The Emperor Titus opened the enormous Colosseum in AD 80 to host 100 days of games, and it will astound readers to learn what the ancient Romans found entertaining. Over 50,000 screaming fans watched gladiators battling each other to the death, men fighting exotic wild beasts, and even mock sea battles with warships floating on an arena floor flooded with water. By AD 476 the Roman Empire had fallen, and yet the ruins of the Colosseum remain a world-famous landmark of an unforgettable time.

The Great Global Puzzle Challenge with Google

Earth Clive Gifford,2011-04-01 Discover the many wonders of the world in this amazing illustrated tour of some of the most interesting places on Earth. Each spread focuses on one destination, and the amazingly intricate artwork gives readers a visual flavour of the place, with masses to look at and discover the more you look. There are links from one place to the next - historical, geographical, natural history or just simple proximity - for example, there is an ancient Egyptian obelisk in NY's central park, with two sister obelisks in Paris and London. Find the one in the Central Park using Google(TM) Earth co-ordinates and it gives you the clue to where you will be going next. The pyramids at the Louvre in Paris will whisk you off to the temples of Ancient Egypt, then find a connection from the Colosseum of Ancient Rome to the hot plains of Tanzania that team with wildlife, from flocks of flamingos to herds of wildebeest to prides of lions. The crater is actually a collapsed volcano; this knowledge then helps speed you to Mount Fuji and Tokyo. . . and so on. In each location you have to find a souvenir to take with you. You will also need to solve a puzzle with the help of Google(TM) Earth to collect co-ordinates for your final secret location - again on Google(TM) Earth. For instance, the puzzle tells you to visit

the Statue of Liberty on Google(TM) Earth and to count the number of points on its crown. This number is one of the co-ordinates you need to find your final destination at the end of the book.

Gardens of the Roman Empire Wilhelmina F.

Jashemski,Kathryn L. Gleason,Kim J. Hartswick,Amina-Aïcha Malek,2017-12-28 In *Gardens of the Roman Empire*, the pioneering archaeologist Wilhelmina F. Jashemski sets out to examine the role of ancient Roman gardens in daily life throughout the empire. This study, therefore, includes for the first time, archaeological, literary, and artistic evidence about ancient Roman gardens across the entire Roman Empire from Britain to Arabia. Through well-illustrated essays by leading scholars in the field, various types of gardens are examined, from how Romans actually created their gardens to the experience of gardens as revealed in literature and art. Demonstrating the central role and value of gardens in Roman civilization, Jashemski and a distinguished, international team of contributors have created a landmark reference work that will serve as the foundation for future scholarship on this topic. An accompanying digital catalogue will be made available at: www.gardensoftheromanempire.org.
