Psychoanalytic Perspectives on Puberty and Adolescence Gertraud Diem-Wille, 2020-12-30 Puberty is a time of tumultuous transition from childhood to adulthood activated by rapid physical changes, hormonal development and explosive activity of neurons. This book explores puberty through the parent-teenager relationship, as a normal state of crisis, lasting several years and with the teenager oscillating between childlike tendencies and their desire to become an adult. The more parents succeed in recognizing and experiencing these new challenges as an integral, ineluctable emotional transformative process, the more they can allow their children to become independent. In addition, parents who can also see this crisis as a chance for their own further development will be ultimately enriched by this painful process. They can face up to their own aging as they take leave of youth with its myriad possibilities, accepting and working through a newfound rivalry with their sexually mature children, thus experiencing a process of maturity, which in turn can set an example for their children. This book is based on rich clinical observations from international settings, unique within the field, and there is an emphasis placed by the author on the role of the body in self-awareness, identity crises and gender construction. It will be of great interest to psychoanalysts, psychotherapists, parents and carers, as well as all those interacting with adolescents in self, family and society.

Conservative Party-building in Latin America James Loxton, 2021 Where do strong conservative parties come from? While there is a growing scholarly awareness about the importance of such parties for democratic stability, much less is known about their origins. In this groundbreaking book, James Loxton takes up this question by examining new conservative parties formed in Latin America between 1978 and 2010. The most successful cases, he finds, shared a surprising characteristic: they had deep roots in former dictatorships. Through a comparative analysis of failed and successful cases in Argentina, Chile, El Salvador, and Guatemala, Loxton argues that this was not a coincidence. The successes inherited a range of resources from outgoing authoritarian regimes that, paradoxically, gave them an advantage in democratic competition. He also highlights the role of intense counterrevolutionary struggle as a source of party cohesion. In addition to making an empirical contribution to the study of the Latin American right and a theoretical contribution to the study of party-building, Loxton advances our understanding of the worldwide phenomenon of authoritarian successor parties--parties that emerge from authoritarian regimes but that operate after a transition to democracy. A major work, *Conservative Party-Building in Latin America* will reshape our understanding of politics in contemporary Latin America and the realities of democratic transitions everywhere.

Rural Development for Cambodia Asian Development Bank, 2012-04-01 Cambodia's economic performance over the past decade has been impressive, and poverty reduction has made significant progress. In the 2000s, the contribution of agriculture and agro-industry to overall economic growth has come largely through the accumulation of factors of production---land and labor---as part of an extensive growth of activity, with productivity modestly improving from very low levels. Despite these generally positive signs, there is justifiable concern about Cambodia's ability to seize the opportunities presented. The concern is that the existing set of structural and institutional constraints, unless addressed by appropriate interventions and policies, will slow down economic growth and poverty reduction. These constraints include (i) an insecurity in land tenure, which inhibits investment in productive activities; (ii) low productivity in land and human capital; (iii) a business-enabling environment that is not conducive to formalized investment; (iv) underdeveloped rural roads and irrigation infrastructure; (v) a finance sector that is unable to mobilize significant funds for agricultural and rural development; and (vi) the critical need to strengthen public expenditure management to optimize scarce resources for effective delivery of rural services.

Consumption and Well-Being in the Material World Miriam Tatzel,2013-09-30 This volume addresses how we can find happiness and well-being in the material world. It builds on previous works that find that materialism is associated with lowered well-being (materialists are less happy) and that consumerism, in all its profusion, is harmful to environmental well-being. How can we use the money and possessions in our lives in the service of well-being? Apparently not by being materialistic. Can we benefit from the many wonders of the marketplace -- in technology, convenience and aesthetics -- without falling prey to the lures and dangers of excessive material preoccupation? Can we meet our material needs in ways that nourish growth and well-being? The authors of the chapters in this volume are on-going researchers into such questions. Herein you can learn about the hedonic benefits of thrift and of spending on experiences; how possessions can be beneficial; how different types of consumers spend money; cultural variations in conceptions of the good life; how we might reconcile environmental and consumer well-being; and how to measure the whole of human, economic, and environmental well-being. Taken all together, this collection finds grounds for compatibility between what's good for the consumer and what's good for the environment. This volume appeals to academics, professionals, students and others interested in materialism and consumer well-being.
