Golden Kingdoms Joanne Pillsbury,Timothy Potts,Kim N. Richter,2017-09-26 This volume accompanies a major international loan exhibition featuring more than three hundred works of art, many rarely or never before seen in the United States. It traces the development of gold working and other luxury arts in the Americas from antiquity until the arrival of Europeans in the early sixteenth century. Presenting spectacular works from recent excavations in Peru, Colombia, Panama, Costa Rica, Guatemala, and Mexico, this exhibition focuses on specific places and times—crucibles of innovation—where artistic exchange, rivalry, and creativity led to the production of some of the greatest works of art known from the ancient Americas. The book and exhibition explore not only artistic practices but also the historical, cultural, social, and political conditions in which luxury arts were produced and circulated, alongside their religious meanings and ritual functions. Golden Kingdoms creates new understandings of ancient American art through a thematic exploration of indigenous ideas of value and luxury. Central to the book is the idea of the exchange of materials and ideas across regions and across time: works of great value would often be transported over long distances, or passed down over generations, in both cases attracting new audiences and inspiring new artists. The idea of exchange is at the intellectual heart of this volume, researched and written by twenty scholars based in the United States and Latin America.

Remodelista Julie Carlson,2013-11-05 Remodelista.com is the go-to, undisputed authority for home design enthusiasts, remodelers, architects, and designers. Unlike sites that cater to all tastes, Remodelista has a singular and clearly defined aesthetic: classic pieces trump designs that are trendy and transient, and well-edited spaces take precedence over cluttered environments. High and low mix seamlessly here, and getting the look need not be expensive (think Design Within Reach meets Ikea). Remodelista decodes the secrets to achieving this aesthetic, with in-depth tours and lessons from 12 enviable homes; a recipe-like breakdown of the hardest-working kitchens and baths; dozens of do-it-yourself projects; "The Remodelista 100," a guide to the best everyday household objects; and an in-depth look at the ins and outs of the remodeling process. In a world of design confusion, Remodelista takes the guesswork out of the process.

The New Artisan Bread in Five Minutes a Day Jeff Hertzberg, M.D., M.D.,Zoë François,2013-10-22 The New Artisan Bread in Five Minutes a Day is a fully revised and updated edition of the bestselling, ground-breaking, and revolutionary approach to bread-making--a perfect gift for foodies and bakers! With more than half a million copies of their books in print, Jeff Hertzberg and Zoë François have proven that people want to bake their own bread, so long as they can do it easily and quickly. Based on fan feedback, Jeff and Zoë have completely revamped their first, most popular, and now-classic book, Artisan Bread in Five Minutes a Day. Responding to their thousands of ardent fans, Jeff and Zoë returned to their test kitchens to whip up more delicious baking recipes. They've also included a gluten-free chapter, forty all-new gorgeous color photos, and one hundred informative black-and-white how-to photos. They've made the Tips and Techniques and Ingredients chapters bigger and better than ever before, and included readers' Frequently Asked Questions. This revised edition also includes more than thirty brand-new recipes for Beer-Cheese Bread, Crock-Pot Bread, Panini, Pretzel Buns, Apple-Stuffed French Toast, and many more. There's nothing like the smell of freshly baked bread to fill a kitchen with warmth, eager appetites, and endless praise. Now, using Jeff and Zoë's innovative technique, you can create bread that rivals those of the finest bakers in the world in just five minutes of active preparation time.

