Optimizing the German Workforce David Meskill,2010-04-01 During the twentieth century, German government and industry created a highly skilled workforce as part of an ambitious program to control and develop the country's human resources. Yet, these long-standing efforts to match as many workers as possible to skilled vocations and to establish a system of job training have received little scholarly attention, until now. The author's account of the broad support for this program challenges the standard historical accounts that focus on disagreements over the German political-economic order and points instead to an important area of consensus. These advances are explained in terms of political policies of corporatist compromise and national security as well as industry's evolving production strategies. By tracing the development of these policies over the course of a century, the author also suggests important continuities in Germany's domestic politics, even across such different regimes as Imperial, Weimar, Nazi, and post-1945 West Germany.

Living Labs David V. Keyson,Olivia Guerra-Santin,Dan Lockton,2016-09-28 This book presents the results of a multi-annual project with sustainable Living Labs in the United Kingdom, Sweden, Germany and the Netherlands. Living Labs – as initiated by the authors – have proved to be very promising research, design, co-creation and communication facilities for the development and implementation of sustainable innovations in the home. The book provides an inspiring introduction to both the methodology and business modelling for the Living Lab facilities. Understanding daily living at home is key to designing products and services that support households in their transition to more sustainable lifestyles. This book not only explores new ways of gaining insights into daily practices, but also discusses developing and testing design methods to create sustainable solutions for households. These new methods and tools are needed because those available are either ineffective or cause rebound-effects. Intended for researchers and designers with an interest in the transition to sustainable lifestyles, it also appeals to company leaders interested in new ways of developing sustainable innovations and offers suggestions for effectively applying Living Labs for sustainable urban development.
