Racecraft Karen E. Fields, Barbara J. Fields, 2014-03-04 Tackling the myth of a post-racial society Praised by a wide variety of people from Ta-Nehisi Coates to Zadie Smith, *Racecraft* "ought to be positioned," as Bookforum put it, "at the center of any discussion of race in American life." Most people assume racism grows from a perception of human difference: the fact of race gives rise to the practice of racism. Sociologist Karen E. Fields and historian Barbara J. Fields argue otherwise: the practice of racism produces the illusion of race, through what they call "racecraft." And this phenomenon is intimately entwined with other forms of inequality in American life. So pervasive are the devices of racecraft in American history, economic doctrine, politics, and everyday thinking that the presence of racecraft itself goes unnoticed. That the promised post-racial age has not dawned, the authors argue, reflects the failure of Americans to develop a legitimate language for thinking about and discussing inequality. That failure should worry everyone who cares about democratic institutions.

The Great Transformation Karen Armstrong, 2009-02-24 From one of the world's leading writers on religion and the highly acclaimed author of the bestselling *A History of God*, *The Battle for God* and *The Spiral Staircase*, comes a major new work: a chronicle of one of the most important intellectual revolutions in world history and its relevance to our own time. In one astonishing, short period – the ninth century BCE – the peoples of four distinct regions of the civilized world created the religious and philosophical traditions that have continued to nourish humanity into the present day: Confucianism and Daoism in China; Hinduism and Buddhism in India; monotheism in Israel; and philosophical rationalism in Greece. Historians call this the Axial Age because of its central importance to humanity's spiritual development. Now, Karen Armstrong traces the rise and development of this transformative moment in history, examining the brilliant contributions to these traditions made by such figures as the Buddha, Socrates, Confucius and Ezekiel. Armstrong makes clear that despite some differences of emphasis, there was remarkable consensus among these religions and philosophies: each insisted on the primacy of compassion over hatred and violence. She illuminates what this "family" resemblance reveals about the religious impulse and quest of humankind. And she goes beyond spiritual archaeology, delving into the ways in which these Axial Age beliefs can present an instructive and thought-provoking challenge to the ways we think about and practice religion today. A revelation of humankind's early shared imperatives, yearnings and inspired solutions – as salutary as it is fascinating. Excerpt from *The Great Transformation*: In our global world, we can no longer afford a parochial or exclusive vision. We must learn to live and behave as though people in remote parts of the globe were as important as ourselves. The sages of the Axial Age did not create their compassionate ethic in idyllic circumstances. Each tradition developed in societies like our own that were torn apart by violence and warfare as never before; indeed, the first catalyst of religious change was usually a visceral rejection of the aggression that the sages witnessed all around them. . . . All the great traditions that were created at this time are in agreement about the supreme importance of charity and benevolence, and this tells us something important about our humanity.

House of Leaves Mark Z. Danielewski, 2000-03-07 "A novelistic mosaic that simultaneously reads like a thriller and like a strange, dreamlike excursion into the subconscious." —The New York Times Years ago, when *House of Leaves* was first being passed around, it was nothing more than a badly bundled heap of paper, parts of which would occasionally surface on the Internet. No one could have anticipated the small but devoted following this terrifying story would soon command. Starting with an odd assortment of marginalized youth -- musicians, tattoo artists, programmers, strippers, environmentalists, and adrenaline junkies -- the book eventually made its way into the hands of older generations, who not only found themselves in those strangely arranged pages but also discovered a way back into the lives of their estranged children. Now this astonishing novel is made available in book form, complete with the original colored words, vertical footnotes, and second and third appendices. The story remains unchanged, focusing on a young family that moves into a small home on Ash Tree Lane where they discover something is terribly wrong: their house is bigger on the inside than it is on the outside. Of course, neither Pulitzer Prize-winning photojournalist Will Navidson nor his companion Karen Green was prepared to face the consequences of that impossibility, until the day their two little children wandered off and their voices eerily began to return another story -- of creature darkness, of an ever-growing abyss behind a closet door, and of that unholy growl which soon enough would tear through their walls and consume all their dreams.