Modern JavaScript Larry Ullman,2012-02-21 It's time for a current, definitive JavaScript book, and in this comprehensive beginner's guide, bestselling author Larry Ullman teaches the language as it is implemented today. Larry demonstrates how to build upon JavaScript's ease of use, while demystifying its often-cryptic syntax, especially for those who have not programmed before. This book enforces modern JavaScript's best practices and embraces key Web development approaches such as progressive enhancement and unobtrusive scripting. The author demonstrates loads of real-world code and makes it available for download. You'll learn about JavaScript itself and the relationship between JavaScript and HTML. Next you'll explore variables, common operators, and control structures. Then you'll create functions, handle events, and do more with HTML forms. You'll master Ajax, work with frameworks, and use JavaScript with PHP to create a complete example. The result is a book that helps you not just tinker with JavaScript but to thoroughly comprehend it. This book includes: Easy step-by-step instruction, ample illustrations, and clear examples Real-world techniques to build your skills Insight into best practices from a veteran Web expert Emphasis on strategies for creating reliable code that will work on all of today's browsers and devices, even those without JavaScript

A Long Walk to Water Linda Sue Park,2010 When the Sudanese civil war reaches his village in 1985, 11-year-old Salva becomes separated from his family and must walk with other Dinka tribe members through southern Sudan, Ethiopia and Kenya in search of safe haven. Based on the life of Salva Dut, who, after emigrating to America in 1996, began a project to dig water wells in Sudan. By a Newbery Medal-winning author.

Principles of Protein X-ray Crystallography Jan Drenth,2013-03-09 New textbooks at all levels of chemistry appear with great regularity. Some fields such as basic biochemistry, organic reaction mechanisms, and chemical thermodynamics are well represented by many excellent texts, and new or revised editions are published sufficiently often to keep up with progress in research. However, some areas of chemistry, especially many of those taught at the graduate level, suffer from a real lack of up to-date textbooks. The most serious needs occur in fields that are rapidly changing. Textbooks in these subjects usually have to be written by scientists actually involved in the research that is advancing the field. It is not often easy to persuade such individuals to set time aside to help spread the knowledge they have accumulated. Our goal, in this series, is to pinpoint areas of chemistry where recent progress has outpaced what is covered in any available textbooks, and then seek out and persuade experts in these fields to produce relatively concise but instructive intro ductions to their fields. These should serve the needs of one-semester or one-quarter graduate courses in chemistry and biochemistry. In some cases, the availability of texts in active research areas should help stimulate the creation of new courses. Charles R. Cantor v Preface to the Second Edition Since the publication of the previous edition in 1994, X-ray crystallography of proteins has advanced by improvements in existing techniques and by addition of

new techniques.

Ludlow Judy L. Neff,2006 Disproportionate to its small size, Ludlow's history is undeniably spacious. Situated along the Ohio River, Ludlow is located in the northernmost region of Kentucky, south of Cincinnati. Although not officially incorporated until 1864, Ludlow had been established much earlier by a handful of affluent families. As an alternative to chaotic city life, Ludlow offered residents vast land and tranquil surroundings where they could build their estates. Shortly thereafter, however, the late 19th century would bring the railroad to Ludlow, sparking dramatic growth and expansion of the city. Images of America: Ludlow displays a spectrum of photographs, from the hardworking faces of the Cincinnati Southern Railroad to the lively happenings at the Lagoon Amusement Park. Opening in 1895, the amusement park provided over two decades of entertainment and leisure activities for the community. Extensively photographed, it now endows us with striking images featured in a unique chapter. Additional views of businesses, churches, schools, and citizens give further glimpses of early life in Ludlow. Several historic family homesteads are displayed, including Elmwood Hall, the city's earliest known permanent residence.

C-C Bond Activation Guangbin Dong,2014-09-18 The series Topics in Current Chemistry presents critical reviews of the present and future trends in modern chemical research. The scope of coverage is all areas of chemical science including the interfaces with related disciplines such as biology, medicine and materials science. The goal of each thematic volume is to give the non-specialist reader, whether in academia or industry, a comprehensive insight into an area where new research is emerging which is of interest to a larger scientific audience. Each review within the volume critically surveys one aspect of that topic and places it within the context of the volume as a whole. The most significant developments of the last 5 to 10 years are presented using selected examples to illustrate the principles discussed. The coverage is not intended to be an exhaustive summary of the field or include large quantities of data, but should rather be conceptual, concentrating on the methodological thinking that will allow the non-specialist reader to understand the information presented. Contributions also offer an outlook on potential future developments in the field. Review articles for the individual volumes are invited by the volume editors. Readership: research chemists at universities or in industry, graduate students

