Towards Sustainable Society on Ubiquitous Networks Makoto Oya, Ryuya Uda, Chizuko Yasunobu, 2008-09-02 The massive growth of the Internet has made an enormous amount of information available to us. However, it is becoming very difficult for users to acquire an applicable one. Therefore, some techniques such as information filtering have been introduced to address this issue. Recommender systems filter information that is useful to a user from a large amount of information. Many e-commerce sites use recommender systems to filter specific information that users want out of an overload of information [2]. For example, Amazon.com is a good example of the success of recommender systems [1]. Over the past several years, a considerable amount of research has been conducted on recommendation systems. In general, the usefulness of the recommendation is measured based on its accuracy [3]. Although a high recommendation accuracy can indicate a user's favorite items, there is a fault in that only similar items will be recommended. Several studies have reported that users might not be satisfied with a recommendation even though it exhibits high recommendation accuracy [4]. For this reason, we consider that a recommendation having only accuracy is unsatisfactory. The serendipity of a recommendation is an important element when considering a user's long-term profits. A recommendation that brings serendipity to users would solve the problem of "user weariness" and would lead to exploitation of users' tastes. The viewpoint of the diversity of the recommendation as well as its accuracy should be required for future recommender systems.

Pragmatics of Uncertainty Joseph B. Kadane, 2016-10-14 A fair question to ask of an advocate of subjective Bayesianism (which the author is) is how would you model uncertainty? In this book, the author writes about how he has done it using real problems from the past, and offers additional comments about the context in which he was working.

Human-Computer Interaction Pablo H. Ruiz, Vanessa Agredo-Delgado, 2019-12-14 This book constitutes the proceedings of the 5th Iberoamerican Workshop on Human-Computer Interaction, HCI-Collab 2019, held in Puebla, Mexico, in June 2019. The 31 full papers presented in this volume were carefully reviewed and selected from 55 submissions. The papers describe models, design patterns, implementations, evaluations of existing applications, and systemic reviews; all of which are very important aspects within HCI.

A Structural Analysis of Complex Aerial Photographs Makoto Nagao, Takashi Matsuyama, 1980-12-31 It is most appropriate that the first volume to appear in the series Advanced Applications in Pattern Recognition should be this monograph by Nagao and Matsuyama. The work described here is a deep unification and synthesis of the two fundamental approaches to pattern recognition: numerical (also known as statistical) and structural (linguistic, syntactic). The power and unity of the methodology flow from the apparently effortless and natural use of the knowledge-base framework illuminated by the best results of artificial intelligence research. An integral part of the work is the algorithmic solution of many hitherto incompletely or clumsily treated problems. It was on the occasion of a laboratory visit in connection with the 4th IJCPR (of which Professor Nagao was the very able Program Chairman) that I saw in operation the system described here. On the spot I expressed the desire to see the work described for the international technical audience in this series and the authors were kind enough to agree to contribute to a new and unknown series. With the publication of this monograph on the eve of the 5th ICPR my wish is fulfilled. I want to thank here the authors and Plenum Publishing Corporation for making this volume and the series a reality.

UNIMARC Manual Alan Hopkinson, 2008-12-18 The third edition succeeds the fifth update of second edition. One of the main features has been the adoption of new and revised international standards, notably the International Standard Identifier for Libraries and Related Organizations, the ISBN 13 and the linking ISSN. New fields have been added for recording the Persistent Record Identifier. Uniform Conventional Headings for Legal and Religious texts are now catered for with separate fields. A number of fields have been revised: archival materials, manuscripts and documentation produced by the ISSN International Centre.

