Can You Outsmart an Economist? Steven E. Landsburg, 2018-09-25 This entertaining way to learn economics “will delight and inform anyone who enjoys rigorous thinking and the unexpected conclusions it delivers” (Jamie Whyte, author of Crimes Against Logic). Can you outsmart an economist? Steven Landsburg, acclaimed author of *The Armchair Economist* and professor of economics, dares you to try. In this whip-smart, entertaining, and entirely unconventional economics primer, he brings together over one hundred puzzles and brain teasers that illustrate the subject’s key concepts and pitfalls. From warm-up exercises to get your brain working, to logic and probability problems, to puzzles covering more complex topics like inferences, strategy, and irrationality, *Can You Outsmart an Economist?* will show you how to do just that by expanding the way you think about decision making and problem solving. Let the games begin! “Ingenious...enables you to think like an economist without incurring a Keynesian headache or a huge student loan.” —George Gilder, author of *Life After Google* “Entertaining as well as edifying. Read it, expand your mind, and have fun!” —N. Gregory Mankiw, Robert M. Beren Professor of Economics, Harvard University

Preventing Fatal Incidents in School and Youth Group Camps and Excursions Andrew Brookes, 2018-05-07 This book approaches the prevention of fatal incidents in outdoor education and related fields through detailed study of past tragedies. Although safety in many fields is built on accumulated lessons from past incidents, tragedies on school or youth group camps and excursions are so infrequent and so widely scattered that knowledge from previous incidents can elude those who would benefit. Nevertheless, the emergence of unlearned lessons from the past weighs heavily when those affected by a tragedy judge whether an incident should have been prevented. This book provides a foundation for a detailed and comprehensive understanding of fatality prevention in outdoor education, and in youth camps and excursions. It compiles, examines, and analyses information on fatal incidents that have occurred over many decades, involving many kinds of groups and endeavours, from around the globe. No previous work has attempted this task.

The World Until Yesterday Jared Diamond, 2013-01-10 From the author of No.1 international bestseller *Collapse*, a mesmerizing portrait of the human past that offers profound lessons for how we can live today Visionary, prize-winning author Jared Diamond changed the way we think about the rise and fall of human civilizations with his previous international bestsellers *Guns, Germs and Steel* and *Collapse*. Now he returns with another epic - and groundbreaking - journey into our rapidly receding past. In *The World Until Yesterday*, Diamond reveals how traditional societies around the world offer an extraordinary window onto how our ancestors lived for the majority of human history - until virtually yesterday, in evolutionary terms - and provide unique, often overlooked insights into human nature. Drawing extensively on his decades working in the jungles of Papua New Guinea, Diamond explores how tribal societies approach essential human problems, from childrearing to conflict resolution to health, and discovers we have much to learn from traditional ways of life. He unearths remarkable findings - from the reason why modern afflictions like diabetes, obesity and Alzheimer's are virtually non-existent in tribal societies to the surprising benefits of multilingualism. Panoramic in scope and thrillingly original, *The World Until Yesterday* provides an enthralling first-hand picture of the human past that also suggests profound lessons for how to live well today. Jared Diamond is the Pulitzer Prize-winning author of the seminal million-copy-bestseller *Guns, Germs, and Steel*, which was named one of TIME's best non-fiction books of all time, and *Collapse*, a #1 international bestseller. A professor of geography at UCLA and noted polymath, Diamond's work has been influential in the fields of anthropology, biology, ornithology, ecology and history, among others.

A Kangaroo Loose in Scotland Lachlan Ness, 2018-01-22 Lachlan and Janet travel from Australia to live in a small village in beautiful Caithness, mainland Scotland's most northerly country. Lachlan has accepted a post as locum minister, unaware of the many adventures that await him and Janet. A parade of colorful characters crosses their path through the pages of the book. Lachlan describes his journeys from mainland Scotland's most northerly point to its most westerly town, down the Western Highlands, Inverness, Culloden, Ullapool, to the Summer Isles and Orkney. He conducts a memorial service among wild and lonely trackless hills at the site of the 1942 plane crash that killed the duke of Kent, the king's brother. Lachlan writes warmly of daily life among the delightful folk of his congregation and in villages in his parish while dealing with characters such as the dodgy Add-on John and auld Dugald, who wants his cat buried with him, while Lachlan himself manages to get himself into his usual predicaments. Here is Lachlan at his quirky best. If you love all things Scottish, you'll love this book.

