FM 72-20 Jungle Warfare(1944) by United States. War Department. General Staff United States War Department, 2016-03-22 In jungle warfare, the soldier often fights two enemies: man and nature. The elimination of nature as an enemy and the use of the jungle itself as an ally are training objectives fully as important as the elimination of the human enemy. The soldier must be trained not to fight the jungle: he must be capable of living successfully in it and making it work for him against the human enemy. The jungle is a strict taskmaster: unless an individual adjusts himself to the conditions imposed by jungle environment, he will be unable to exist long, even if there is no human enemy. It must be remembered that the difficulties imposed by jungle environment are impartially imposed upon enemy as well as friendly troops, and that the unit which better overcomes the difficulties imposed by the environment has a distinct advantage over the opposing force.

FM 72-20 Jungle Warfare United States War Department, 2015-12-22 War Department field manual, jungle warfare. (OBSOLETE) In jungle warfare, the soldier often fights two enemies: man and nature. The elimination of nature as an enemy and the use of the jungle itself as an ally are training objectives fully as important as the elimination of the human enemy. The soldier must be trained not to fight the jungle; he must be capable of living successfully in it and making it work for him against the human enemy. Health, hygiene, sanitation, jungle service and operations are detailed, along with appendixes on native plants and use of a machete in the jungle environment.

Artillery Warfare, 1939-1945 Simon Forty, Jonathan Forty, 2020-11-25 “From mountain warfare with guns on mules to V2 rockets and everything between makes it well worth a place on anyone’s reference shelf.” —Clash of Steel It is said that artillery won the Second World War for the Allies—that Soviet guns wore down German forces on the Eastern Front, negating their superior tactics and fighting ability, and that the accuracy and intensity of the British and American artillery was a major reason for the success of Allied forces in North Africa from El Alamein, in Italy and Normandy, and played a vital role in the battles of 1944 and 1945. Yet the range of weapons used is often overlooked or taken for granted—which is why this highly illustrated history by Simon and Jonathan Forty is of such value. They stress the importance of artillery on every front and analyze how artillery equipment, training and tactical techniques developed during the conflict. The selection of wartime photographs—many from east European sources—and the extensive quotations from contemporary documents give a graphic impression of how the guns were used on all sides. The photographs emphasize the wide range of pieces employed as field, antiaircraft and antitank artillery without forgetting self-propelled guns, coastal and other heavyweights and the development of rockets. The authors offer a fascinating insight into the weapons that served in the artillery over seventy years ago. “Superbly illustrated, this is testament to the courage and skills of extraordinary men in the execution of their duty. An amazing book.” —Books Monthly

Orc Warfare Chris Pramas, 2017-12-15 Despite their constant infighting and backstabbing, orc horde armies remain a dire threat to all races. To them, war is life. Beginning with an examination of the fighting methods of the individual orc warrior, the book expands to look at how they do battle in their small warbands and in vast armies. Using vivid illustrations, it reveals the tactics, strategies, and technology of all the orc troop types, from lightly armed archers and heavily armored shock troops to their wolf cavalry and siege engines. Finally, it explores specific key battles to develop the fullest possible understanding of these loathsome, terrifying creatures and the ways in which they wage war.

Science and the Pacific War Roy M. MacLeod, 1999-12-31 In 1995, the fiftieth anniversary of the end of the Second World War occasioned many reflections on the place of science and technology in the conflict. That the war ended with Allied victory in the Pacific theatre, inevitably focussed attention upon the Pacific region, and particularly upon the Manhattan project and its outcome. It was in the Pacific that Western physics and engineering gave birth to the Atomic Age. However, the Pacific war had also proved a testing time, and a testing space, for other disciplines and institutions. Extreme environments and operational distances, and the fundamental demands of logistics, required the Allies and the Japanese to innovate many scientific and technological practices. Just as medicine and botany were called upon to fight tropical diseases and insect pests, so engineers, anthropologists and geographers were called upon to understand local conditions and climates, and to work with local peoples whose traditional lives were changed forever by the experience. At the same time, the war played midwife to a host of new developments, not least in scientific intelligence and in chemical and biological weapons, which were to acquire far greater importance after 1945.

Defending the Driniumor Edward J. Drea, 1984 The planning and maneuvering that brought Japanese and American forces to the Driniumor River serve as the focus for the first part of this study. As the battle raged, however, the respective commanders had to depend on the collective skills of their individual soldiers and hope that their operational deployments, training, and tactical doctrine would bring them victory. The tactical struggle, or second phase, then, was as removed from the strategic and operational phase as the experience of the officers and men on the front line was from the abstract map symbols that represented their units at higher headquarters. This paper seeks to integrate American and Japanese strategic, operational, tactical, and human dimensions into a narrative form. The focus is on the 112th Cavalry Regiment because that unit played a significant role in defeating a numerically superior Japanese force that tried to outflank an American covering force. Ultra adds the intelligence dimension to American decision making.

