📖 **DIGITAL ARCHAEOLOGY** Michael W. Graves,2013 In Digital Archaeology, expert practitioner Michael Graves has written the most thorough, realistic, and up-to-date guide to the principles and techniques of modern digital forensics. He begins by providing a solid understanding of the legal underpinnings and critical laws affecting computer forensics, including key principles of evidence and case law. Next, he explains how to systematically and thoroughly investigate computer systems to unearth crimes or other misbehavior, and back it up with evidence that will stand up in court. Drawing on the analogy of archaeological research, Graves explains each key tool and method investigators use to reliably uncover hidden information in digital systems. Graves concludes by presenting coverage of important professional and business issues associated with building a career in digital forensics, including current licensing and certification requirements.

📖 **AGILE PROCESSES IN SOFTWARE ENGINEERING AND EXTREME PROGRAMMING** ALBERTO SILLITTI,ORIT HAZZAN,EMILY BACHE,XAVIER ALBALADEJO,2011-05-03 This book contains the refereed proceedings of the 12th International Conference on Agile Software Development, XP 2011, held in Madrid, Spain, in May 2011. The year 2011 marked the 10th anniversary of the Agile Manifesto. In this spirit, the XP conference continued its fine tradition of promoting agility by disseminating new research results in a timely manner and by bringing together researchers and practitioners for a fruitful mutual exchange of experiences. As introduced for XP 2010, there were again two different program committees, one for research papers and one for experience reports. Regarding the research papers, 11 out of 56 submissions were accepted as full papers; and as far as the experience reports were concerned, the respective number was 4 out of 17 submissions. In addition to these papers, this volume also includes the short research papers, the abstracts of the posters, the position papers of the PhD symposium, and the abstracts of the workshops.

📖 **LEARNING TO SOLVE PROBLEMS** DAVID H. JONASSEN,2004-05-03 Learning to Solve Problems is a much-needed book that describes models for designing interactive learning environments to support how to learn and solve different kinds of problems. Using a research-based approach, author David H. Jonassen—a recognized expert in the field—shows how to design instruction to support three kinds of problems: story problems, troubleshooting, and case and policy analysis problems. Filled with models and job aids, this book describes different approaches for representing problems to learners and includes information about technology-based tools that can help learners mentally represent problems for themselves. Jonassen also explores methods for associating different solutions to problems and discusses various processes for reflecting on the problem solving process. Learning to Solve Problems also includes three methods for assessing problem-solving skills: performance assessment, component skills; and argumentation.

📖 **THE BIOLOGY OF BUSINESS** JOHN HENRY CLIPPINGER,1999-10 Increasingly interconnected, volatile, and complex, today's organizations cannot be controlled by any conventional approach to management. Indeed, an entirely new definition of what it means to manage is called for. In The Biology of Business, John Clippinger and nine outstanding contributors introduce managers to the complex adaptive system (CAS) of management, a system that takes into account all of the variables that impact modern enterprises and allows managers to take control from the bottom up. Here, the authors show how McKinsey & Co., Capital One, and OptiMark have employed CAS to achieve specific business goals and improve overall corporate fitness. And they bridge theory and practice to provide managers with proven tools and techniques they can use to transform their enterprises into self-renewing, self-organizing systems that are maximally responsive to changing market conditions and opportunities.[subhead] Featuring cutting-edge contributions by these noted scholarsW. 📖 **SEARCH AND OPTIMIZATION BY METAHEURISTICS** Ke-Lin Du,M. N. S. Swamy,2016-07-20 This textbook provides a comprehensive introduction to nature-inspired metaheuristic methods for search and optimization, including the latest trends in evolutionary algorithms and other forms of natural computing. Over 100 different types of these methods are discussed in detail. The authors emphasize non-standard optimization problems and utilize a natural approach to the topic, moving from basic notions to more complex ones. An introductory chapter covers the necessary biological and mathematical backgrounds for understanding the main material. Subsequent chapters then explore almost all of the major metaheuristics for search and optimization created based on natural phenomena, including simulated annealing, recurrent neural networks, genetic algorithms and genetic programming, differential evolution, memetic algorithms, particle swarm optimization, artificial immune systems, ant colony optimization, tabu search and scatter search, bee and bacteria foraging algorithms, harmony search, biomolecular computing, quantum computing, and many others. General topics on dynamic, multimodal, constrained, and multiobjective optimizations are also described. Each chapter includes detailed flowcharts that illustrate specific algorithms and exercises that reinforce important topics. Introduced in the appendix are some benchmarks for the evaluation of metaheuristics. Search and Optimization by Metaheuristics is intended primarily as a textbook for graduate and advanced undergraduate students specializing in engineering and computer science. It will also serve as a valuable resource for scientists and researchers working in these areas, as well as those who are interested in search and optimization methods.

