When you're new in school, all you want is to fit in. When eleven-year-old Warren and his family move to a new city, his twin brother, who has Down syndrome, attracts too much attention for Warren's liking. Bennie's different and doesn't care about it. But while Bennie may be oblivious to those who are curious or uneasy with him, Warren notices every smirk, comment, and sideways glance. Warren is weary of flip-flopping between trying to be just like everyone else and being the protective brother of a boy with special needs. Sometimes he thinks his life would be easier if he had no brother. But what he really needs is to stop worrying about what other people think.

Jigsaw Puzzle Politics in the Sunshine State Seth C. McKee, 2015-08-11 Redrawing district lines is arguably the most polarizing of political activities in the United States today. As technological developments permit more and more sophisticated statistical analyses, those in charge of the process are more tempted to gerrymander districts for their own future benefit. At the same time, as this data is made available to the public, litigation and calls for transparency intensify. As a

bellwether state, Florida offers a unique and fascinating case study to examine the various effects of redistricting. The contributors to this volume examine the issue from the perspectives of both politicians and voters, exploring the process of redistricting as well as the homogenization of districts. They examine new and ongoing controversies, including the creation of disparate pockets of opponents' voting blocs, by focusing on the massive 2012 boundary changes throughout the state--and the judicial review that called into question their legality on the eve of the 2014 elections.
