**The Inventor** Beverly Blackman, 2018-01-30 There is another security breach between Earth and Xeracik, the first two planets to actually exchange intellectual information and form an alliance. The large historic oak tree on Grandpa's Texas ranch, which was being used as a portal between the two planets, has unwillingly delivered something to Earth. Yes, the tree was beginning to show signs of human emotions. It actually tried to stop the delivery. After an unwelcome entrance to Earth is made, there begins a threat of an all-out war between the planets. Rex Jr. is an innocent bystander who arrives at Mr. "Grandpa" Olson's ranch to see his uncle Rex. His uncle watches over Sam the tree portal, and when Rex Jr. arrives for a Thanksgiving visit, he accidentally gets involved in the catastrophic mishap. Fortunately for all involved on both planets, Rex Jr. is a science student who enjoys inventing things and entering science fairs. He was named after his uncle, and both ironically have the same first name as the ranch owner, Mr. Rex Olson, "Grandpa Rex". Grandpa Rex and his grandsons have been involved in the first four alien encounters and would rather not be involved anymore, but they do not have a choice. If you were thrown into a situation involving visitors from another planet, would you try to run away, or would you be curious

to know more about these strange beings? Rex Jr. has always been wanting to figure things out. He is a little nervous when he is all alone, confronting an alien, but as he stands beside Sam the tree portal, he doesn't run away. He begins asking the strange being one question after another. It has been named Kitty B by Grandpa Rex Olson. As Kitty B does things to try to unnerve Rex Jr., Rex Jr. just becomes more intent on understanding what is going on. Rex Jr. and the Xeracik laboratories come up with a very unusual invention. Read to find out what happens in this fifth of the Earth/Xeracik encounters.

Black Inventors Keith Holmes,2012-05-01 Black Inventors, Crafting Over 200 Years of Success, highlights the work of Black inventors from over seventy countries. The author, Keith C. Holmes, has spent more than twenty years researching Black inventors from countries that include Australia, Bahamas, Barbados, Canada, Cuba, Ethiopia, France, Germany, Ghana, Dominican Republic, Guadeloupe, Guyana, Haiti, Italy, Jamaica, Japan, Kenya, Mozambique, Nigeria, St. Vincent, South Africa, Tanzania, Trinidad and Tobago, the United Kingdom and the United States. Without inventions, innovations, financial resources, materials, muscle and labor saving devices, civilizations

cannot exist and flourish. This book documents a number of inventions, patents and labor saving devices conceived by Black inventors. Among many other inventions, pre-enslaved Africans, developed agricultural tools, building materials, medicinal herbs, cloth and weapons. Although historical documents emphasize that millions of Black people arrived in Canada, the Caribbean, Central and South America and the United States under slavery's yoke, it is relatively unknown that thousands of Africans and their descendants developed numerous labor-saving devices and inventions that spawned companies which generated money and jobs, worldwide. While most authors focus primarily on American and European inventors, Keith Holmes introduces inventions, both past and present, that Black people, developed and patented globally and multiculturally. *Black Inventors, Crafting Over 200 Years of Success*, also features early Black inventors from virtually every state in the US. It includes details about the first Black inventor who obtained a patent in both the Caribbean and the United States. To date, seventeen African American men have been inducted into the National Inventors Hall of Fame. Two inventors, Jan E, Matzeliger, (Suriname) and Elijah McCoy, (Colchester, Canada) were not born in this country. The material available in this book, one of the first to address the diversity of black inventors and their inventions from a global perspective, effectively gives the reader, researcher, librarian, student, and teacher the materials they need to understand that the Black

inventor is not only a national phenomenon, but also a global giant.
