The Orion Prophecy Patrick Geryl,Gino Ratinckx,2001 In the year 2012 the Earth awaits a super catastrophe: its magnetic field will turn over in one go. Phenomenal earthquakes and tidal waves will completely destroy our civilisation. Europe and North America will shift thousands of kilometres northwards into polar climate. Nearly the whole earth's population will perish in the apocalyptic happenings. These dire predictions stem from Mayans and Egyptians -- descendants of the legendary Atlantis. The Atlanteans had highly evolved astronomical knowledge and were able to exactly calculate the previous world-wide flood in 9792 BC. They built tens of thousands of mandjits and escaped to South America and

Egypt. In the year 2012 Venus, Orion and several other stars will take the same 'code positions' as in 9792 BC, the year of the previous cataclysm! For thousands of years historical sources have told of a forgotten time capsule of ancient wisdom located in a mythical labyrinth of secret chambers filled with artefacts and documents from the previous flood -- this book gives one possible location.

Practical Advice to Teachers Rudolf Steiner, 2000 14 lectures, Stuttgart, August 21-

September 5, 1919 (CW 294) How do Waldorf teachers put their educational ideals into practice in the classroom? How does a teacher connect geography and art and language in a way that enlivens the souls of children? What does a child's respect for the teacher mean for later life? These are only a few practical aspects of this initial course for Waldorf teachers. During an intensive two weeks, Rudolf Steiner gave three simultaneous educational courses to those who would be the first teachers of the original Waldorf school. One course provided the foundational ideas behind Waldorf education (The Foundations of Human Experience); another provided a forum for questions and lively discussions on specific issues in the classroom (Discussions with Teachers). In this course, Steiner takes the middle-path by integrating theory and practice. Here, Steiner spoke of new ways to teach reading, writing, geography, geometry, language, and much more. His approach is tailored to the spiritual and physical needs of the children themselves, not to an arbitrary curriculum based solely on external results. At a time when public education is in a state of crisis, this book describes how children around the world are being guided into adulthood with a fuller sense of themselves and with a creative approach to life and the world around them.