The First Book of Seconds Matthew Murrie, Steve Murrie, 2010-10-18 Susan Lucci, Al Gore, and the Buffalo Bills all received top billing by coming in second. But that's not normally the case--most runners-up dwell in obscurity. Finally, there's a book that celebrates the many unsung qualities of those who faltered on their way to the top! Inside, you'll discover little-known second-acts with entries that highlight their worthy achievements, such as: The second highest homerun hitter The second man to set foot on the moon The second most dangerous animal in the world The second-largest car rental chain (whose motto is fitting: We try harder) With more than 200 accounts of almost-claims-to-fame, this book leaves trivia junkies of all ages feeling like they won a gold medal--not a booby prize.

Killing Fear Allison Brennan, 2008-01-29 “[Brennan] is making a name for herself by producing not only memorable heroes but also unforgettable villains.”—Romantic Times Book Reviews Fear never dies Theodore Glenn loves to inflict pain . . . both on his victims and on those who later find the mutilated corpses. At his trial seven years ago, Glenn vowed vengeance on Detective Will Hooper, the cop who nabbed him, and beautiful Robin McKenna, the stripper whose testimony put him behind bars. When a catastrophic disaster sets Glenn free, he blazes a freshly bloodied path across San Diego County. But the death he craves most is Robin McKenna’s. Putting aside their past troubled relationship, Will rushes to protect Robin, now a savvy businesswoman operating an upscale club. As the killings mount and Glenn proves a master manipulator, Robin and Will become snared in a twisted web of horror. But the shocking truth is even worse: The evil they are to face is even deadlier than they fear.

The Black Lattice and Other Dystopian Tales Lynn Finger, 2017-12-08 *The Black Lattice and Other Dystopian Tales* by Lynn Finger is a thought-provoking collection of short stories in which humans and technology interface in futuristic worlds with unexpected consequences. These ten dystopian stories take scenarios of an unstable future and explore the depth, struggle, and joy of humanity. In *Without the Tears*, a nurse struggles to maintain his sense of humanity as nano-bot augmentation becomes the norm. *Say Goodbye to the Future* explores the feeling of taking the leap into a parallel universe...but missing it. Human survival is imperiled in *Above Water* in which citizens move underwater as Earth's sea levels rise to an inhospitable level -- but they are dependent on the cooperation of those who are in competition for dwindling resources. In *A Hostile Act of Cupcake*, a programming technician is accused of murder aboard a spaceship that lives on the edge of a black hole. And in the title story, *The Black Lattice*, the lives of space travelers coincide with the awakening of a sentient ship who holds a secret. When we discover the unfolding of our own dystopian futures, will you be prepared? Explore these visionary worlds created by a rising talent.

Crystals IV Antonis Anastasiadis,2018-06-24 4th Battle of the Titans: Clash between Natural and the Supernatural II - The Ascent of the Natural. The Crystals Series is a storyline in the form of a novel which starts from the very beginning of the creation of the Universe, traverses the whole human civilization, reaches the present and continues into the future, summarily following the evolutionary course of human civilization. In the first part of the Clash between the Supernatural – Natural, we followed the evolutionary path of life from 50 million years ago to 200 thousand years ago, we witnessed the first battles between the Supernatural and the Natural, the creation of the Balkan Peninsula, the domination of the mammals, but we followed the separate phylogenetic tree of humankind. A summary reference was made to the educational/training system necessary for the development of sentient beings at the three spiritual levels, the ten -faces-, the three consciences, the four paths and the five plagues that directly and indirectly impact on their lives. In the second part of the Clash between the Supernatural – Natural, 200 to 100 thousand years ago, we witness the slow-paced developmental modification of the Homo sapiens-sapiens, during which, life begins to acquire full self-knowledge. The final trial and oath-taking of Zeus as the Warrior of the Light take place as well as his efforts to take responsibility for reinstating the Natural Forces. Clashes of epic proportions, battles of the Titans and dwells between the Titans and the Olympians dominate the scene. In the 4th Battle of the Titans, we are witnessing the turning point of nature to the logical, the incarnation of nature with life and its rationalization by Homo sapiens-sapiens. It is the sentient being through which the universe is trying to acquire self-knowledge and self-realization. So, on the one hand, we are witnessing the indiscernible and insurmountable difficulties through which the White Crystal will eventually reach Mount Olympus in the hands of Zeus, and on the other, the easiness with which the Black Crystal will reach Othrys in the hands of Cronos. We are witnessing in fact, the conflict between the rational and the irrational and the transition of man to the logical. Man has fought hard during this transition. His mind was aflame for a series of thousands of years in his effort to address his difficult and inscrutable questions. At the end, he came out victorious, he moved on, but it was a futile victory, since he got carried away into metaphysical and supernatural escape routes. So, the metaphysical and illogical remains latent in his everyday reality and in every one of his thoughts, and emerges in every difficulty. Such titanic battles were fought inside the human mind.
