Y Pai

Origin Jessica Khoury,2012-09-04 Pia has always known her destiny. She is meant to start a new race, a line of descendants who will bring an end to death. She has been bred for no other purpose, genetically engineered to be immortal and raised by a team of scientists in a secret compound hidden deep in the Amazon rainforest. Now those scientists have begun to challenge her, with the goal of training her to carry on their dangerous work. For as long as she can remember, Pia's greatest desire has been to fulfill their expectations. But then one night she finds a hole in the impenetrable fence that surrounds her sterile home. Free in the jungle for the first time in her life, Pia meets Eio, a boy from a nearby village. Unable to resist, she continues sneaking out to see him. As they fall in love, they begin to piece together the truth about Pia's origin—a truth with nothing less than deadly consequences that will change their lives forever. Origin is a beautifully told, electric new way to look at an age-old desire: to live forever. But is eternal life worth living if you can't spend it with the one you love?

Blindsight Peter Watts,2006-10-03 Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, Blindsight Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Bucky and the Lukefahr Ladies Shirley Gilmore,2017-11-02 When a mystery writer and his ten-year-old daughter move to the small town of Turn Back, Missouri, strange things begin to happen. Simon Carter moved from New York City to sleepy Turn Back, a town in the rugged hills of southeast Missouri on the road to nowhere, to find some peace and solitude. He thought it would be the perfect place to protect his daughter, Bucky, and her secret and to shield her from the world. Little did he realize that when Bucky befriended the elderly women of the Lukefahr Ladies Bible Class, it would set in motion events which would transform the town and lead to discoveries that would attract world-wide attention. What or who was behind the events that unfolded that summer and why was everyone dreaming the same dreams?

The House of Tongues James Dashner,2023-10-17 The author of the New York Times best-selling Maze Runner series debut Adult novel leads us on a dark journey of generational horror as we visit The House of Tongues. David Player has spent 30 years trying to forget the traumas of his childhood. The threats, the kidnappings, the murders. The imagined curses of a people born centuries earlier, passed from father to son, mother to daughter, generation to generation. Its climax came in human form, a monster of a man, one of the most notorious serial killers the nation has ever seen: Pee Wee Gaskins. And Gaskins had a particular hatred for the Player family, then for David, himself, who barely escaped those years with his own life intact. Now David is back, his four children in tow, visiting his parents' home, a place he has learned to cherish despite the evils that haunted his younger days. But no sooner does he return than a stranger visits their doorstep, the son of Pee Wee Gaskins. In a terrifying display, right in front of the kids, the man utters threats until he chokes on his own tongue, sparking a series of events that drag David and his family back into the days of curses and murders, onto a path of unimaginable terror, all too familiar. That path leads to an old gothic tower in the woods, a place David had blocked from his memory, a house of horrors both past and present, The House of Tongues.

Cat's Cradle Kurt Vonnegut,2009-11-04 “A free-wheeling vehicle . . . an unforgettable ride!”—The New York Times Cat's Cradle is Kurt Vonnegut's satirical commentary on modern man and his madness. An apocalyptic tale of this planet's ultimate fate, it features a midget as the protagonist, a complete, original theology created by a calypso singer, and a vision of the future that is at once blackly fatalistic and hilariously funny. A book that left an indelible mark on an entire generation of readers, Cat's Cradle is one of the twentieth century's most important works—and Vonnegut at his very best. “[Vonnegut is] an unimitative and inimitable social satirist.”—Harper's Magazine “Our finest black-humorist . . . We laugh in self-defense.”—Atlantic Monthly

Born to Run Christopher McDougall,2010-12-09 A New York Times bestseller 'A sensation ... a rollicking tale well told' - The Times At the heart of Born to Run lies a mysterious tribe of Mexican Indians, the Tarahumara, who live quietly in canyons and are reputed to be the best distance runners in the world; in 1993, one of them, aged 57, came first in a prestigious 100-mile race wearing a toga and sandals. A small group of the world's top ultra-runners (and the awe-inspiring author) make the treacherous journey into the canyons to try to learn the tribe's secrets and then take them on over a course 50 miles long. With incredible energy and smart observation, McDougall tells this story while asking what the secrets are to being an incredible runner. Travelling to labs at Harvard, Nike, and elsewhere, he comes across an incredible cast of characters, including the woman who recently broke the world record for 100 miles and for her encore ran a 2:50 marathon in a bikini, pausing to down a beer at the 20 mile mark.

The Cigarette Century Allan Brandt,2009-01-06 From agriculture to big business, from medicine to politics, The Cigarette Century is the definitive account of how smoking came to be so deeply implicated in our culture, science, policy, and law. No product has been so heavily promoted or has become so deeply entrenched in American consciousness. The Cigarette Century shows in striking

detail how one ephemeral (and largely useless) product came to play such a dominant role in so many aspects of our lives—and deaths.

Atmospheric and Oceanic Fluid Dynamics Geoffrey K. Vallis,2006-11-06 Fluid dynamics is fundamental to our understanding of the atmosphere and oceans. Although many of the same principles of fluid dynamics apply to both the atmosphere and oceans, textbooks tend to concentrate on the atmosphere, the ocean, or the theory of geophysical fluid dynamics (GFD). This textbook provides a comprehensive unified treatment of atmospheric and oceanic fluid dynamics. The book introduces the fundamentals of geophysical fluid dynamics, including rotation and stratification, vorticity and potential vorticity, and scaling and approximations. It discusses baroclinic and barotropic instabilities, wave-mean flow interactions and turbulence, and the general circulation of the atmosphere and ocean. Student problems and exercises are included at the end of each chapter. *Atmospheric and Oceanic Fluid Dynamics: Fundamentals and Large-Scale Circulation* will be an invaluable graduate textbook on advanced courses in GFD, meteorology, atmospheric science and oceanography, and an excellent review volume for researchers. Lake Pavin Télésphore Sime-Ngando,Pierre Boivin,Emmanuel Chapron,Didier Jezequel,Michel Meybeck,2016-10-31 This book represents the first multidisciplinary scientific work on a deep volcanic maar lake in comparison with other similar temperate lakes. The syntheses of the main characteristics of Lake Pavin are, for the first time, set in a firmer footing comparative approach, encompassing regional, national, European and international aquatic science contexts. It is a unique lake because of its permanently anoxic monimolimnion, and furthermore, because of its small surface area, its substantially low human influence, and by the fact that it does not have a river inflow. The book reflects the scientific research done on the general limnology, history, origin, volcanology and geological environment as well as on the geochemistry and biogeochemical cycles. Other chapters focus on the biology and microbial ecology whereas the sedimentology and paleolimnology are also given attention. This volume will be of special interest to researchers and advanced students, primarily in the fields of limnology, biogeochemistry, and aquatic ecology.
