operations in the heartland, this volume describes conditions that led to the passage of the Rail Passenger Service Act of 1970, the formation and implementation of Amtrak in 1970–71, and the major factors that have influenced Amtrak operations since its inception. More than 140 photographs and 3 maps bring to life the story as told by Sanders. This book will become indispensable to train enthusiasts through its examination of Americans' long-standing fascination with passenger trains. When it began in 1971, many expected Amtrak to last about three years before going out of existence for lack of business, but the public's continuing support of funding for Amtrak has enabled it and the passenger train to survive despite seemingly insurmountable odds.
