Getting to the Heart of Science Communication

Faith Kearns, 2021-05-11 Scientists today working on controversial issues from climate change to drought to COVID-19 are finding themselves more often in the middle of deeply traumatizing or polarized conflicts they feel unprepared to referee. It is no longer enough for scientists to communicate a scientific topic clearly. They must now be experts not only in their fields of study, but also in navigating the thoughts, feelings, and opinions of members of the public they engage with, and with each other. And the conversations are growing more fraught. In *Getting to the Heart of Science Communication*, Faith Kearns has penned a succinct guide for navigating the human relationships critical to the success of practice-

based science. This meticulously researched volume takes science communication to the next level, helping scientists to see the value of listening as well as talking, understanding power dynamics in relationships, and addressing the roles of trauma, loss, grief, and healing.

Confronting Climate Gridlock Daniel S.

Cohan, 2022 An atmospheric scientist explains why global climate change mitigation and energy decarbonization demand American diplomacy, technology, and policy Daniel Cohan makes a compelling case that the problem of climate change is solvable. Fixing the gridlock on global action requires fixing the gridlock here in the United States of America. Cohan shows how that can be done.--David Victor, UC San Diego Professor of environmental engineering Daniel Cohan argues that escaping the gravest perils of climate change will first require American diplomacy, technological innovation, and policy to catalyze decarbonization globally. Combining his own expertise along with insights from more than a hundred interviews with diplomats, scholars, and clean-technology pioneers, Cohan identifies flaws in previous efforts to combat climate change. He highlights opportunities for more successful strategies, including international climate clubs and accelerated development of clean energy technologies. Grounded in history and emerging scholarship, this book offers a forward-looking vision of solutions to confronting climate gridlock and a clear-eyed recognition of the challenges to enacting them.

A Start in Life Honore de Balzac, 2014-06-01 The

novel *A Start in Life* is part of the Scenes of Private Life section of Honore de Balzac's masterpiece of nineteenth-century realism, *The Human Comedy*. In much of Balzac's work, the aristocracy is portrayed as vain, duplicitous, and greedy. But in this novel, it is members of the working class who are mercilessly skewered when what starts out as a harmless prank rapidly snowballs into a comedy of errors with profound consequences.

Understanding Climate Change Sarah Burch, Sara E. Harris, 2021-06-01
Conversations about climate change are filled with challenges involving complex data, deeply held values, and political issues. *Understanding Climate Change* examines climate change as both a scientific and a public policy issue. Sarah L. Burch and Sara E. Harris explain the basics of the climate system, climate models and prediction, and human and biophysical impacts, as well as strategies for climate change adaptation and mitigation. The second edition has been fully updated throughout, including coverage of new advances in climate modelling and of the shifting landscape of renewable energy production and distribution. A brand new chapter discusses global governance, including the United Nations Framework Convention on Climate Change and the Paris Agreement, as well as mitigation efforts at the national and subnational levels. This new chapter makes the book even more relevant to climate change courses housed in social sciences departments such as political science and

geography. An effective and integrated introduction to an urgent and controversial issue, this book is well-suited to adoption in a variety of introductory climate change courses found in a number of science and social science departments. Its ultimate goal is to equip readers with the tools needed to become constructive participants in the human response to climate change.

Discerning Experts Michael Oppenheimer, Naomi Oreskes, Dale Jamieson, Keynyn Brysse, Jessica O'Reilly, Matthew Shindell, Milena Wazeck, 2019-03-07
Discerning Experts assesses the assessments that many governments rely on to help guide environmental policy and action. Through their close look at environmental assessments involving acid rain, ozone depletion, and sea level rise, the authors explore how experts deliberate and decide on the scientific facts about problems like climate change. They also seek to understand how the scientists involved make the judgments they do, how the organization and management of assessment activities affects those judgments, and how expertise is identified and constructed. *Discerning Experts* uncovers factors that can generate systematic bias and error, and recommends how the process can be improved. As the first study of the internal workings of large environmental assessments, this book reveals their strengths and weaknesses, and explains what assessments can—and cannot—be expected to contribute to public policy and the common good.

Finding Our Niche Philip A. Loring, 2020-10-11T00:00:00Z
Imagine a world where humanity was not destined to cause harm to the

natural world, where win-win scenarios—people and nature thriving together—are possible. No doubt contemporary western society is steeped in the legacy of white supremacy and colonialism, and as a result, many people have come to believe that humanity is fundamentally flawed, that the story of our species is destined to be nasty, brutish, and short. But what if this narrative could be dismantled? In *Finding Our Niche*, Philip A. Loring does just that. He explores the tragedies of Western society and offers examples and analyses that can guide us in reconciling our damaging settler-colonial histories and tremendous environmental missteps in favor of a more sustainable and just vision for the future.

Drawing from numerous cases around the world, from cattle ranchers on the Burren in Ireland, to clam gardeners in British Columbia and protectors of an accidental wetland in northwest Mexico, Loring brings the reader through a difficult journey of reconciliation, a journey that leads to a more optimistic understanding of human nature and the prospects for our future, where people and nature thrive together. Interwoven are Loring's personal struggles to reconcile his identity as a white settler living and working on stolen Indigenous lands. In a moment when our world is hanging in the balance, *Finding Our Niche* is a hopeful exploration of humanity's place in the natural world, one that focuses on how we can heal and reconcile our unique human ecologies to achieve more sustainable and just societies.

Polar Bears Andrew E. Derocher, 2012-03-08
Presents an introduction to the polar bear,

discussing its evolution, physical characteristics, life cycle, predatory behavior, habitat, and the threats to its existence from global warming.