The Ways We Choose Dave Carey, 2014-04-11 Rising above extreme adversity was the common response from those with whom I served in North Vietnamese prisoner-of-war camps. Dave Carey, a truly motivational individual, describes in heartbreaking detail his experience and, much more importantly, the lessons he learned from that experience and has applied in his life. His is a story of courage and honor and I commend it to anyone who seeks to find the positive that can come from the worst of times. -- Senator John McCain The Ways We Choose is a powerful story of how, together, American POWs in the Hanoi Hilton were able not just to survive, but to be victorious over great adversity. Dave Carey presents simple, yet profound lessons in perseverance and victory. -- Ken Blanchard, co-author of The One Minute Manager and Leadership By The Book Dave Carey has written a riveting book that poignantly illustrates the triumph of the human spirit. His experience of conquering in a horrendous environment is a powerful example of and motivator for winning the everyday battles of life. This book is a winner. -- Dr. Ron Jenson, chairman Future Achievement International; author Make Life Not Just A Living Dave Carey is a graduate of the United States Naval Academy. During the Vietnam War, after his plane was shot down, he was interred as a POW in Hanoi for five and a half years. His military honors include the Legion of Merit, five Bronze Stars, two Meritorious Service Medals, the Purple Heart, eight Air Medals, and the Navy Commendation Medal. He resumed his career as a Naval officer after returning from Vietnam. During that time he held three positions as commanding officer, including service as Director of the Navy's Leadership and Management program. He retired with the rank of Captain.

Visual Information Communication Mao Lin Huang, Quang Vinh Nguyen, Kang Zhang, 2009-10-20 Visual communication through graphical and sign languages has long been conducted among human beings of different backgrounds and cultures, and in recent decades between human and machine. In today's digital world, visual information is typically encoded with various metaphors commonly used in daily life to facilitate rapid comprehension and easy analysis during the communication process. Visual information communication generally encompasses information visualization, graphical user-interfaces, visual analytics, visual languages and multi-media processing. It has been successfully employed in knowledge discovery, end-user programming, modeling, rapid systems prototyping, education, and design activities by people of many disciplines including architects, artists, children, engineers, and scientists. In addition, visual information is increasingly being used to facilitate human-human communication through the Internet and Web technology, and electronic mobile devices. This manuscript provides the cutting-edge techniques, approaches and the latest ongoing researches in the context of visual information communication. It is a collection of 24 chapters selected from more than 60 submissions to the VINCI'09 - 2009 Visual Information Communications International Conference, that is held in Sydney Australia, September 2009. These chapters were selected through a stringent review process to ensure their high standard in quality, significance and relevance. Each chapter was reviewed by at least two international Program Committee members of VINCI'09. The book covers a broad range of contents in five key sub-areas of visual information communication, including.

How People Learn II National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Science Education, Board on Behavioral, Cognitive, and Sensory Sciences, Committee on How People Learn II: The Science and Practice of Learning, 2018-09-27 There are many reasons to be curious about the way people learn, and the past several decades have seen an explosion of research that has important implications for individual learning, schooling, workforce training, and policy. In 2000, How People Learn: Brain, Mind, Experience, and School: Expanded Edition was published and its influence has been wide and deep. The report summarized insights on the nature of learning in school-aged children; described principles for the design of effective learning environments; and provided examples of how that could be implemented in the classroom. Since then, researchers have continued to investigate the nature of learning and have generated new findings related to the neurological processes involved in learning, individual and cultural variability related to learning, and educational technologies. In addition to expanding scientific understanding of the mechanisms of learning and how the brain adapts throughout the lifespan, there have been important

discoveries about influences on learning, particularly sociocultural factors and the structure of learning environments. How People Learn II: Learners, Contexts, and Cultures provides a much-needed update incorporating insights gained from this research over the past decade. The book expands on the foundation laid out in the 2000 report and takes an in-depth look at the constellation of influences that affect individual learning. How People Learn II will become an indispensable resource to understand learning throughout the lifespan for educators of students and adults.

Models of Psychological Space John Eliot,2012-12-06 Models of Psychological Space begins the reformulation of the construct of psychological space by bringing together in one volume a sampling of theoretical models from the psychometric, developmental, and experimental approaches. The author also discusses five general issues which cut across these three approaches; namely, age-related differences, sex-related differences, trainability, imagery, processing solutions, and the effect of stimulus dimensionality upon spatial performance. Models of Psychological Space provides an overview of a significant construct which has many researchable ideas, and which should be of interest to scholars from a wide range of disciplines.

Trends and Applications in Knowledge Discovery and Data Mining Leong Hou U.,Hady W. Lauw,2019-09-11 This book constitutes the thoroughly refereed post-workshop proceedings of the workshops that were held in conjunction with the 23rd Pacific-Asia Conference on Knowledge Discovery and Data Mining, PAKDD 2019, in Macau, China, in April 2019. The 31 revised papers presented were carefully reviewed and selected from a total of 52 submissions.
