Paleontological Collections of Germany, Austria and Switzerland Lothar A. Beck,Ulrich

Joger,2018-11-19 This book is devoted to 250 years of collecting, organizing and preserving paleontological specimens by generations of scientists. Paleontological collections are a huge resource for modern research and should be available for national and international scientists and institutions, as well as prospective public and private customers. These collections are an important part of the scientific enterprise, supporting research, public education, and the documentation of past biodiversity. Much of what we are beginning to understand about our world, we owe to the collection, preservation, and ongoing study of natural specimens. Properly preserved collections of fossil marine or terrestrial plants and animals are archives of Earth's history and vital to our ability to learn about our place in its future. The approach employed by the editors involves not only an introduction to the paleontological collections in general, but also information on the international and national collection networks. Particular attention is given to new exhibition concepts and approaches of sorting, preserving and

researching in paleontological collections and also their neglect and/or threat. In addition, the book provides information on all big public museums, on important state museums and regional Museums, and also on university collections. This is a highly informative and carefully presented book, providing scientific insight for readers with an interest in fossil record, biodiversity, taxonomy, or evolution, as well as natural history collections at large.

Benjamin's Library Jane O. Newman, 2011-12-15 In Benjamin's Library, Jane O. Newman offers, for the first time in any language, a reading of Walter Benjamin's notoriously opaque work, *Origin of the German Tragic Drama* that systematically attends to its place in discussions of the Baroque in Benjamin's day. Taking into account the literary and cultural contexts of Benjamin's work, Newman recovers Benjamin's relationship to the ideologically loaded readings of the literature and political theory of the seventeenth-century Baroque that abounded in Germany during the political and economic crises of the Weimar years. To date, the significance of the Baroque for *Origin of the German Tragic Drama* has been glossed over by students of Benjamin, most of whom have neither

read it in this context nor engaged with the often incongruous debates about the period that filled both academic and popular texts in the years leading up to and following World War I. Armed with extraordinary historical, bibliographical, philological, and orthographic research, Newman shows the extent to which Benjamin participated in these debates by reconstructing the literal and figurative history of sixteenth- and seventeenth-century books that Benjamin analyzes and the literary, art historical and art theoretical, and political theological discussions of the Baroque with which he was familiar. In so doing, she challenges the exceptionalist, even hagiographic, approaches that have become common in Benjamin studies. The result is a deeply learned book that will infuse much-needed life into the study of one of the most influential thinkers of the twentieth century.

Sigmar Polke Margit Rowell, Sigmar Polke, Michael Semff, Bice Curiger, Museum of Modern Art (New York, N.Y.), 1999 Sigmar Polke's thirty-five-year career, during which he has produced a vast range of work in all mediums, has earned him a reputation as one of the most significant artists of his generation. Born in 1941, he began his creative output around 1963 in Dusseldorf during a time of

enormous social, cultural, and artistic changes in Germany and elsewhere. Few of his works demonstrate more vividly his imagination, sardonic wit, and subversive approach than the drawings, watercolors, and gouaches produced during the 1960s and early 1970s. Embedded in these images are incisive and parodic commentaries on consumer society, the postwar political scene in Germany, and classic artistic conventions.

Open Space as an Air Resource Management Measure: Sink factors ,1976

European Elites and Ideas of Empire, 1917–1957 Dina Gusejnova,2016-06-16 Explores European civilisation as a concept of twentieth-century political practice and the project of a transnational network of European elites. This title is available as Open Access.

Spaces of Experience Charlotte Klonk,2009-01-01 This fascinating study of art gallery interiors examines the changing ideals and practices of galleries in Europe and North America from the 18th to the late 20th century. It offers a detailed account of the different displays that have been created—the colors of the background walls, lighting, furnishings, the height and density of the art works on

show—and it traces the different scientific, political and commercial influences that lay behind their development. Charlotte Klonk shows that scientists like Hermann von Helmholtz and Wilhelm Wundt advanced theories of perception that played a significant role in justifying new modes of exhibiting. Equally important for the changing modes of exhibition in art galleries was what Michael Baxandall has called “the period eye,” a way of seeing informed by the impact of new fashions in interior decoration and by department store and shop window displays. The history of museum interiors, she argues, should be appreciated as a revealing chapter in the broader history of experience.

