C.A. Edwards, J. R. Lofty

The Anthropology of Music Alan P. Merriam, 1964

In this highly praised and seminal work, Alan Merriam demonstrates that music is a social behavior--one worthy and available to study through the methods of anthropology. In it, he convincingly argues that ethnomusicology, by definition, cannot separate the sound-analysis of music from its cultural context of people thinking, acting, and creating. The study begins with a review of the various approaches in ethnomusicology. He then suggests a useful and simple research model: ideas about music lead to behavior related to music and this behavior results in musical sound. He explains many aspects and outcomes of this model, and the methods and techniques he suggests are useful to anyone doing field work. Further chapters provide a cross-cultural round-up of concepts about music, physical and verbal behavior related to music, the role of the musician, and the learning and composing of music. *The Anthropology of Music* illuminates much of interest to musicologists but to social scientists in general as well.

CodeNotes for J2EE Gregory Brill, 2001 CodeNotes provides the most succinct, accurate, and speedy way for a developer to ramp up on a new technology or language. Unlike other programming books, CodeNotes drills down to the core aspects of a technology, focusing on the key elements needed in

order to understand it quickly and implement it immediately. It is a unique resource for developers, filling the gap between comprehensive manuals and pocket reference. CodeNotes for J2EE: EJB, JDBC, JSP, and Servlets introduces Java developers to the key database and web development technologies of the Java 2 Platform, Enterprise Edition. The JDBC API, JavaServer Pages, and Servlet frameworks are covered individually with examples that show how these technologies work together to create robust, dynamic web-based applications. The book also explains how to use Enterprise JavaBeans to create large, distributed, scalable applications. This edition of CodeNotes includes:

- A global overview of a technology and explanation of what problems it can be used to solve
- Real-world examples
- How and Why, Design Notes, and Bugs and Caveats sections that provide hints, tricks, workarounds, and tips on what should be taken advantage of or avoided
- Instructions and classroom-style tutorials throughout from expert trainers and software developers

Visit www.codenotes.com for updates, source code templates, access to message boards, and discussion of specific problems with CodeNotes authors and other developers. Every CodeNotes title is written and reviewed by a team of commercial software developers and technology experts. See About the Authors at the beginning of the book for more information.

Distributed Systems Andrew S. Tanenbaum, Maarten van Steen, 2016 This second edition of Distributed

Systems, Principles & Paradigms, covers the principles, advanced concepts, and technologies of distributed systems in detail, including: communication, replication, fault tolerance, and security. Intended for use in a senior/graduate level distributed systems course or by professionals, this text systematically shows how distributed systems are designed and implemented in real systems.

Travels in India Jean-Baptiste

Tavernier, Valentine Ball, 1889 Jean-Baptiste

Tavernier (1605-89) was one of the most renowned travelers of 17th century Europe. The son of a French Protestant who had fled Antwerp to escape religious persecution, Tavernier was a jewel merchant who between 1632 and 1668 made six voyages to the East. The countries he visited (most more than once) included present-day Cyprus, Malta, Turkey, Syria, Iraq, Iran, Afghanistan, Pakistan, India, Sri Lanka, and Indonesia. In 1676 he published his two-volume *Les six voyages de Jean Baptiste Tavernier* (The six voyages of Jean Baptiste Tavernier). An abridged and very imperfect English translation of the book appeared in 1677. The first modern scholarly edition in English, presented here, was published in 1889, with translation, notes, and a biographical sketch of Tavernier by Dr. Valentine Ball (1843-95), a British civil servant with the Indian Geological Service. Among the most memorable chapters in the book are those that recount Tavernier's visits to the diamond mines of India and his inspection of the jewels of the Great Mogul. Tavernier was not a scholar or an educated linguist, and after his initial popularity in the 17th century his authority waned, as historians and others questioned the accuracy of his observations. In the 20th century, however, Tavernier's reputation rose, as such important historians as Lucien Febvre and Fernand Braudel used the detailed

information he recorded about the prices and qualities of goods and about business and commercial practices in their pioneering studies of economic and social history. The book contains several appendices by Ball about famous diamonds (including the historic Koh-i-Noor Diamond now belonging to the British royal family), diamond mines in India and Borneo, ruby mines in Burma, and sapphire washings in Ceylon (Sri Lanka). A fold-out map shows Tavernier's voyages in India and the mines he visited.