Sustainable Materialism David Schlosberg, Luke Craven, 2019 In the face of a set of environmental crises, a growing number of environmental and community groups are focusing on more sustainable practices in everyday life. This book focuses on sustainable materialism, and examines the political and social motivations of activists and movement groups involved in this growing and expanding practice.

Climate Change as Class War Matthew T. Huber, 2022-05-10 How to build a movement to confront climate change The climate crisis is not primarily a problem of 'believing science' or individual 'carbon footprints' – it is a class problem rooted in who owns, controls and profits from material production. As such, it will take a class struggle to solve. In this ground breaking class analysis, Matthew T. Huber argues that the carbon-intensive capitalist class must be confronted for producing climate change. Yet, the narrow and unpopular roots of climate politics in the professional class is not capable of building a movement up to this challenge. For an alternative strategy, he proposes climate politics that appeals to the vast majority of society: the working class. Huber evaluates the Green New Deal as a first attempt to channel working class material and ecological interests and advocates building union power in the very energy system we need to dramatically transform. In the end, as in

classical socialist movements of the early 20th Century, winning the climate struggle will need to be internationalist based on a form of planetary working class solidarity.

The Marriage Contract Honoré de Balzac, 2024-03-02 *Le Contrat de mariage* (English: A Marriage Contract or A Marriage Settlement) is an 1835 novel by French author Honoré de Balzac (1799-1850) and included in the *Scènes de la vie privée* section of his novel sequence *La Comédie humaine*. Set in Bordeaux, it describes the marriage of a Parisian gentleman, Paul de Manerville, to the beautiful but spoiled Spanish heiress, Natalie Evangelista. Paul de Manerville is a gentleman born of wealth and nobility who decides, over the objections of his worldly friend de Marsay, to give up his elegant bachelor's life and get married at the age of twenty-seven. He falls in love with a beautiful girl named Natalie Evangelista, the daughter of a proud Spanish matriarch whose financial assets have been diminishing since the death of her husband. Too naïve and full of illusions to see the hidden motives of Natalie Evangelista's mother, who wants Paul's wealth in order to procure for her daughter the lavish lifestyle she believes to be her birthright, or to recognize that his bride's loyalty is entirely with her mother and not with him, Paul gets himself stuck in a frigid and childless marriage. So strong are his illusions, that even at the end of the novel he remains unaware of his wife's infidelities. *A Marriage Contract* is one of Balzac's great studies of human illusions, in this case the illusions of married

life. Paul is a subtly conveyed example of the husband, the voluntary dupe who prefers to suffer rather than complain. The novel is notable for treating not only the courtship leading up to the marriage, but the negotiations which follow. A Marriage Contract also has one of Balzac's classic dissections of the techniques and wiles of professional negotiators. (wikipedia.org) About the author: Honoré de Balzac born Honoré Balzac; (20 May 1799 - 18 August 1850) was a French novelist and playwright. The novel sequence La Comédie humaine, which presents a panorama of post-Napoleonic French life, is generally viewed as his magnum opus. Owing to his keen observation of detail and unfiltered representation of society, Balzac is regarded as one of the founders of realism in European literature. He is renowned for his multi-faceted characters; even his lesser characters are complex, morally ambiguous and fully human. Inanimate objects are imbued with character as well; the city of Paris, a backdrop for much of his writing, takes on many human qualities. His writing influenced many famous writers, including the novelists Émile Zola, Charles Dickens, Marcel Proust, Gustave Flaubert, and Henry James, and filmmakers François Truffaut and Jacques Rivette. Many of Balzac's works have been made into films and continue to inspire other writers. James called him really the father of us all. An enthusiastic reader and independent thinker as a child, Balzac had trouble adapting to the teaching style of his grammar school. His willful nature caused trouble throughout his life and frustrated his ambitions to succeed in the

world of business. When he finished school, Balzac was apprenticed in a law office, but he turned his back on the study of law after wearying of its inhumanity and banal routine. Before and during his career as a writer, he attempted to be a publisher, printer, businessman, critic, and politician; he failed in all of these efforts. *La Comédie Humaine* reflects his real-life difficulties, and includes scenes from his own experience. Balzac suffered from health problems throughout his life, possibly owing to his intense writing schedule. His relationship with his family was often strained by financial and personal drama, and he lost more than one friend over critical reviews. In 1850, Balzac married Ewelina Hańska (née Contessa Rzewuska), a Polish aristocrat and his longtime love. He died in Paris six months later. (wikipedia.org)

Rights for Robots Joshua C. Gellers, 2020-10-26
Bringing a unique perspective to the burgeoning ethical and legal issues surrounding the presence of artificial intelligence in our daily lives, the book uses theory and practice on animal rights and the rights of nature to assess the status of robots. Through extensive philosophical and legal analyses, the book explores how rights can be applied to nonhuman entities. This task is completed by developing a framework useful for determining the kinds of personhood for which a nonhuman entity might be eligible, and a critical environmental ethic that extends moral and legal consideration to nonhumans. The framework and ethic are then applied to two hypothetical situations involving real-world technology–animal–

like robot companions and humanoid sex robots. Additionally, the book approaches the subject from multiple perspectives, providing a comparative study of legal cases on animal rights and the rights of nature from around the world and insights from structured interviews with leading experts in the field of robotics. Ending with a call to rethink the concept of rights in the Anthropocene, suggestions for further research are made. An essential read for scholars and students interested in robot, animal and environmental law, as well as those interested in technology more generally, the book is a ground-breaking study of an increasingly relevant topic, as robots become ubiquitous in modern society.
