Analysing Muslim Traditions Nicolet Boekhoff- van der Voort,Sean W. Anthony,2010 Since its inception, the study of ad th conducted by scholars trained in the Western academic tradition has been marked by sharp methodological debates. A focal issue is the origin and development of traditions on the advent of Islam. Scholars' verdicts on these traditions have ranged from late fabrications without any historical value for the time concerning which the narrations purport to give information to early, accurately transmitted texts that allow one to reconstruct Islamic origins . Starting from previous contributions to the debate, the studies collected in this volume show that, by careful analysis of their texts and chains of transmission, the history of Muslim traditions can be reconstructed with a high degree of probability and their historicity assessed afresh.

Handbook of Indigenous Education Elizabeth Ann McKinley,Linda Tuhiwai Smith,2019-05-23 This book is a state-of-the-art reference work that defines and frames the state of thinking, research and practice in indigenous education. The book provides an authoritative overview of the subject in one text. The work sits within the context of The UN Declaration of the Rights of Indigenous Peoples that states “Indigenous peoples have the right to the dignity and diversity of their cultures, traditions, histories and aspirations which shall be appropriately reflected in education” (Article 14.1). Twenty-five years ago a book of this nature would have been largely written by non-Indigenous researchers about Indigenous people and education. Today Indigenous researchers can write this work about and for themselves and others. The book is comprehensive in its coverage. Authors are drawn from various individual jurisdictions that have significant indigenous populations where the issues include language, culture and identity, and indigenous people’s participation in society. It brings together multiple streams of research by ‘new’ indigenous voices. The book also brings together a wide range of educational topics including early childhood education, educational governance, teacher education, curriculum, pedagogy, educational psychology, etc. The focus of one body of work on Indigenous education is a welcome enhancement to the pursuit of the field of Indigenous educational aspirations and development.

Evidence-based Ayurveda C. P. Khare,2019-10-16 This groundbreaking work calls for the overhaul of traditional Ayurveda and its transformation into a progressive, evidence-based practice. This book begins by looking back at the research of the last three centuries, Indian medicinal plants, and Ayurveda in a twenty-first-century context. The first part of this book explores the limitations of contemporary Ayurvedic pharmacognosy and pharmacology, discussing the challenges the practice faces from research and clinical trials. It makes a compelling argument for the necessity of change. The second part of the book defines and elaborates upon a new, scientific path, taking the reader from identification of the herb through all stages of drug development. An essential tool for herbal drug development, this text is designed for knowledgeable students, practitioners, and scholars of Ayurveda, pharmacy, and herbal medicine.

The Verbal Domain Roberta D'Alessandro,Irene Franco,Ángel J. Gallego,2017 This volume features cutting-edge research from leading authorities on the nature and structure of the verbal domain and the complexity of the Verb Phrase (VP). The book is divided into three parts, representing the areas in which contemporary debate on the verbal domain is most active. The first part focuses on the V head, and includes four chapters discussing the setup of verbal roots, their syntax, and their interaction with other functional heads such as Voice and v. Chapters in the second part discuss the need to postulate a Voice head in the structure of a clause, and whether Voice is different from v. Voice was originally intended as the head hosting the external argument in its specifier, as well as transitivity. This section explores its relationship with syntactic voice, i.e. the alternation between actives and passives. Part three is dedicated to event structure, inner aspect, and Aktionsart. It tackles issues such as the one-to-one relation between argument structure and event structure, and whether there can be minimal structural units at the basis of the derivation of any sort of XP, including the VP.

Himalayan Gazetteer Edwin T. Atkinson,2014-04-24 The Himalayas have captivated the imagination and interest of humankind for centuries. The more we explore, the more we learn. India's rich history, society, and culture, are deeply influenced by the world's tallest mountain range. After all, before modern travel, the Himalayas were the most important gateway to India, for people, goods and ideas. This rare and invaluable record of the youngest mountain range in the world is back in print after a century. The extensively detailed information on every district, food habits, customs, influences, as well as the people and their vocations will provide a new perspective to a whole new generation of young readers. The aim of this publication is to make Atkinson's rich data accessible once again to researchers so that we can continue to refer to this rich source of information in our continued work to conserve the rich natural resources and ecological heritage of the Himalayas which stand frighteningly threatened by fast paced and largely unplanned development.

With small—and very achievable—daily changes in your life, you'll see the incredible effects of aggregate gains that professional athletes know. You'll learn how: Eating broccoli provides the body with more protein per calorie than eating steak Using one teaspoon less of sugar per day would help you lose four pounds of fat per year Walking for fifteen minutes per day decreases your risk of cancer by fifty per cent Playing games like tennis can prevent Alzheimer's disease Losing ninety minutes of sleep reduces daytime alertness by nearly a third Replacing an hour of television with an hour of sleep could help you lose over fourteen pounds in a year And much more.