Art Crossing Borders Jan Dirk Baetens, Dries Lyna, 2019-02-11 Art Crossing Borders offers a thought-provoking analysis of the internationalisation of the art market during the long nineteenth century. Twelve experts, dealing with a wide variety of geographical, temporal, and commercial contexts, explore how the gradual integration of art markets structurally depended on the simultaneous rise of nationalist modes of thinking, in unexpected and ambiguous ways. By presenting a radically international research perspective Art Crossing Borders offers a crucial contribution to the field of art

market studies.

Properties of Polymers D.W. van Krevelen, 2012-12-02 Properties of Polymers: Their Correlation with Chemical Structure; Their Numerical Estimation and Prediction from Additive Group Contributions summarizes the latest developments regarding polymers, their properties in relation to chemical structure, and methods for estimating and predicting numerical properties from chemical structure. In particular, it examines polymer electrical properties, magnetic properties, and mechanical properties, as well as their crystallization and environmental behavior and failure. The rheological properties of polymer melts and polymer solutions are also considered. Organized into seven parts encompassing 27 chapters, this book begins with an overview of polymer science and engineering, including the typology of polymers and their properties. It then turns to a discussion of thermophysical properties, from transition temperatures to volumetric and calorimetric properties, along with the cohesive aspects and conformation statistics. It also introduces the reader to the behavior of polymers in electromagnetic and mechanical fields of force. The book covers the quantities that influence the transport of heat,

momentum, and matter, particularly heat conductivity, viscosity, and diffusivity; properties that control the chemical stability and breakdown of polymers; and polymer properties as an integral concept, with emphasis on processing and product properties. Readers will find tables that give valuable (numerical) data on polymers and include a survey of the group contributions (increments) of almost every additive function considered. This book is a valuable resource for anyone working on practical problems in the field of polymers, including organic chemists, chemical engineers, polymer processors, polymer technologists, and both graduate and PhD students.

Litteratura Coleopterologica (1758-1900) Yves Bousquet, 2016-12-02 Bibliographic references to works pertaining to the taxonomy of Coleoptera published between 1758 and 1900 in the non-periodical literature are listed. Each reference includes the full name of the author, the year or range of years of the publication, the title in full, the publisher and place of publication, the pagination with the number of plates, and the size of the work. This information is followed by the date of publication found in the work itself, the dates found from external sources, and the libraries consulted for the work.

Overall, more than 990 works published by 622 primary authors are listed. For each of these authors, a biographic notice (if information was available) is given along with the references consulted--[p. 1].

Architectures and Mechanisms for Language Processing Matthew W. Crocker, Martin Pickering, Charles Clifton, 2006-11-02 The architectures and mechanisms underlying language processing form one important part of the general structure of cognition. This book, written by leading experts in the field, brings together linguistic, psychological, and computational perspectives on some of the fundamental issues. Several general introductory chapters offer overviews on important psycholinguistic research frameworks and highlight both shared assumptions and controversial issues. Subsequent chapters explore syntactic and lexical mechanisms, the interaction of syntax and semantics in language understanding, and the implications for cognitive architecture.