Mine Warfare Andrew Ross, 2021-05-05 Mine warfare, in its various forms, is a favoured weapon used by insurgents against government forces. By June 1966, when the 1st Australian Task Force (1ATF) arrived in Phuoc Tuy Province, South Vietnam, the Viet Cong and People’s Army of Vietnam forces were well entrenched in the province and used mines extensively. The mine campaign risked few enemy lives and was a powerful statement to everyone, including civilians, that the Viet Cong were still in the war and not a spent force. The intense patrolling practised by

1ATF inevitably put its men in close contact with enemy mines. Indeed, 1ATF suffered more casualties from the Viet Cong mine warfare campaign than from any other single cause, yet enemy casualties were minimal. So why did the enemy mine campaign collapse in the period July to December 1970 and continue its rapid decline until 1ATF ended combat operations in September 1971? Counterinsurgency has been described as a competition in learning and, facing a well-organised mine campaign against them, 1ATF learned and adapted to the enemy's mine warfare techniques. Supported by statistical analyses of operational research data, this book details the complex tactics adopted by 1ATF to eventually defeat the Viet Cong mine campaign, and how enemy forces were reduced to a negligible military presence in Phuoc Tuy Province.

Phoenix from the Ashes Daniel P. Marston D. Phil.,2003-10-30 In June 1942 the Indian Army suffered a major defeat at the hands of the Japanese Army and subsequently endured its longest retreat ever. The Japanese forces had proved more mobile in tactics and more motivated and seasoned in warfare. As a result, the Indian Army assessed its mistakes to determine what changes were needed to rebuild itself into a more capable fighting force. Marston looks at the Indian Army as a reform-minded organization, one that was able to take lessons from this major defeat, implement the necessary reforms, and ultimately defeat the Japanese soundly in 1945. Army leaders instigated analysis of the defeat at all levels of command. Innovations in operational procedure, organization, and tactics were compared, discussed, then implemented. An ongoing reassessment continued both during and after subsequent engagements. By analyzing the changes made in tactical doctrine, reinforcement procedure, Indianization of the officer corps, and the quality of nonmartial race units, Marston demonstrates that the Indian Army of 1945 was vastly different from that of 1939. The Indian Army's transformation into a highly professional force contradicts the commonly held belief that it was too conservative a force to reform itself thoroughly in the face of new challenges.

FM 72-20 Jungle Operations, by United States. Department of the Army United States Department of the Army,2016-03-24 To our men. . . the jungle was a strange, fearsome place; moving and fighting in it were a nightmare. We were too ready to classify jungle as 'impenetratable' . . . To us it appeared only as an obstacle to movement; to the Japanese it was a welcome means of concealed maneuver and surprise . . . The Japanese reaped the deserved reward . . . we paid the penalty. -Field Marshall Slim, Victor in Burma, World War II (Concerning the dark, early days of the Burma Campaign) This book covers tactical operations in a jungle environment. Helicopter, armor, mechanized infantry, and combat support operations in a jungle environment. Navigation and tracking in a jungle environment. Communication techniques, and defense formations. Great book to gain an insight in military tactics in a jungle warfare environment.

Tropical Warfare in the Asia-Pacific Region, 1941-45 Kaushik Roy,2017-10-25 This is the first book to provide a comprehensive overview of the land war during the Second World War in South-East Asia and the South and South-West Pacific. The extensive existing literature focuses on particular armies - Japanese, British, American, Australian or Indian - and/or on particular theatres - the Philippines, Papua New Guinea, Malaya or Burma. This book, on the contrary, argues that warfare in all the theatres was very similar, especially the difficulties of the undeveloped terrain, and that there was considerable interchange of ideas between the allied armies which enabled the spread of best practice among them. The book considers tactics, training, technology and logistics, assesses the changing state of the combat effectiveness of the different armies, and traces the course of the war from the Japanese Blitzkrieg of 1941, through the later stalemate, and the hard fought Allied fightback. Although the book concentrates on ground forces, due attention is also given to air forces and amphibious operations. One important argument put forward by the author is that the defeat of the Japanese was not inevitable and that it was brought about by chance and considerable tactical ingenuity on the part of US and British imperial forces.