📖 **THE POST-BUREAUCRATIC ORGANIZATION** CHARLES HECKSCHER,ANNE DONNELLON,1994-06-23 What is wrong with bureaucracy? What does the post-bureaucratic organization offer in the way of improvement? These and other provocative questions are addressed in this well-integrated collection of chapters by leading scholars in the field of organizational change. The far-reaching implications of the transformation of organizations from bureaucratic to post-bureaucratic are critically examined within this volume. Ideal for scholars of organizational behavior, sociology of organizations, organizational psychology, and for those who are interested in the latest developments in corporate reorganization.

📖 **THE SCIENCES OF THE ARTIFICIAL, REISSUE OF THE THIRD EDITION WITH A NEW INTRODUCTION BY JOHN LAIRD** HERBERT A. SIMON,2019-08-13 Herbert Simon's classic work on artificial intelligence in the expanded and updated third edition from 1996, with a new introduction by John E. Laird. Herbert Simon's classic and influential The Sciences of the Artificial declares definitively that there can be a science not only of natural phenomena but also of what is artificial. Exploring the commonalities of artificial systems, including economic systems, the business firm, artificial intelligence, complex engineering projects, and social plans, Simon argues that designed systems are a valid field of study, and he proposes a science of design. For this third edition, originally published in 1996, Simon added new material that takes into account advances in cognitive psychology and the science of design while confirming and extending the book's basic thesis: that a physical symbol system has the necessary and sufficient means for intelligent action. Simon won the Nobel Prize for Economics in 1978 for his research into the decision-making process within economic organizations and the Turing Award (considered by some the computer science equivalent to the Nobel) with Allen Newell in 1975 for contributions to artificial intelligence, the psychology of human cognition, and list processing. The Sciences of the Artificial distills the essence of Simon's thought accessibly and coherently. This reissue of the third edition makes a pioneering work available to a new audience.

2 SCHOOL LEADERSHIP AND ADMINISTRATION ALLAN WALKER, CLIVE DIMMOCK, 2012-11-12 This text calls for a broader approach to comparative educational administration: one which uses culture as the principle means of analysis. The articles collected by Allan Walker and Clive Dimmock detail the educational practices and outcomes of other systems while taking into account the mediating influence of culture. In this way, these essays stress the specific aspects of the cultures studied, and map out common ground for the study of administrators’ values, beliefs, and actions.

2 GROUNDWATER DEVELOPMENT AND MANAGEMENT Pradip K. Sikdar, 2018-07-27 This book deals with the challenges for efficient groundwater management, with a focus on South Asia and India, providing a balanced presentation of theory and field practice using a multidisciplinary approach. Groundwater of South Asia is increasingly confronted with overuse and deteriorating quality and therefore requires urgent attention. Management of the stressed groundwater systems is an extremely complex proposition because of the intricate hydrogeological set-up of the region. Strategies for sustainable management must involve a combination of supply-side and demand-side measures depending on the regional setting and socio-economic situations. As a consequence, the challenges of efficient groundwater management require not only a clear understanding of the aquifer configuration, but also demand for the development of a comprehensive database of the groundwater occurrences and flow systems in each hydrogeological setting. In addition, drilling and well construction methods that are appropriate to different hydrogeological formations need to be implemented as well as real-time monitoring of the status of the groundwater use. Also corrective measures for groundwater that is threatened with depletion and quality deterioration need to be installed. Finally, the legal framework of groundwater needs to be rearticulated according to the common property aspect of groundwater. These challenges should revolve around effective groundwater governance by creating an atmosphere to support and empower community-based systems of decision-making and revisit the existing legal framework and groundwater management institutions by fostering community initiatives. This book is relevant for academics, professionals, administrators, policy makers, and economists concerned with various aspects of groundwater science and management.

2 THE CATHEDRAL & THE BAZAAR Eric S. Raymond, 2001-02-01 Open source provides the competitive advantage in the Internet Age. According to the August Forrester Report, 56 percent of IT managers interviewed at Global 2,500 companies are already using some type of open source software in their infrastructure and another 6 percent will install it in the next two years. This revolutionary model for collaborative software development is being embraced and studied by many of the biggest players in the high-tech industry, from Sun Microsystems to IBM to Intel. The Cathedral & the Bazaar is a must for anyone who cares about the future of the computer industry or the dynamics of the information economy. Already, billions of dollars have been made and lost based on the ideas in this book. Its conclusions will be studied, debated, and implemented for years to come. According to Bob Young, this is Eric Raymond’s great contribution to the success of the open source revolution, to the adoption of Linux-based operating systems, and to the success of open source users and the companies that supply them. The interest in open source software development has grown enormously in the past year. This revised and expanded paperback edition includes new material on open source developments in 1999 and 2000. Raymond’s clear and effective writing style accurately describing the benefits of open source software has been key to its success. With major vendors creating acceptance for open source within companies, independent vendors will become the open source story in 2001.
