Gender and Genre in the Folklore of Middle India Joyce Burkhalter Flueckiger, 2018-03-15 In

Gender and Genre in the Folklore of Middle India, Joyce Burkhalter Flueckiger analyzes six representative Indian folklore genres from a single regional repertoire to show the influence of their intertextual relations on the composition and interpretation of artistic performance. Placing special emphasis on women's rituals, she looks at the relationship between the framework and organization of indigenous genres and the reception of folklore performance. The regional repertoire under examination presents a strikingly female-centered world. Female performers and characters are active, articulate, and frequently challenge or defy expectations of gender. Men also confound traditional gender roles. Flueckiger includes the translations of two full performance texts of narratives sung by female and male storytellers respectively.

The Social Dimensions of Fiction Steven Tötösy de Zepetnek,1993 This work is a comparative study of nineteenth-century English-Canadian and French Canadian novel prefaces, a previously unexplored literary topic. As a study in Comparative Literature - with the application of a specific literary framework and methodology - the study conforms to theoretical and methodological postulates formulated in and prescribed by this framework when applied. This a priori postulate necessitates that the research on and the presentation of the Canadian novel preface be carried out in a specific manner, as follows. First, the study will establish the hypothesis that the preface to nineteenth-century English-Canadian and French-Canadian novels is a genre in its own right. This hypothesis will rest on the following: 1) a taxonomical survey of related terms meaning preface; 2) a survey of secondary literature of works dealing with the preface; 3) a discussion of the theoretical framework and methodology of the Empirical Theory of Literature and its appropriateness for the study of the preface; and 4) a discussion of the process of the compilation of the corpus of nineteenth-century Canadian

novel prefaces (Chapter one). In a second step, the theoretical postulate outlined in the hypothesis will be put into practice by the development and production of a preface typology (Chapter two). In a third step, further tenets of the Empirical Theory of Literature will be tested on the corpus of the prefaces (Chapter three). In a fourth step, the prefaces will be analysed following the tenets formulated in and prescribed by the systemic framework applied (Chapter four).

Ending Poverty Robin Lapthorn Marris, 1999 A provocative analysis, this book looks at the economic forces as well as the political and social factors in the world's gross imbalance of wealth. The economist Robin Marris argues that in the 21st century we can and must end poverty. Taking into account questions of population growth and the threat to the environment, he presents a plan of action

for the future. The wealthiest fifth of the developed world's population is fifty times richer than the Third World's poorest fifth, but this can be changed with rapid industrial growth in the Third World and development aid, and with proper management of the economy in the developed world.

Build Your Own .NET Language and Compiler Edward G. Nilges,2004-05-10 * Includes a complete QuickBasic compiler with source code. We cannot overstress that this is a huge marketing hook. The sheer nostalgia alone will generate sales. The idea of having QuickBasic for them to play with (or let their kids play with) will generate

sales. * One of a kind book – nothing else comes close to this book. * Demystifies compiler technology for ordinary programmers – this is a subject usually covered by academic books in a manner too advanced for most developers. This book is pitched at a level accessible to all but beginners. * Teaches skills used in many other types of programming from creation of macro/scripting languages to file parsing.

Design, Form, and Chaos Paul Rand,2017-01-01 Paul Rand's stature as one of the world's leading graphic designers is incontestable. For half a century his pioneering work in the field of advertising design and typography has exerted a profound influence on the design profession; he almost single-handedly transformed commercial art from a practice that catered to the lowest common

denominator of taste to one that could assert its place among the other fine arts. Among the numerous clients for whom he has been a consultant and/or designer are the American Broadcasting Company, IBM Corporation, and Westinghouse Electric Corporation. In this witty and instructive book, Paul Rand speaks about the contemporary practice of graphic design, explaining the process and passion that foster good design and indicting faddism and trendiness. Illustrating his ideas with examples of his own stunning graphic work as well as with the work of artists he admires, Rand discusses such topics as: the values on which aesthetic judgments are based; the part played by intuition in good design; the proper relationship between management and designers; the place of market research; how and when to use computers in the production of a design; choosing a typeface; principles of book design; and the thought processes that lead to a final design. The centerpiece of the book consists of seven design portfolios - with diagrams and ultimate choices - that Rand used to present his logos to clients such as Next, IDEO, and IBM.