Foundations in Music Psychology Peter Jason Rentfrow, Daniel J. Levitin, 2019-03-12 A state-of-the-art overview of the latest theory and research in music psychology, written by leaders in the field. This authoritative, landmark volume offers a comprehensive state-of-the-art overview of the latest

theory and research in music perception and cognition. Eminent scholars from a range of disciplines, employing a variety of methodologies, describe important findings from core areas of the field, including music cognition, the neuroscience of music, musical performance, and music therapy. The book can be used as a textbook for courses in music cognition, auditory perception, science of music, psychology of music, philosophy of music, and music therapy, and as a reference for researchers, teachers, and musicians. The book's sections cover music perception; music cognition; music, neurobiology, and evolution; musical training, ability, and performance; and musical experience in everyday life. Chapters treat such topics as pitch, rhythm, and timbre; musical expectancy, musicality, musical disorders, and absolute pitch; brain processes involved in music perception, cross-species studies of music cognition, and music across cultures; improvisation, the assessment of musical ability, and singing; and music and emotions, musical preferences, and music therapy. Pantheism Michael P. Levine, 2002-09-11 Many people who do not believe in God believe that 'everything is God' - that everything is part of an all-inclusive divine unity. In Pantheism, this concept is presented as a legitimate position and its philosophical basis is examined. Michael Levine compares it to theism, and discusses the scope for resolving the problems inherent in theism through pantheism. He also considers the implications of pantheism in terms of practice. This book will appeal to those who study philosophy or theology. It will also be of interest to anyone who does not believe in a personal God, but does have faith in a higher unifying force, and is interested in the justification of this

as a legitimate system of thought.

The Gospel of Thomas and Plato Ivan Miroshnikov, 2018-06-12 In *The Gospel of Thomas and Plato*, Ivan Miroshnikov offers the first systematic discussion of the Platonist impact on the Gospel of Thomas, arguing that Platonism is indispensable to making sense of those sayings that have long remained exegetical cruxes.

Eyetracking and Applied Linguistics Silvia Hansen-Schirra , Sambor Grucza , 2016-11-25 Eyetracking has become a powerful tool in scientific research and has finally found its way into disciplines such as applied linguistics and translation studies, paving the way for new insights and challenges in these fields. The aim of the first International Conference on Eyetracking and Applied Linguistics (ICEAL) was to bring together researchers who use eyetracking to empirically answer their research questions. It was intended to bridge the gaps between applied linguistics, translation studies, cognitive science and computational linguistics on the one hand and to further encourage innovative research methodologies and data triangulation on the other hand. These challenges are also

addressed in this proceedings volume: While the studies described in the volume deal with a wide range of topics, they all agree on eyetracking as an appropriate methodology in empirical research.

Nazis in the Holy Land 1933-1948 Heidemarie Wawrzyn, 2013-08-01 Young Germans marched through Haifa shouting „Heil Hitler!“ and Swastika flags were hoisted at the German consulates in Mandatory Palestine. It was in November 1931 when a non-Jewish German made the initial contact with Nazi officials in Germany that led to the establishment of a miniature Third Reich with local NS groups, Hitler Youth program, and associations for women, teachers, and others in Palestine. Approximately 33% of all Palestine-Germans (Palästina-Deutsche) participated in the NS movement. Until today no extensive research written in English has been done on this bizarre „footnote“ in history. While previous publications in German mainly concentrated on the members of the Temple Society, this work includes Protestant and Catholic Germans as well. It focuses on the relationship of Palästina-Deutsche with local Arabs and Jews. It covers the period of 1933 to 1948 as well as the years between the establishing of the State of Israel and the departure of the last group of Germans in 1950.

At the end of the book, the reader will find a list with more than seven hundred names of those who joined the NS groups.

Fashion and Postcolonial Critique Elke Gaugele, Monica Tilton, 2019 *Fashion and Postcolonial Critique* outlines a critical global fashion theory from a postcolonial perspective. It investigates contemporary articulations of postcolonial fashion critique, and analyzes fashion as a cultural, historical, social, and political phenomenon involved in and affected by histories of colonial domination, anti-colonial resistance, and processes of decolonization and globalization. Stemming from a range of different disciplines, such as art history, textile studies, anthropology, history, literary studies, cultural studies, sociology, fashion media, and fashion theory, the contributions in this book reflect the multidisciplinary and diverse nature of postcolonial fashion research today.