Polymer Photogravure Clay Harmon,2018-12-07 Polymer Photogravure: A Step-by-Step Manual Highlighting Artists and Their Creative Practice is a three-part book on the non-toxic process of making ink-on-paper intaglio prints from continuous-tone photographs using water-etched photopolymer plates. Author Clay Harmon provides clear and easy to understand instructions that will enable anyone to successfully make a photogravure print. By quantifying the sensitometric behavior of polymer plates, Harmon has developed a methodical approach which will enable a new printmaker to produce plates in their own studio with a minimum of time and wasted materials. Section One provides a straightforward guide to setting up the polymer photogravure studio. Section Two covers a step-by-step method of making the print from start to finish. Section Three showcases contemporary artists' works, illustrating the variety and artistic breadth of contemporary polymer intaglio printmaking. The works in these pages range from monochrome to full color, and represent a variety of genres, including still lifes, portraits, nudes, landscapes, urban-scapes and more. Featuring over 30 artists and 200 full-color images, Polymer Photogravure is a most comprehensive overview of this printmaking process in print. Key topics covered include: Studio safety Equipment and supplies, evaluated from both a cost and utility point of view A brief discussion of the types of ink-based printing Aquatint screen considerations Image preparation and

positive printing on inkjet printers Paper preparation A simple and efficient polymer plate calibration process that minimizes wasted time and materials A straightforward inking, wiping and printing method Advanced printing techniques such as chine collé, à la poupée, and printing on wood Troubleshooting guide to platemaking and printing problems Tips on editioning and portfolios A visual survey of the range of artistic expression practiced by contemporary artists Sources for supplies and recommended reading Polymer photogravure plates enable an artist to use an almost-infinite range of image color and papers to make a print. The finished prints are extremely archival, consisting of only ink and paper. With Harmon's instructions, continuous tone intaglio prints are within the reach of all.

Hydrogen Electrochemical Production Christophe Coutanceau,Stève Baranton,Thomas Audichon,2017-09-07 Hydrogen Electrochemical Production presents different avenues of hydrogen production for energy applications, including current developments and future perspectives, using an interdisciplinary approach. Part of the Hydrogen Energy and Fuel Cell Primers series, the volume synthesizes information from many sources, making it a useful reference for industry professionals, researchers and graduate students. The book examines various methods, explaining their advantages and limitations. The water electrolysis reaction and systems are explored from different points of view, including an assessment of state-of-the-art technologies. Alternatives to water for feeding the electrolysis cell anode and for electrochemical hydrogen production (such as alcohol or other compounds from biomass) are discussed. Explores current technology developments and future perspectives of hydrogen production for energy applications Examines the state-of-the art technology in electrolysis reaction and systems and discusses the advantages and limitations of various methods Covers alternatives to water for feeding electrolysis cell anode, including alcohol and other compounds from biomass

Photo-poetics Jennifer Blessing,2015 Emerging photographers working in a contemporary art context This catalogue presents an important new trend in contemporary photography, offering an opportunity to define the concerns of a younger generation of artists and contextualize them within the history of art and culture. Drawing on the legacies of conceptual and commercial photography, these artists pursue a largely studio-based approach to still-life photography that centers on the representation of objects, often printed matter such as books, magazines and record covers. The result is images imbued with poetic and evocative personal significance-- a sort of displaced self-portraiture--that resonate with larger cultural and historical meanings. Driven by a deep interest in the medium of photography, these artists investigate the nature, laws and magic of film photography at the moment of its disappearance in our digital age. They attempt to rematerialize the photograph through meticulous printing, using film and other disappearing photo technologies, and by creating photo-sculptures and installations. Artists include Claudia Angelmaier, Erica Baum, Anne Collier, Moyra Davey, Leslie Hewitt, Elad Lassry, Lisa Oppenheim, Erin Shirreff, Kathrin Sonntag and Sara VanDerBeek.
