Ron Shandler's 2023 Baseball Forecaster Brent Hershey,Ray Murphy,2023-01-31 For more than 35 years, the very best in baseball predictions and statistics The industry's longest-running publication for baseball analysts and fantasy leaguers, Ron Shandler's Baseball Forecaster, published annually since 1986, is the first book to approach prognostication by breaking performance down into its component parts. Rather than predicting batting average, for instance, this resource looks at the elements of skill that make up any given batter's ability to distinguish between balls and strikes, his propensity to make contact with the ball, and what happens when he makes contact— reverse engineering those skills back into batting average.The result is an unparalleled forecast of baseball abilities and trends for the upcoming season and beyond.

Peter Greenaway's Postmodern / Poststructuralist Cinema Paula Willoquet-Maricondi,Mary Alemany-Galway,2008-07-17 Since the 1960s, British multi-media artist Peter Greenaway has shocked and intrigued audiences with his avant-garde approach to filmmaking and other artistic ventures. From early experimental films to provocative features, Greenaway has deployed strategies associated with structuralist cinema, only to challenge or critique the very limits of that cinema and of film in general. In this collection of essays, scholars from a variety of disciplines explore various postmodern and poststructuralist aspects of Greenaway's films, starting with his early shorts and delving into his feature-length works, including The Draughtman's Contract, The Belly of an Architect, A Zed and Two Noughts, The Cook, the Thief, His Wife and Her Lover, The Baby of M%con, and The Pillow Book. Other artistic productions, including his paintings and installations are also discussed. These essays examine the filmmaker's position within British and

avant-garde cinema and his interest in constructing and deconstructing representational systems. In the years since the first edition of this book, Greenaway has enjoyed continued success in creating hybridized media projects for the stage and screen, as evidenced by additional essays for this revised edition. A new chapter addresses how Dutch political events and Dutch art have been crucial in shaping Greenaway's aesthetic, focusing on *The Draughtsman's Contract*, the 1991 opera *Writing to Vermeer*, and *Nightwatching*, the audio-visual installation and 2007 film of the same name, which were inspired by Rembrandt's *Night Watch*. Also new to this collection is an essay that examines Greenaway's most ambitious endeavor to date, *The Tulse Luper Suitcases*, which exists as four feature films, multiple websites, an online game, several books and installations, and a number of theatrical events. Peter Greenaway's *Postmodern/Poststructuralist Cinema*, Revised Edition explores the cultural, historical, and philosophical implications of this hybrid artist whose paintings, drawings, exhibitions, installations, and operatic productions are an intrinsic part of his work in film. This collection of diverse essays, which includes two texts by Greenaway, two interviews with the director, and a revised filmography, will interest students, teachers, critics and lovers of both postmodern art and cinema.

Digital Material Marianne van den Boomen, 2009 This is a compelling study of the often controversial role and meaning of the new media and digital cultures in contemporary society. Three decades of societal and cultural alignment of new media yielded to a host of innovations, trials, and problems, accompanied by versatile popular and academic discourse. New Media Studies crystallized internationally into an established academic discipline, which begs the question: where do we stand now; which new issues have emerged now that new media are taken for granted, and which riddles remain unsolved; and, is contemporary digital culture indeed all about 'you', or do we still not really understand the digital machinery and how it constitutes us as 'you'. From desktop metaphors to Web 2.0 ecosystems, from touch screens to blogging to e-learning, from role-playing games to Cybergoth music to wireless dreams, this timely volume offers a showcase of the most up-to-date research in the field from what may be called a 'digital-materialist' perspective.

Performance-focused Smile Sheets Will Thalheimer, 2016 This book, *Performance-Focused Smile Sheets*, completely reimagines the smile sheet as an essential tool to drive performance improvement. Traditional smile sheets (i.e., learner response forms, student reaction forms) don't work! Decades of practice shows them to have negligible benefits. Scientific studies prove that traditional smile sheets are not correlated with learning results! Yet still we rely on smile sheets to make critical decisions about our learning interventions. In this book, Dr. Will Thalheimer carefully builds the case for a new methodology in smile-sheet design. Based on the learning research, *Performance-Focused Smile Sheets* shows how to write better questions, more focused on performance. The book also shows how to deploy smile sheets to our learners to get valid feedback--feedback that can be used to help us as trainers, instructional designers, teachers, professors, eLearning developers, and chief learning officers build virtuous cycles of continuous improvement.

The Psychology of Meditation Michael A. West, 2016-01-28 In the past 20 years meditation has grown enormously in popularity across the world, practised both by the general public, as well as by an increasing number of psychologists within their daily clinical practice. Meditation is now used to treat a range of disorders, including, depression, anxiety, eating disorders, chronic pain, and addiction. In the past twenty years we have also learned much more about the underlying neural bases for meditation, and why it works. *The Psychology of Meditation: Research and Practice* explores the practice of meditation and mindfulness and presents accounts of the cognitive and emotional processes elicited during meditation practice. Written by researchers and practitioners with considerable experience in meditation practice and from different religious or philosophical perspectives, the book examines the evidence for the effects of meditation on emotional and physical well-being in therapeutic contexts and in applied settings. The areas covered include addictions, pain management, psychotherapy, physical health, neuroscience, and the application of meditation in school and workplace settings. Uniquely, the contributors also present accounts of their own personal experience of meditation practice including their history of practice, phenomenology, and the impact it has had on their lives. Drawing on evidence from both research and practice, this is a valuable synthesis of the ways in which meditation can profoundly enrich human experience.

WreckProtect Charlotte Gjelstrup Björdal, David Gregory, 2011 This book stems from the results of an interdisciplinary European Union supported research project, WreckProtect, which investigated the decay and preservation of wooden shipwrecks under water in the Baltic Sea. It is not limited to the decay of wrecks in the Baltic alone and is aimed at all stakeholders with a vested interest in the protection of the underwater cultural heritage including marine archaeologists, conservators, engineers, and students in related fields at universities around the world. The book includes chapters on the anatomy and structure of wood and the physical and biological decay of shipwrecks under water. Well-known shipwrecks in the Baltic Sea are introduced, focusing upon their state of preservation and are compared to finds typically found in the North Sea and the Mediterranean. Microbial decay processes and their identification in both sediments and the water column are also discussed and related to other natural decay processes, as well as human impacts. Finally, a summary of available methods for the in-situ protection of wrecks is presented and a cost-benefit analysis of in-situ preservation versus conventional raising and conservation is given. Contents: 1) Introduction; 2) The Baltic Sea: a unique resource of underwater cultural heritage; 3) Other European waters; 4) The Baltic Sea environment; 5) Wood as material; 6) Wood degraders in the Baltic Sea; 7) The decay process of shipwreck timbers in the Baltic; 8) Spread of shipworm into the Baltic; 9) In-situ preservation of a wreck site; 10) Future research.
